

1  
00:00:16,230 --> 00:00:14,950  
we have the best laboratory ever

2  
00:00:34,229 --> 00:00:16,240  
invented in the form of the

3  
00:00:34,239 --> 00:00:40,790  
new concept in how we go to space

4  
00:00:45,590 --> 00:00:43,270  
we are counting more on the u.s private

5  
00:01:36,469 --> 00:00:45,600  
industry to take over things like

6  
00:01:41,910 --> 00:01:37,830  
the space launch system the

7  
00:01:47,270 --> 00:01:44,469  
we know what we need to go beyond low

8  
00:01:49,670 --> 00:01:47,280  
earth orbit we need a big rocket to

9  
00:01:52,069 --> 00:01:49,680  
carry our cargo up there and this rocket

10  
00:01:54,469 --> 00:01:52,079  
is is the way to go do that so that we

11  
00:01:56,550 --> 00:01:54,479  
can go to the same destinations we have

12  
00:01:58,789 --> 00:01:56,560  
known that humanity has always wanted to

13  
00:01:59,749 --> 00:01:58,799

explore to an asteroid for the first

14

00:02:01,429 --> 00:01:59,759

time

15

00:02:04,230 --> 00:02:01,439

back to the moon and certainly

16

00:02:40,229 --> 00:02:04,240

ultimately to the dusty red surface of

17

00:02:45,589 --> 00:02:43,910

the future looks amazing i'm excited to

18

00:02:47,270 --> 00:02:45,599

find out what

19

00:02:54,550 --> 00:02:47,280

i can't even imagine yet this

20

00:02:57,830 --> 00:02:56,070

we've got to take these promises and

21

00:02:59,589 --> 00:02:57,840

we've got to be able to deliver now i'm
