

1  
00:00:06,869 --> 00:00:04,710  
cruise pausing while some uh air samples

2  
00:00:09,110 --> 00:00:06,879  
are taken between the two vehicles to

3  
00:00:11,110 --> 00:00:09,120  
make sure everything is all the airflow

4  
00:00:12,709 --> 00:00:11,120  
is going well that's expected to take

5  
00:00:15,270 --> 00:00:12,719  
about five minutes before the crew will

6  
00:00:17,830 --> 00:00:15,280  
be able to move on with their

7  
00:00:19,109 --> 00:00:17,840  
work to actually

8  
00:00:20,630 --> 00:00:19,119  
make their way into the international

9  
00:00:35,510 --> 00:00:20,640  
space station for the first time on the

10  
00:00:42,630 --> 00:00:37,350  
in station houston on space around two

11  
00:00:48,310 --> 00:00:45,830  
the procedure is on fe1 timeline at 12

12  
00:02:23,430 --> 00:00:48,320  
20 and there are no actions for the

13  
00:02:33,509 --> 00:02:25,350

and mark for uh

14

00:02:33,519 --> 00:02:39,670

and scorch go ahead

15

00:02:44,550 --> 00:02:41,830

hey uh here we are go for you to bring

16

00:02:46,390 --> 00:02:44,560

uh the airlock fan outfit on and then

17

00:02:48,869 --> 00:02:46,400

the only thing left i think is just to

18

00:02:50,869 --> 00:02:48,879

check that pma2 grill cover and it looks

19

00:02:53,190 --> 00:02:50,879

like your steps and that procedure will

20

00:02:55,430 --> 00:02:53,200

be complete

21

00:02:57,670 --> 00:02:55,440

okay scorch sorry about that we got the

22

00:03:06,390 --> 00:02:57,680

airlock fan alpha is now on and the

23

00:03:10,790 --> 00:03:09,030

samples in the shuttle and that's not

24

00:03:11,990 --> 00:03:10,800

required for anyone on this shuttle crew

25

00:03:14,790 --> 00:03:12,000

there's a

26

00:03:18,790 --> 00:03:14,800

later call out for uh 52 to perform that

27

00:03:21,350 --> 00:03:18,800

so no action on y'all's part

28

00:03:24,070 --> 00:03:21,360

okay scorch copy and we think fe2 is

29

00:04:58,629 --> 00:03:24,080

doing that right now

30

00:05:04,150 --> 00:05:01,270

hey you guys wore coordinating shirts

31

00:05:07,029 --> 00:05:04,160

we didn't we didn't do that that's okay

32

00:05:20,150 --> 00:05:07,039

hello how's it going how are you good

33

00:05:23,510 --> 00:05:21,990

134 crews currently making their way

34

00:05:25,270 --> 00:05:23,520

into the international space station for

35

00:05:27,029 --> 00:05:25,280

the first time this mission patches

36

00:05:29,270 --> 00:05:27,039

between the two vehicles were open at 6

37

00:05:30,629 --> 00:05:29,280

38 after the

38

00:05:32,310 --> 00:05:30,639

shuttle dock to the international space

39

00:05:34,230 --> 00:05:32,320  
station at 5 14

40

00:05:37,670 --> 00:05:34,240  
and here we're getting video back again

41

00:05:39,189 --> 00:05:37,680  
looks like the shuttle crew is

42

00:05:40,469 --> 00:05:39,199  
all together now on the international

43

00:05:42,550 --> 00:05:40,479  
space station they're in the orange

44

00:05:47,430 --> 00:05:42,560  
shirt on the edge of the screen

45

00:05:51,590 --> 00:05:49,749  
yeah absolutely yeah yeah

46

00:05:54,150 --> 00:05:51,600  
worked out great

47

00:05:56,150 --> 00:05:54,160  
so it's good to be back

48

00:05:58,309 --> 00:05:56,160  
looks looks pretty much the same

49

00:06:02,070 --> 00:05:58,319  
oh yeah yeah yeah yeah so we go over and

50

00:06:05,749 --> 00:06:02,080  
see cupola yeah looks bigger

51  
00:06:07,110 --> 00:06:05,759  
no three p of m i haven't seen those

52  
00:06:11,029 --> 00:06:07,120  
so

53  
00:06:12,230 --> 00:06:11,039  
yeah yeah we gotta knock it out because

54  
00:06:13,510 --> 00:06:12,240  
we gotta get going on a year and the

55  
00:06:15,749 --> 00:06:13,520  
window shutter is still closed we

56  
00:06:17,430 --> 00:06:15,759  
suggest to make two teams

57  
00:06:19,510 --> 00:06:17,440  
the most experienced on the station and

58  
00:06:22,070 --> 00:06:19,520  
the last execution station will

59  
00:06:23,909 --> 00:06:22,080  
they'll follow at myself with hull duty

60  
00:06:26,230 --> 00:06:23,919  
to on the russian segment and the power

61  
00:06:28,710 --> 00:06:26,240  
will do it on the us okay and we'll

62  
00:06:31,270 --> 00:06:28,720  
switch teams great and we'll stick to

63  
00:06:33,189 --> 00:06:31,280

safety pure safety for the first part

64

00:06:34,950 --> 00:06:33,199

all right then the logistics things will

65

00:06:38,629 --> 00:06:34,960

come later in the week

66

00:06:54,390 --> 00:06:38,639

divide it into and we'll do one of them

67

00:06:57,990 --> 00:06:55,909

two commanders they're talking with each

68

00:06:59,830 --> 00:06:58,000

other expedition 27 commander

69

00:07:04,790 --> 00:06:59,840

with uh commander

70

00:07:09,110 --> 00:07:06,230

okay so if we do

71

00:07:12,390 --> 00:07:09,120

so there's uh

72

00:07:14,550 --> 00:07:12,400

what do i do you uh test and buy let's

73

00:07:27,430 --> 00:07:14,560

pay the experience go in the restaurant

74

00:07:27,440 --> 00:07:43,029

i'm gonna

75

00:07:46,469 --> 00:07:44,950

can you change with me sure

76

00:07:50,790 --> 00:07:46,479

all right so we're gonna so since i'm

77

00:07:54,550 --> 00:07:52,550

rest of you guys stay here and then

78

00:08:03,350 --> 00:07:54,560

we're gonna switch yeah okay all right

79

00:08:03,360 --> 00:08:25,350

dude

80

00:08:28,629 --> 00:08:26,550

not me

81

00:08:30,390 --> 00:08:28,639

he's gonna have never been well

82

00:08:31,830 --> 00:08:30,400

too bad

83

00:08:33,909 --> 00:08:31,840

so um

84

00:08:35,029 --> 00:08:33,919

the purpose the purpose of this uh and

85

00:08:36,790 --> 00:08:35,039

we're still even though i'm not

86

00:08:39,110 --> 00:08:36,800

recording here we're still live audio

87

00:08:41,190 --> 00:08:39,120

okay the purpose of this briefing here

88

00:08:44,149 --> 00:08:41,200

is to go through

89

00:08:46,710 --> 00:08:44,159

area by area so to start to establish a

90

00:08:48,710 --> 00:08:46,720

little bit of a spatial awareness and

91

00:08:49,829 --> 00:08:48,720

look at the emergency equipment in terms

92

00:08:52,630 --> 00:08:49,839

of uh

93

00:08:54,630 --> 00:08:52,640

pva's tfe so the breathing bottle and

94

00:08:56,790 --> 00:08:54,640

the virus extinguisher

95

00:08:57,750 --> 00:08:56,800

the comp panels
