

International Space Station

10
YEARS

Human Habitation

1
00:00:04,390 --> 00:00:01,670

hi

2
00:00:06,869 --> 00:00:04,400

i'm nasa administrator charlie bolden

3
00:00:09,350 --> 00:00:06,879

for the past decade around the clock

4
00:00:10,790 --> 00:00:09,360

every day and night human beings have

5
00:00:12,789 --> 00:00:10,800

lived and worked aboard the

6
00:00:15,990 --> 00:00:12,799

international space station

7
00:00:17,590 --> 00:00:16,000

on november 2nd 2000 the expedition 1

8
00:00:21,269 --> 00:00:17,600

crew arrived at what was then a

9
00:00:24,790 --> 00:00:21,279

fledgling outpost 200 miles above earth

10
00:00:27,269 --> 00:00:24,800

10 years later the sts-133 space shuttle

11
00:00:29,509 --> 00:00:27,279

mission will visit a thriving facility

12
00:00:32,389 --> 00:00:29,519

inhabited by six people that is being

13
00:00:34,709 --> 00:00:32,399

utilized for science and exploration

14

00:00:37,510 --> 00:00:34,719

it represents one of the most amazing

15

00:00:39,670 --> 00:00:37,520

engineering feats in human history

16

00:00:41,670 --> 00:00:39,680

this remarkable achievement was made

17

00:00:44,310 --> 00:00:41,680

possible by the thousands of nasa

18

00:00:46,229 --> 00:00:44,320

employees and contractors as well as our

19

00:00:48,790 --> 00:00:46,239

international partners

20

00:00:50,549 --> 00:00:48,800

i want to take this opportunity to thank

21

00:00:53,029 --> 00:00:50,559

all of the men and women who turned a

22

00:00:54,790 --> 00:00:53,039

dream into the shining beacon we see in

23

00:00:57,029 --> 00:00:54,800

the sky today

24

00:00:58,549 --> 00:00:57,039

the 10-year anniversary of continuous

25

00:01:01,430 --> 00:00:58,559

human presence on the international

26

00:01:04,310 --> 00:01:01,440

space station reminds us once again of

27

00:01:06,950 --> 00:01:04,320

the incredible talent and dedication of

28

00:01:09,030 --> 00:01:06,960

the amazing men and women at nasa

29

00:01:11,109 --> 00:01:09,040

congratulations on this important

30

00:01:13,670 --> 00:01:11,119

milestone in the history of human space
