

1  
00:00:01,800 --> 00:00:10,070  
"Hello Everyone, I'm Alex Trebek.

2  
00:00:10,070 --> 00:00:16,869  
You know, whether exploring space or solving challenges here on earth, NASA knows that

3  
00:00:16,869 --> 00:00:19,550  
we all have to work together.

4  
00:00:19,550 --> 00:00:24,730  
And that's why NASA is constantly collaborating with business, universities and Government

5  
00:00:24,730 --> 00:00:25,730  
Agencies.

6  
00:00:25,730 --> 00:00:31,349  
These partnerships are essential for scientific missions but they have also created thousands

7  
00:00:31,349 --> 00:00:35,309  
of spin offs that benefit all of us here on earth.

8  
00:00:35,309 --> 00:00:40,480  
The products and services that come from NASA technology have created tens of thousands

9  
00:00:40,480 --> 00:00:44,160  
of high tech jobs and billions of dollars in revenues.

10  
00:00:44,160 --> 00:00:49,690  
In fact, our economic growth spurred by our nation's investment in space is helping

11  
00:00:49,690 --> 00:00:55,199  
us maintain our place as the world leader

in technology and Industry.

12  
00:00:55,199 --> 00:01:00,780  
Commercial partnerships, jobs and technology  
are the answer.

13  
00:01:00,780 --> 00:01:02,839  
So what's the question?

14  
00:01:02,839 --> 00:01:07,890  
Here it is: What is NASA's investment in  
America's future?

15  
00:01:07,890 --> 00:01:11,440  
Well there's more space in your life than  
you think.
