

1
00:00:07,829 --> 00:00:06,789
okay

2
00:00:09,830 --> 00:00:07,839
houston

3
00:00:12,870 --> 00:00:09,840
station mike on two

4
00:00:15,350 --> 00:00:12,880
is that uh is that irene off our

5
00:00:20,070 --> 00:00:15,360
port side

6
00:00:22,870 --> 00:00:21,109
okay

7
00:00:25,830 --> 00:00:22,880
well we've got a good view here we know

8
00:00:28,070 --> 00:00:25,840
she's uh she's on land and

9
00:00:35,430 --> 00:00:28,080
wrecking havoc all the way up into uh

10
00:00:35,440 --> 00:00:39,990
houston copies

11
00:00:44,229 --> 00:00:42,790
and uh i'm not as well organized anymore

12
00:00:45,830 --> 00:00:44,239
there's still some of the circular

13
00:00:47,590 --> 00:00:45,840

patterns you can see the bands that are

14

00:00:49,830 --> 00:00:47,600

stretching

15

00:00:52,790 --> 00:00:49,840

way up by north

16

00:00:55,189 --> 00:00:52,800

but it's no longer a round kind of a

17

00:00:58,069 --> 00:00:55,199

dome shape that we've seen before

18

00:00:59,830 --> 00:00:58,079

but a lot of really solid dense clouds i

19

00:01:01,830 --> 00:00:59,840

know you know if i've been hearing that

20

00:01:04,549 --> 00:01:01,840

there's a lot of flooding actually a lot

21

00:01:06,870 --> 00:01:04,559

of the more serious damage may be inland

22

00:01:08,469 --> 00:01:06,880

with the flooding and rivers overflowing

23

00:01:13,830 --> 00:01:08,479

and stuff rather than coastal

24

00:01:19,429 --> 00:01:16,469

the gulf back south of here

25

00:01:21,429 --> 00:01:19,439

is uh noticeably uh muddy a lot of mud a

26

00:01:23,910 --> 00:01:21,439

lot of runoff from the uh all of the

27

00:01:26,550 --> 00:01:23,920

rains as the storm i see in the north

28

00:01:27,910 --> 00:01:26,560

carolina coast down south

29

00:01:30,149 --> 00:01:27,920

you know the gulf

30

00:01:32,390 --> 00:01:30,159

just a lot of a lot of water a lot of

31

00:01:36,950 --> 00:01:32,400

mud that you can see there all the way
