

1
00:00:50,760 --> 00:01:03,229
good okay thanks

2
00:01:16,010 --> 00:01:04,649
there it is

3
00:01:16,020 --> 00:04:57,340
they're gonna reappear a Pearson

4
00:04:57,350 --> 00:05:10,520
you

5
00:05:18,989 --> 00:05:16,950
the weather team incidentally would be

6
00:05:21,359 --> 00:05:18,999
great

7
00:05:24,119 --> 00:05:21,369
all right Roger that in three zero

8
00:05:26,159 --> 00:05:24,129
minutes at 15:20 you will need an update

9
00:05:33,839 --> 00:05:26,169
of the weather and an update of all the

10
00:05:35,879 --> 00:05:33,849
traffic in the box for it copy that

11
00:05:45,250 --> 00:05:35,889
freedom star is standing by nine one

12
00:06:08,260 --> 00:05:48,350
right there they are right above us see

13
00:06:12,770 --> 00:06:12,050

right now we're just in this area right

14

00:06:16,940 --> 00:06:12,780

here

15

00:06:19,700 --> 00:06:16,950

this is all the drift rate that we have

16

00:06:22,190 --> 00:06:19,710

or the frustum that we just picked up

17

00:06:23,960 --> 00:06:22,200

and then right now the boosters have

18

00:06:26,780 --> 00:06:23,970

drifted south so we're in this area

19

00:06:29,330 --> 00:06:26,790

right here and we have deployed our

20

00:06:32,750 --> 00:06:29,340

divers for the underwater assessment on

21

00:07:00,790 --> 00:06:32,760

the left hand which be commencing in a

22

00:09:08,879 --> 00:07:02,680

in fact I'd go over the other side of
