

1
00:00:06,079 --> 00:00:03,169
Houston station on space to grab - we

2
00:00:08,150 --> 00:00:06,089
are ready for the event Issa and Ozzie

3
00:00:17,330 --> 00:00:08,160
this is Houston please call station for

4
00:00:19,519 --> 00:00:17,340
a voice check I'm a fighter calling from

5
00:00:21,830 --> 00:00:19,529
this is too much fighter calling from

6
00:00:28,189 --> 00:00:21,840
the vicuna home in the Vatican how can

7
00:00:36,940 --> 00:00:28,199
you read me this is International Space

8
00:00:41,420 --> 00:00:39,680
guys it's excellent to see you we are

9
00:00:41,959 --> 00:00:41,430
here in the Vatican together with His

10
00:00:46,130 --> 00:00:41,969
Holiness

11
00:00:49,160 --> 00:00:46,140
AB splenetic xvi we are very great to

12
00:00:52,930 --> 00:00:49,170
see you and I hand over now to the head

13
00:00:54,319 --> 00:00:52,940

of the Italian space agency mr. saggezza

14

00:00:56,900 --> 00:00:54,329

thank you

15

00:00:59,750 --> 00:00:56,910

International Space Station good morning

16

00:01:02,000 --> 00:00:59,760

this is enrico saggezza from roma

17

00:01:05,690 --> 00:01:02,010

batygin we are in the presence of His

18

00:01:09,890 --> 00:01:05,700

Holiness Pope Benedict the 16th and with

19

00:01:13,550 --> 00:01:09,900

me it is also the air space commander

20

00:01:16,969 --> 00:01:13,560

space chief of staff Bernard is Giuseppe

21

00:01:20,240 --> 00:01:16,979

bernardi's and we are ready to start

22

00:01:23,899 --> 00:01:20,250

this historical communication so on the

23

00:01:26,480 --> 00:01:23,909

behalf of you and all of our friends we

24

00:01:29,660 --> 00:01:26,490

thank the Pope of this historical

25

00:01:32,060 --> 00:01:29,670

occasion of a connection between the

26
00:01:35,810 --> 00:01:32,070
Vatican International Space Station and

27
00:01:39,230 --> 00:01:35,820
in order for him to know all of you I

28
00:01:43,789 --> 00:01:39,240
would ask the - commander if they are so

29
00:01:47,929 --> 00:01:43,799
kind to introduce themselves and the

30
00:01:49,069 --> 00:01:47,939
crew they command and in particular

31
00:01:52,550 --> 00:01:49,079
dmitry kondratyev

32
00:01:54,800 --> 00:01:52,560
if you can start with your people and

33
00:02:02,670 --> 00:01:54,810
then mark le if you can start

34
00:02:08,219 --> 00:02:06,270
thank you we copy all and all start with

35
00:02:16,100 --> 00:02:08,229
interaction how the Space Station crew

36
00:02:21,510 --> 00:02:19,949
my name is Ken rat if I'm commander of

37
00:02:24,630 --> 00:02:21,520
the International Space Station along

38
00:02:29,190 --> 00:02:24,640

with my crew here paolo nespoli

39
00:02:34,170 --> 00:02:29,200
italian astronaut and Cady Coleman NASA

40
00:02:36,120 --> 00:02:34,180
astronaut and andrey borisenko his

41
00:02:41,280 --> 00:02:36,130
russian cosmonaut a russian space agency

42
00:02:47,809 --> 00:02:41,290
and alexander samokutyaev his russian

43
00:02:53,270 --> 00:02:49,979
welcome aboard the space station your

44
00:02:56,039 --> 00:02:53,280
holiness to my left is Roberto Vittori

45
00:02:58,320 --> 00:02:56,049
he's an Italian astronaut on a mission

46
00:03:01,860 --> 00:02:58,330
for the European Space Agency right

47
00:03:04,949 --> 00:03:01,870
behind him is endeavours pilot Greg

48
00:03:06,270 --> 00:03:04,959
Johnson and Greg Chamitoff one of our

49
00:03:08,849 --> 00:03:06,280
mission specialists who just did his

50
00:03:09,479 --> 00:03:08,859
first spacewalk yesterday and then drew

51
00:03:11,310 --> 00:03:09,489
Feustel

52
00:03:12,780 --> 00:03:11,320
who's our lead spacewalker for this

53
00:03:16,949 --> 00:03:12,790
mission who's going to do three

54
00:03:19,199 --> 00:03:16,959
spacewalks and next to Drew is Mike Fink

55
00:03:22,050 --> 00:03:19,209
who after this mission will be the

56
00:03:24,630 --> 00:03:22,060
American with the most time in space and

57
00:03:27,270 --> 00:03:24,640
won't be a approach in what the Russians

58
00:03:37,620 --> 00:03:27,280
have but a lot of days in space

59
00:03:39,330 --> 00:03:37,630
welcome aboard your holiness thank you

60
00:03:41,759 --> 00:03:39,340
very much for your introduction then

61
00:03:45,000 --> 00:03:41,769
I'll give you the floor to easily Nessa

62
00:03:48,150 --> 00:03:45,010
who would like it to say a few words for

63
00:03:51,720 --> 00:03:48,160

all of us and maybe some question for

64

00:03:53,729 --> 00:03:51,730

some of you thank you over here

65

00:03:56,460 --> 00:03:53,739

astronauts and very happy to have this

66

00:03:58,110 --> 00:03:56,470

extraordinary opportunity to converse

67

00:04:00,870 --> 00:03:58,120

with you during your mission and

68

00:04:03,390 --> 00:04:00,880

especially grateful to be able to speak

69

00:04:05,099 --> 00:04:03,400

to so many of you as both screws are

70

00:04:08,699 --> 00:04:05,109

present on the space situation of this

71

00:04:11,399 --> 00:04:08,709

time humanity is experiencing a period

72

00:04:14,220 --> 00:04:11,409

of extremely rapid progress in surveys

73

00:04:15,270 --> 00:04:14,230

of scientific knowledge and technical

74

00:04:18,410 --> 00:04:15,280

applications

75

00:04:21,810 --> 00:04:18,420

in a sense you are our representatives

76
00:04:25,160 --> 00:04:21,820
spare heating humanities exploration of

77
00:04:29,040 --> 00:04:25,170
new spaces and possibilities for future

78
00:04:32,370 --> 00:04:29,050
compounds limitations of our everyday

79
00:04:35,190 --> 00:04:32,380
existence we all admire your courage as

80
00:04:36,930 --> 00:04:35,200
well as a discipline and commitment with

81
00:04:39,810 --> 00:04:36,940
which you prepared yourself for this

82
00:04:41,820 --> 00:04:39,820
mission we are convinced inspired by

83
00:04:43,890 --> 00:04:41,830
know Brad years and such an intent

84
00:04:46,230 --> 00:04:43,900
placing the results of research and

85
00:04:49,650 --> 00:04:46,240
endeavors at the disposal of all

86
00:04:51,750 --> 00:04:49,660
humanity and for the common good this

87
00:04:53,490 --> 00:04:51,760
conversation gives me the chance to

88
00:04:56,580 --> 00:04:53,500

express my own admiration and

89

00:04:59,160 --> 00:04:56,590

appreciation to you and also collaborate

90

00:05:01,140 --> 00:04:59,170

in making a mission possible and thought

91

00:05:05,520 --> 00:05:01,150

my heartfelt encouragement to bring it

92

00:05:07,680 --> 00:05:05,530

to a safe and successful conclusion but

93

00:05:10,710 --> 00:05:07,690

this is a conversation so I must not be

94

00:05:12,630 --> 00:05:10,720

the only one doing the talking and very

95

00:05:15,900 --> 00:05:12,640

courage to hear you tell me about their

96

00:05:19,080 --> 00:05:15,910

experiences and your reflections if you

97

00:05:23,100 --> 00:05:19,090

don't mind I would like to ask to ask

98

00:05:25,500 --> 00:05:23,110

you a few questions first question from

99

00:05:28,140 --> 00:05:25,510

the space situation of a very different

100

00:05:30,630 --> 00:05:28,150

you of cells you fly over different

101
00:05:33,270 --> 00:05:30,640
continents and nations several times a

102
00:05:36,120 --> 00:05:33,280
day I think it must be obvious to you

103
00:05:39,510 --> 00:05:36,130
how we all live together on one earth

104
00:05:43,350 --> 00:05:39,520
and how absurd it is that we fight and

105
00:05:45,990 --> 00:05:43,360
kill each one I know if Mark Ellis wife

106
00:05:49,290 --> 00:05:46,000
was a victim of a serious attack and I

107
00:05:51,950 --> 00:05:49,300
hope her haze continues to improve and

108
00:05:55,710 --> 00:05:51,960
you're contemplating sales from up there

109
00:05:58,020 --> 00:05:55,720
so you ever wonder about survey nations

110
00:06:00,450 --> 00:05:58,030
and people live together down here about

111
00:06:10,320 --> 00:06:00,460
how science can contribute to the cause

112
00:06:12,150 --> 00:06:10,330
of peace well thank you for the kind

113
00:06:15,690 --> 00:06:12,160

words your holiness and thank you for

114

00:06:18,570 --> 00:06:15,700

mentioning my wife Gabby it's a very

115

00:06:20,790 --> 00:06:18,580

good question we fly over most of the

116

00:06:23,520 --> 00:06:20,800

world and you don't see borders but at

117

00:06:25,050 --> 00:06:23,530

the same time we realize that that

118

00:06:27,000 --> 00:06:25,060

people fight with each other and there's

119

00:06:28,440 --> 00:06:27,010

a lot of violence in this world and it's

120

00:06:29,969 --> 00:06:28,450

really an unfortunate thing

121

00:06:31,379 --> 00:06:29,979

usual

122

00:06:32,790 --> 00:06:31,389

you know people fight over many

123

00:06:35,929 --> 00:06:32,800

different things as we've seen in the

124

00:06:38,909 --> 00:06:35,939

Middle East right now it's somewhat for

125

00:06:41,760 --> 00:06:38,919

democracy in certain areas but usually

126
00:06:45,740 --> 00:06:41,770
people fight for resources and it's

127
00:06:50,219 --> 00:06:45,750
interesting in space you know on earth

128
00:06:52,679 --> 00:06:50,229
often people fight for energy in space

129
00:06:54,779 --> 00:06:52,689
we use solar power and we have fuel

130
00:06:59,100 --> 00:06:54,789
cells on the space shuttle but it's it

131
00:07:01,890 --> 00:06:59,110
on the space station it's you know the

132
00:07:03,600 --> 00:07:01,900
science and the technology that we put

133
00:07:06,089 --> 00:07:03,610
into the space station to develop a

134
00:07:08,700 --> 00:07:06,099
solar power capability gives us pretty

135
00:07:11,309 --> 00:07:08,710
much unlimited amount of energy and if

136
00:07:14,459 --> 00:07:11,319
those technologies could be adapted more

137
00:07:23,279 --> 00:07:14,469
on earth we could possibly reduce some

138
00:07:28,189 --> 00:07:26,159

second question one of the teams you

139

00:07:31,379 --> 00:07:28,199

have returned to in my discourses

140

00:07:34,769 --> 00:07:31,389

concerns a responsibility we all have to

141

00:07:37,230 --> 00:07:34,779

us the future of our planet I recall the

142

00:07:39,799 --> 00:07:37,240

serious risks facing the environment and

143

00:07:42,659 --> 00:07:39,809

survival of future generations

144

00:07:44,909 --> 00:07:42,669

scientists tell us we have to be careful

145

00:07:48,359 --> 00:07:44,919

and from an ethical point of view we

146

00:07:51,149 --> 00:07:48,369

must develop our conscience as well from

147

00:07:53,760 --> 00:07:51,159

your extraordinary observation point how

148

00:07:56,040 --> 00:07:53,770

do you see situation on earth do you see

149

00:08:04,379 --> 00:07:56,050

science or phenomena to which we need to

150

00:08:06,239 --> 00:08:04,389

be more attentive well your holiness

151

00:08:07,889 --> 00:08:06,249

it's it's a great honor to speak with

152

00:08:09,839 --> 00:08:07,899

you and you're right it really is an

153

00:08:12,589 --> 00:08:09,849

extraordinary vantage point we have up

154

00:08:14,850 --> 00:08:12,599

here on the one hand we could see how

155

00:08:16,409 --> 00:08:14,860

indescribably beautiful the planet that

156

00:08:18,959 --> 00:08:16,419

we have been given is but on the other

157

00:08:22,409 --> 00:08:18,969

hand we can really clearly see how

158

00:08:23,939 --> 00:08:22,419

fragile it is just the atmosphere for

159

00:08:26,699 --> 00:08:23,949

instance the atmosphere when viewed from

160

00:08:29,100 --> 00:08:26,709

space is paper-thin and to think that

161

00:08:31,619 --> 00:08:29,110

this paper-thin layer is all that

162

00:08:33,329 --> 00:08:31,629

separates every living thing from the

163

00:08:36,059 --> 00:08:33,339

vacuum of space and all that protects us

164

00:08:38,129 --> 00:08:36,069

is really a sobering thought and you

165

00:08:40,500 --> 00:08:38,139

know it's it seems to us that it's it's

166

00:08:42,750 --> 00:08:40,510

just incredible to to view the earth

167

00:08:44,819 --> 00:08:42,760

hanging in the blackness of space and to

168

00:08:45,329 --> 00:08:44,829

think that you know we are all on this

169

00:08:47,069 --> 00:08:45,339

together

170

00:08:49,920 --> 00:08:47,079

riding through this beautiful fragile

171

00:08:51,509 --> 00:08:49,930

Oasis through the universe and it really

172

00:08:53,280 --> 00:08:51,519

fills us with a lot of hope to think

173

00:08:55,439 --> 00:08:53,290

that you know all of us on board this

174

00:08:57,809 --> 00:08:55,449

incredible orbiting space station that

175

00:08:59,430 --> 00:08:57,819

was built by the many nations of our

176

00:09:01,650 --> 00:08:59,440

international partnership you know to

177

00:09:04,949 --> 00:09:01,660

accomplish this tremendous feat in orbit

178

00:09:07,230 --> 00:09:04,959

I think you know that just shows that by

179

00:09:08,670 --> 00:09:07,240

working together and by cooperating you

180

00:09:10,429 --> 00:09:08,680

know we could overcome many of the

181

00:09:12,600 --> 00:09:10,439

problems that face our planet we could

182

00:09:14,309 --> 00:09:12,610

solve many of the challenges that face

183

00:09:15,750 --> 00:09:14,319

the inhabitants of our planet it really

184

00:09:17,939 --> 00:09:15,760

is a wonderful place to live and work

185

00:09:27,120 --> 00:09:17,949

and it's a wonderful place to view our

186

00:09:31,530 --> 00:09:29,820

well third question the experience you

187

00:09:35,100 --> 00:09:31,540

are having right now is both

188

00:09:36,750 --> 00:09:35,110

extraordinary and very important even if

189

00:09:40,410 --> 00:09:36,760

you must come back down to earth like

190

00:09:42,420 --> 00:09:40,420

all the rest of us when you do return

191

00:09:44,760 --> 00:09:42,430

you will be much admired and treated

192

00:09:47,550 --> 00:09:44,770

like heroes who speak and act with

193

00:09:50,280 --> 00:09:47,560

authority you will be asking to talk

194

00:09:52,560 --> 00:09:50,290

about their experiences what will be the

195

00:09:55,440 --> 00:09:52,570

most important messages you would like

196

00:09:57,420 --> 00:09:55,450

to convey to young people especially who

197

00:10:06,150 --> 00:09:57,430

we live in a world strongly influenced

198

00:10:09,740 --> 00:10:06,160

by your experiences and discoveries your

199

00:10:12,810 --> 00:10:09,750

holiness as my colleagues have indicated

200

00:10:15,000 --> 00:10:12,820

we can look down and see our beautiful

201
00:10:16,920 --> 00:10:15,010
planet earth that God has made and it is

202
00:10:20,400 --> 00:10:16,930
the most beautiful planet in the whole

203
00:10:22,200 --> 00:10:20,410
solar system however if we look up we

204
00:10:24,300 --> 00:10:22,210
can see the rest of the universe and the

205
00:10:26,880 --> 00:10:24,310
rest of the universe is out there for us

206
00:10:29,190 --> 00:10:26,890
to go explore and the International

207
00:10:31,470 --> 00:10:29,200
Space Station is just one symbol one

208
00:10:34,380 --> 00:10:31,480
example of what human beings can do when

209
00:10:37,290 --> 00:10:34,390
we work together constructively so our

210
00:10:38,970 --> 00:10:37,300
message I think one of our many messages

211
00:10:42,210 --> 00:10:38,980
but I think one of our most important

212
00:10:44,220 --> 00:10:42,220
messages is to let the children of the

213
00:10:46,020 --> 00:10:44,230

planet know the young people know that

214

00:10:47,850 --> 00:10:46,030

there's a whole universe for us to go

215

00:10:49,530 --> 00:10:47,860

explore and when we do it together

216

00:10:57,450 --> 00:10:49,540

there's nothing that we cannot

217

00:11:04,320 --> 00:11:01,260

my first question space exploration is a

218

00:11:06,060 --> 00:11:04,330

fascinating scientific adventure I know

219

00:11:08,639 --> 00:11:06,070

that you have been installing new

220

00:11:11,250 --> 00:11:08,649

equipment to further scientific research

221

00:11:14,250 --> 00:11:11,260

and the study of radiation coming from

222

00:11:17,040 --> 00:11:14,260

outer space but I think it is also an

223

00:11:19,320 --> 00:11:17,050

adventure of the human spirit a powerful

224

00:11:21,720 --> 00:11:19,330

stimulus to reflect on the origins and

225

00:11:25,050 --> 00:11:21,730

on the destiny of the universe and

226

00:11:28,050 --> 00:11:25,060

humanity believers often look up at the

227

00:11:30,420 --> 00:11:28,060

limitless heavens and meditating on the

228

00:11:33,329 --> 00:11:30,430

creator of it all just Rock pass a

229

00:11:36,449 --> 00:11:33,339

mystery of his greatness satisfies a

230

00:11:38,910 --> 00:11:36,459

medal I gave Robert as a sign of my own

231

00:11:41,550 --> 00:11:38,920

participation in your mission represents

232

00:11:43,680 --> 00:11:41,560

the creation of men is painted by

233

00:11:45,660 --> 00:11:43,690

Michelangelo in the Sistine Chapel in

234

00:11:48,840 --> 00:11:45,670

the midst of your intense work on

235

00:11:51,150 --> 00:11:48,850

research to ever stop and reflect axis

236

00:11:54,210 --> 00:11:51,160

perhaps even to say a prayer to the

237

00:11:55,290 --> 00:11:54,220

creature will be easier for you to think

238

00:12:26,050 --> 00:11:55,300

about these things

239

00:12:30,970 --> 00:12:28,750

Alina's to leave on board of the

240

00:12:33,400 --> 00:12:30,980

International Space Station to work as

241

00:12:36,540 --> 00:12:33,410

an astronaut on the shuttles the use of

242

00:12:40,060 --> 00:12:36,550

the station is extremely intense but we

243

00:12:44,740 --> 00:12:40,070

all have an opportunity when the nights

244

00:12:48,610 --> 00:12:44,750

come to look out and more to look down

245

00:12:52,240 --> 00:12:48,620

on earth our planet the blue planet is

246

00:12:55,660 --> 00:12:52,250

beautiful blue is the color of our

247

00:12:58,150 --> 00:12:55,670

planet blue is the color of the sky blue

248

00:13:00,910 --> 00:12:58,160

is also the color of the Italian Air

249

00:13:03,040 --> 00:13:00,920

Force the organization that gave me the

250

00:13:05,640 --> 00:13:03,050

opportunity to then join the Italian

251
00:13:09,240 --> 00:13:05,650
space agency the European Space Agency

252
00:13:12,700 --> 00:13:09,250
when we have a moment to look down

253
00:13:15,880 --> 00:13:12,710
buting is the three-dimensional effect

254
00:13:19,090 --> 00:13:15,890
of the beauty of the planet is capturing

255
00:13:24,730 --> 00:13:19,100
our earth art is capturing my art and

256
00:13:29,830 --> 00:13:24,740
they do pray I do praying for for me for

257
00:13:34,300 --> 00:13:29,840
our families for our future I took with

258
00:13:36,840 --> 00:13:34,310
me the coin and I allowed this chlorine

259
00:13:42,130 --> 00:13:36,850
to float in front of me to demonstrate

260
00:13:45,460 --> 00:13:42,140
microgravity I shall thank you very much

261
00:13:49,150 --> 00:13:45,470
for this opportunity and I would like to

262
00:13:51,940 --> 00:13:49,160
allow this coin to float to my friend

263
00:13:55,870 --> 00:13:51,950

and colleague Paolo it will make return

264

00:13:59,290 --> 00:13:55,880

on Earth on the Soyuz I brought it with

265

00:14:09,460 --> 00:13:59,300

me to space and we'll take down on earth

266

00:14:17,200 --> 00:14:12,790

I'm Adam and my last question is for

267

00:14:19,660 --> 00:14:17,210

Paolo dear Paolo I know that a few years

268

00:14:21,790 --> 00:14:19,670

ago a few days ago your mom has left you

269

00:14:24,790 --> 00:14:21,800

and in a few days you will come back

270

00:14:29,590 --> 00:14:24,800

home you will not find her waiting for

271

00:14:33,670 --> 00:14:29,600

you we're all close to you me too I have

272

00:14:36,430 --> 00:14:33,680

prayed for her how have you been living

273

00:14:39,430 --> 00:14:36,440

through this time of pain on the

274

00:14:42,460 --> 00:14:39,440

International Space Station do you feel

275

00:14:46,240 --> 00:14:42,470

isolated and alone or do you feel United

276

00:14:51,450 --> 00:14:46,250

amongst ourselves in a community that

277

00:14:58,470 --> 00:14:55,320

Santo Padre OSINT heed the Holy Father I

278

00:15:02,050 --> 00:14:58,480

felt your prayers and everyone's prayers

279

00:15:06,280 --> 00:15:02,060

arriving up here we're outside the world

280

00:15:07,750 --> 00:15:06,290

we orbit you outside the earth and we

281

00:15:09,720 --> 00:15:07,760

have a vantage point to look at the

282

00:15:12,540 --> 00:15:09,730

earth and we feel everything around us

283

00:15:16,840 --> 00:15:12,550

my colleagues on board the station

284

00:15:19,570 --> 00:15:16,850

Dimitri Katie Ron Alexander and today

285

00:15:22,510 --> 00:15:19,580

and and Ray were very close to me at

286

00:15:26,290 --> 00:15:22,520

this important time for me a very

287

00:15:29,920 --> 00:15:26,300

intense moment me as well as my brothers

288

00:15:32,650 --> 00:15:29,930

and sisters my uncle's my aunts my

289

00:15:35,380 --> 00:15:32,660

relatives were close to my mom in her

290

00:15:39,640 --> 00:15:35,390

last moments I'm very grateful for this

291

00:15:42,550 --> 00:15:39,650

I felt very far but also very close and

292

00:15:46,630 --> 00:15:42,560

the thought of feeling all of you near

293

00:15:49,600 --> 00:15:46,640

me at this time has been a great really

294

00:15:51,670 --> 00:15:49,610

if I also want to thank the Italian and

295

00:15:54,490 --> 00:15:51,680

American space agencies that have given

296

00:16:01,560 --> 00:15:54,500

me the opportunity so that I was able to

297

00:16:07,680 --> 00:16:04,620

the astronauts thank you warmly for this

298

00:16:10,170 --> 00:16:07,690

wonderful opportunity to meet and tired

299

00:16:12,629 --> 00:16:10,180

of with you we have helped in me and

300

00:16:14,910 --> 00:16:12,639

many other people to reflect together on

301
00:16:17,730 --> 00:16:14,920
important issues since regards the

302
00:16:20,100 --> 00:16:17,740
future of humanity I wish you the very

303
00:16:22,290 --> 00:16:20,110
best for your work and for the success

304
00:16:24,870 --> 00:16:22,300
of your admission at the service of

305
00:16:27,840 --> 00:16:24,880
science international collaboration

306
00:16:30,870 --> 00:16:27,850
authentic progress and for peace in the

307
00:16:33,480 --> 00:16:30,880
world I will continue to follow you in

308
00:16:49,370 --> 00:16:33,490
my thoughts and prayers and availing

309
00:16:52,430 --> 00:16:49,380
impart my apostolic blessing and we all

310
00:17:07,060 --> 00:16:52,440
would like to thank you your wholeness

311
00:17:13,900 --> 00:17:11,620
okay even ice in the happy continuation

312
00:17:31,159 --> 00:17:13,910
of the work you are done thank you very

313
00:17:33,169 --> 00:17:31,169

much bye ISS

314

00:17:39,979 --> 00:17:33,179

is used in a CR that concludes the event

315

00:17:42,289 --> 00:17:39,989

in Vatican City thank you thank you Issa

316

00:17:44,450 --> 00:17:42,299

and I see in the Vatican City I assess

317

00:17:54,369 --> 00:17:44,460

we are now resuming operational audio

318

00:18:07,190 --> 00:18:04,399

thanks all of you that again was the

319

00:18:10,580 --> 00:18:07,200

twelve members of the combined STS 134

320

00:18:16,989 --> 00:18:10,590

an expedition 27 crew talking with the

321

00:18:22,639 --> 00:18:20,119

all 12 members including a commander

322

00:18:24,769 --> 00:18:22,649

Mark Kelly and pilot Greg Johnson as

323

00:18:27,379 --> 00:18:24,779

well as mission specialists Mike Fincke

324

00:18:29,149 --> 00:18:27,389

and drew hoist tool Greg shemitah' and

325

00:18:31,820 --> 00:18:29,159

Italian mission specialist Roberto

326

00:18:33,649 --> 00:18:31,830

Vittori and on the expedition 27 crew

327

00:18:37,759 --> 00:18:33,659

side commander dmitry kondratyev

328

00:18:40,729 --> 00:18:37,769

and flight engineers Cady Coleman andrey

329

00:18:43,249 --> 00:18:40,739

borisenko alexander samokutyaev ron
