

PABLO GOMEZ

INSTRUMENTAL ENGINEER, J-2X PROGRAM

1
00:00:19,660 --> 00:00:23,160
I was born in Columbia, South America.

2
00:00:23,160 --> 00:00:27,150
I finished high school over there, after I finished high school, I came to the United

3
00:00:27,150 --> 00:00:30,010
States to go... for college.

4
00:00:30,010 --> 00:00:35,860
After college I got married and start a family and I've been here since.

5
00:00:35,860 --> 00:00:39,610
I work on the A-2 Test Stand as a J-2X Instrumentation Engineer.

6
00:00:39,610 --> 00:00:43,970
A typical week consists of setting up for test.

7
00:00:43,970 --> 00:00:50,120
We have to set up five hundred low-speed channels and two hundred high-speed channels.

8
00:00:50,120 --> 00:00:53,309
After these channels are set up then we are Go for test.

9
00:00:53,309 --> 00:00:58,410
I would encourage my kids to work for NASA.

10
00:00:58,410 --> 00:01:03,530
It would be the third generation of working in the aerospace industry, my father-in-law

11
00:01:03,530 --> 00:01:06,750
worked for a contractor, on site.

12

00:01:06,750 --> 00:01:12,540

Family is very important to me; my father worked for a paper mill in South America,

13

00:01:12,540 --> 00:01:14,060

my mother was a stay-at-home mom.

14

00:01:14,060 --> 00:01:16,520

I have a brother and a sister.

15

00:01:16,520 --> 00:01:19,490

I'm currently married and I have three kids.

16

00:01:19,490 --> 00:01:23,770

My advice to the Hispanic youth that would like to work for NASA is to first of all stay
