

1  
00:00:07,790 --> 00:00:06,470  
all right welcome back

2  
00:00:10,709 --> 00:00:07,800  
we got the

3  
00:00:14,549 --> 00:00:10,719  
sts-135 crew of atlantis here come on up

4  
00:00:14,559 --> 00:00:18,630  
commander chris ferguson

5  
00:00:18,640 --> 00:00:22,230  
pilot doug hurley

6  
00:00:22,240 --> 00:00:25,990  
mission specialist sandy magnus

7  
00:00:31,669 --> 00:00:28,630  
and mission specialist rex walheim

8  
00:00:35,750 --> 00:00:31,679  
commander it's all yours

9  
00:00:37,510 --> 00:00:35,760  
well hello kennedy space center it is so

10  
00:00:39,510 --> 00:00:37,520  
it is great to be here

11  
00:00:41,750 --> 00:00:39,520  
um it's great to be in sunny florida

12  
00:00:43,350 --> 00:00:41,760  
it's great to be in florida mike limebox

13  
00:00:45,590 --> 00:00:43,360

said we there was no way we could land

14

00:00:46,630 --> 00:00:45,600

in california he wouldn't let us

15

00:00:48,709 --> 00:00:46,640

um

16

00:00:51,110 --> 00:00:48,719

you know we've uh we've tried to go the

17

00:00:52,950 --> 00:00:51,120

extra mile not just uh not just right

18

00:00:54,549 --> 00:00:52,960

now not just during the flight but even

19

00:00:56,549 --> 00:00:54,559

pre-flight to

20

00:00:58,069 --> 00:00:56,559

to express our gratitude on behalf of

21

00:00:59,510 --> 00:00:58,079

our entire office for everything that

22

00:01:00,950 --> 00:00:59,520

you have done out here

23

00:01:03,349 --> 00:01:00,960

the safety that you build into these

24

00:01:05,189 --> 00:01:03,359

vehicles the care the meticulous care

25

00:01:06,630 --> 00:01:05,199

that you take of these things you know

26

00:01:08,310 --> 00:01:06,640

as soon as we got in orbit i was

27

00:01:09,990 --> 00:01:08,320

absolutely amazed everything at atlantis

28

00:01:11,590 --> 00:01:10,000

works everything looks beautiful on the

29

00:01:15,109 --> 00:01:11,600

inside

30

00:01:17,590 --> 00:01:15,119

and uh it really i hope you all believe

31

00:01:19,270 --> 00:01:17,600

that every time we go we we take we try

32

00:01:21,990 --> 00:01:19,280

to take just a little bit of every one

33

00:01:23,350 --> 00:01:22,000

of you with us um i'd like to take a

34

00:01:27,030 --> 00:01:23,360

moment and let everyone just share a

35

00:01:28,870 --> 00:01:27,040

word or two so doug

36

00:01:31,109 --> 00:01:28,880

well like chris said uh

37

00:01:33,030 --> 00:01:31,119

you know our our one landing option was

38

00:01:35,830 --> 00:01:33,040

coming to florida we you know we wanted

39

00:01:37,830 --> 00:01:35,840

to get her back to you all uh rather

40

00:01:39,910 --> 00:01:37,840

than anywhere else so we we're just so

41

00:01:41,990 --> 00:01:39,920

glad to see everybody's face here it was

42

00:01:44,550 --> 00:01:42,000

great to land on the runway and

43

00:01:46,230 --> 00:01:44,560

as folks walked up to the orbiter waving

44

00:01:48,230 --> 00:01:46,240

at us it was just it was just you know

45

00:01:50,469 --> 00:01:48,240

felt like being home again so

46

00:01:51,990 --> 00:01:50,479

uh thanks for all that you do

47

00:01:53,270 --> 00:01:52,000

all that you've done over the last 30

48

00:01:55,109 --> 00:01:53,280

plus years

49

00:01:57,990 --> 00:01:55,119

you know the astronaut office is uh

50

00:02:03,190 --> 00:01:58,000

indebted to you all uh thank you so much

51  
00:02:07,270 --> 00:02:05,510  
hey i wanted to just to let you know

52  
00:02:08,630 --> 00:02:07,280  
what utmost respect we treated this

53  
00:02:10,710 --> 00:02:08,640  
vehicle with

54  
00:02:12,790 --> 00:02:10,720  
we've seen you firsthand at how you

55  
00:02:13,670 --> 00:02:12,800  
process this vehicle and how it is your

56  
00:02:15,350 --> 00:02:13,680  
baby

57  
00:02:17,030 --> 00:02:15,360  
the space flight business really does

58  
00:02:18,630 --> 00:02:17,040  
run in our blood it runs in your blood

59  
00:02:20,070 --> 00:02:18,640  
and it runs in our blood

60  
00:02:21,270 --> 00:02:20,080  
and we try to take care of that because

61  
00:02:23,190 --> 00:02:21,280  
we always know we're bringing this back

62  
00:02:25,270 --> 00:02:23,200  
to the kennedy space center and so we

63  
00:02:27,190 --> 00:02:25,280

treat it with respect and it is clean

64

00:02:28,630 --> 00:02:27,200

and it is well cared for and we want to

65

00:02:30,309 --> 00:02:28,640

do that for you because we've done such

66

00:02:31,589 --> 00:02:30,319

a great job preparing it for us and we

67

00:02:33,190 --> 00:02:31,599

wanted to bring it back in that great

68

00:02:34,790 --> 00:02:33,200

condition so thanks for all you've done

69

00:02:36,710 --> 00:02:34,800

for us it's been an amazing adventure

70

00:02:40,309 --> 00:02:36,720

and next is mission specialist sandy

71

00:02:44,630 --> 00:02:42,630

you know what can i say you guys are

72

00:02:46,869 --> 00:02:44,640

such a special workforce there's no

73

00:02:48,949 --> 00:02:46,879

workforce like the space program

74

00:02:50,949 --> 00:02:48,959

workforce anywhere in the world

75

00:02:53,030 --> 00:02:50,959

the pride you take in your work the care

76

00:02:55,350 --> 00:02:53,040

you take in your work the dedication the

77

00:02:56,949 --> 00:02:55,360

passion you are what makes it possible

78

00:02:59,110 --> 00:02:56,959

for us to have these very challenging

79

00:03:00,630 --> 00:02:59,120

missions and succeed and we can't even

80

00:03:02,309 --> 00:03:00,640

thank you from enough from the bottom of

81

00:03:04,550 --> 00:03:02,319

our hearts for what you do i mean think

82

00:03:07,110 --> 00:03:04,560

about it you have to do

83

00:03:09,270 --> 00:03:07,120

everything right all of the time and you

84

00:03:11,589 --> 00:03:09,280

do and you make it look easy so thank

85

00:03:13,190 --> 00:03:11,599

you so much and take great pride in the

86

00:03:20,949 --> 00:03:13,200

30 years of successful missions that

87

00:03:25,910 --> 00:03:23,110

as a

88

00:03:27,830 --> 00:03:25,920

fresh off of the orbiter uh we we as the

89

00:03:29,910 --> 00:03:27,840

crew try to uh

90

00:03:32,630 --> 00:03:29,920

think of a an innovative way perhaps to

91

00:03:35,110 --> 00:03:32,640

express our our thanks uh to you and uh

92

00:03:37,910 --> 00:03:35,120

we we took this banner with us and this

93

00:03:38,789 --> 00:03:37,920

is our way of telling you that you guys

94

00:03:40,470 --> 00:03:38,799

rock

95

00:03:42,309 --> 00:03:40,480

and uh we're gonna we're gonna hold it

96

00:03:44,229 --> 00:03:42,319

up for you now hopefully uh you may have

97

00:03:45,990 --> 00:03:44,239

seen a shot or two of this on orbit

98

00:03:52,229 --> 00:03:46,000

we're gonna we're to present this ready

99

00:03:57,429 --> 00:03:53,910

we're going to present this

100

00:03:59,750 --> 00:03:57,439

perhaps to to mike or bob and as a just

101

00:04:01,030 --> 00:03:59,760

a small token of our appreciation for

102

00:04:03,190 --> 00:04:01,040

all you've done for us and all you've

103

00:04:05,589 --> 00:04:03,200

done for the orbiter thank you very much

104

00:04:07,270 --> 00:04:05,599

everybody and thank you again on behalf

105

00:04:31,670 --> 00:04:07,280

of the astronaut office and the crew for

106

00:04:31,680 --> 00:05:17,590

oh

107

00:05:17,600 --> 00:05:33,110

family

108

00:05:33,120 --> 00:06:04,830

no

109

00:06:04,840 --> 00:06:09,830

d boy you're difficult

110

00:06:09,840 --> 00:06:25,430

hey right there

111

00:06:25,440 --> 00:06:46,830

i wonder what's making this thing

112

00:06:46,840 --> 00:07:17,909

now goes

113

00:07:17,919 --> 00:07:39,909

hey

114

00:07:39,919 --> 00:07:44,469

wow

115

00:07:44,479 --> 00:08:18,469

oh
