

1
00:01:26,149 --> 00:00:02,950
and just coming into view some of the

2
00:01:29,429 --> 00:01:27,590
as you can see just passing into the

3
00:01:31,670 --> 00:01:29,439
left of the view

4
00:01:33,830 --> 00:01:31,680
one of the larger plumes

5
00:01:35,990 --> 00:01:33,840
presumably from the wildfires occurring

6
00:01:38,390 --> 00:01:36,000
within the state also in view is the

7
00:01:40,630 --> 00:01:38,400
colorado river

8
00:01:42,710 --> 00:01:40,640
as you heard nasa astronaut mike fossum

9
00:01:45,590 --> 00:01:42,720
also on board and monitoring the views

10
00:01:47,670 --> 00:01:45,600
and likely gathering some images using

11
00:02:14,710 --> 00:01:47,680
the still photos still cameras on board

12
00:02:19,589 --> 00:02:16,630
the space station itself continuing on a

13
00:02:22,630 --> 00:02:19,599

northeasterly track now

14

00:02:26,710 --> 00:02:22,640

over the coast of louisiana this view

15

00:02:31,110 --> 00:02:28,710

looking back towards the state of texas

16

00:02:49,190 --> 00:02:31,120

this view from a handheld camera

17

00:02:53,030 --> 00:02:51,509

switching now to a view from the

18

00:02:54,790 --> 00:02:53,040

camera mounted on the exterior of the

19

00:02:56,790 --> 00:02:54,800

spacecraft the communications and

20

00:02:58,949 --> 00:02:56,800

tracking officer reporting

21

00:03:01,030 --> 00:02:58,959

best views from the port or left side of

22

00:03:02,390 --> 00:03:01,040

the vehicle looking back

23

00:03:05,350 --> 00:03:02,400

towards the state of texas as the

24

00:03:07,670 --> 00:03:05,360

vehicle continues to travel 17 500 miles

25

00:04:07,670 --> 00:03:07,680

per hour on a northeasterly track across

26
00:04:11,270 --> 00:04:09,670
the international space station now just

27
00:04:13,270 --> 00:04:11,280
approaching west virginia but still

28
00:04:15,429 --> 00:04:13,280
looking back towards the state of texas

29
00:04:31,990 --> 00:04:15,439
where plumes from the numerous wildfires

30
00:04:35,110 --> 00:04:33,510
fossum himself

31
00:04:37,110 --> 00:04:35,120
grew up in texas

32
00:04:38,629 --> 00:04:37,120
specifically in mcallen texas which is

33
00:04:40,390 --> 00:04:38,639
located in the southern portion of the

34
00:04:42,150 --> 00:04:40,400
state he's

35
00:04:44,070 --> 00:04:42,160
relayed several sentimental comments

36
00:04:45,510 --> 00:04:44,080
about his

37
00:04:47,749 --> 00:04:45,520
attachment to the state he's an

38
00:04:49,350 --> 00:04:47,759

extensive outdoorsman and has spent a

39

00:04:52,150 --> 00:04:49,360

lot of time backpacking and hiking

40

00:04:55,030 --> 00:04:52,160

throughout the state

41

00:04:58,230 --> 00:04:55,040

he attended mcallen high school and also

42

00:04:59,990 --> 00:04:58,240

texas a m university where he

43

00:05:03,029 --> 00:05:00,000

graduated with a bachelor's of science

44

00:05:04,870 --> 00:05:03,039

in mechanical engineering

45

00:05:06,950 --> 00:05:04,880

later he also graduated from the

46

00:05:09,189 --> 00:05:06,960

university of houston clear lake

47

00:05:10,790 --> 00:05:09,199

with a master's in physical science and

48

00:05:13,590 --> 00:05:10,800

a master's in systems engineering from

49

00:05:16,070 --> 00:05:13,600

the air force institute of technology
