

1
00:00:16,870 --> 00:00:15,509
at the kennedy space center orlando

2
00:00:19,349 --> 00:00:16,880
kennedy area and they're going to take

3
00:00:21,590 --> 00:00:19,359
over the responsibility for selecting

4
00:00:23,830 --> 00:00:21,600
and actually managing all of the

5
00:00:25,910 --> 00:00:23,840
american payloads on the international

6
00:00:27,109 --> 00:00:25,920
space station payloads and experiments

7
00:00:29,189 --> 00:00:27,119
we're putting it in the hands of a

8
00:00:31,509 --> 00:00:29,199
professional organization headed up by

9
00:00:34,229 --> 00:00:31,519
dr jeanne becker who herself is a

10
00:00:36,470 --> 00:00:34,239
principal investigator was on the team

11
00:00:38,150 --> 00:00:36,480
that discovered the salmonella vaccine

12
00:00:40,310 --> 00:00:38,160
so we're putting real scientists in

13
00:00:42,869 --> 00:00:40,320

charge of real science stuff

14

00:00:44,790 --> 00:00:42,879

we have also made significant strides in

15

00:00:45,990 --> 00:00:44,800

upgrading the ground infrastructure here

16

00:00:47,190 --> 00:00:46,000

and i'm going to let pepper and the

17

00:00:49,670 --> 00:00:47,200

other guys tell you about it but we're

18

00:00:51,430 --> 00:00:49,680

standing under i think what is probably

19

00:00:53,189 --> 00:00:51,440

the the premiere

20

00:00:54,790 --> 00:00:53,199

of the of the new structures here at the

21

00:00:55,990 --> 00:00:54,800

kennedy space center that's why we came

22

00:00:58,470 --> 00:00:56,000

here today

23

00:00:59,349 --> 00:00:58,480

this structure built by by a florida

24

00:01:00,790 --> 00:00:59,359

company

25

00:01:03,189 --> 00:01:00,800

everything you see

26

00:01:06,149 --> 00:01:03,199

around this complex involves local

27

00:01:08,149 --> 00:01:06,159

talent local uh skill and energy and and

28

00:01:10,469 --> 00:01:08,159

hopefully uh you all will talk about

29

00:01:11,670 --> 00:01:10,479

that some the space coast is open for

30

00:01:14,550 --> 00:01:11,680

business

31

00:01:16,950 --> 00:01:14,560

if any of you have any doubt about it

32

00:01:18,710 --> 00:01:16,960

while you're you know we're working

33

00:01:19,510 --> 00:01:18,720

really hard to transition our shuttle

34

00:01:21,350 --> 00:01:19,520

team

35

00:01:22,789 --> 00:01:21,360

to some of them are going to other

36

00:01:25,030 --> 00:01:22,799

industries some of them are moving to

37

00:01:27,109 --> 00:01:25,040

other places the oil and gas industry

38

00:01:29,429 --> 00:01:27,119

for example because of the the technical

39

00:01:31,109 --> 00:01:29,439

expertise that they have so so great

40

00:01:34,069 --> 00:01:31,119

things are happening bob and i are

41

00:01:36,310 --> 00:01:34,079

committed to making ksc to keeping ksc

42

00:01:39,030 --> 00:01:36,320

and the entire space coast the leader in

43

00:01:40,550 --> 00:01:39,040

the world in terms of exploration

44

00:01:42,469 --> 00:01:40,560

particularly human spaceflight and

45

00:01:44,149 --> 00:01:42,479

that's what we're going to do as i said

46

00:01:45,350 --> 00:01:44,159

all the journeys start right here i

47

00:01:47,030 --> 00:01:45,360

think the

48

00:01:48,310 --> 00:01:47,040

i cannot say enough about the ksc

49

00:01:50,630 --> 00:01:48,320

workforce

50

00:01:52,469 --> 00:01:50,640

they know their job they do it well they

51
00:01:54,310 --> 00:01:52,479
uh they're sort of like the marines that

52
00:01:56,709 --> 00:01:54,320
we used to serve with they ask no

53
00:01:58,709 --> 00:01:56,719
quarters they just take on the task that

54
00:02:00,870 --> 00:01:58,719
the american people ask them to do and

55
00:02:02,709 --> 00:02:00,880
they do it incredibly well the biggest

56
00:02:04,550 --> 00:02:02,719
change that you're going to see

57
00:02:06,789 --> 00:02:04,560
in what you see today

58
00:02:08,550 --> 00:02:06,799
in this picture is

59
00:02:09,910 --> 00:02:08,560
the footprint of this particular mobile

60
00:02:17,270 --> 00:02:09,920
launcher base is going to get a little

61
00:02:17,280 --> 00:02:47,030
we go we go in and it stops
