

1
00:00:17,359 --> 00:00:18,509
My name is Sorita Wherry.\h

2
00:00:18,509 --> 00:00:22,939
I'm the lead systems engineer for the robotic lunar lander development project.\h

3
00:00:22,939 --> 00:00:27,699
I'm supporting the Warm Gas test article now known as the Mighty Eagle.\h

4
00:00:27,699 --> 00:00:34,079
My duties as a lead systems engineer includes making sure that I understand the system and

5
00:00:34,079 --> 00:00:42,920
functions of the Mighty Eagle as well as the most important thing is making sure that the

6
00:00:42,920 --> 00:00:46,800
vehicle is safe at all times.

7
00:00:46,800 --> 00:00:54,710
Diversity is important at NASA because it gives us a variety of backgrounds and cultures

8
00:00:54,710 --> 00:01:01,570
so that we can see the experiences, the values, the ideas and opinions of other people who

9
00:01:01,570 --> 00:01:04,540
may be different within the organization.

10
00:01:04,540 --> 00:01:06,770
I look at my career.\h

11
00:01:06,770 --> 00:01:11,370
And I look at all the things that I've accomplished, the different projects that I've worked

12
00:01:11,370 --> 00:01:18,420
on, and what better way to culminate my career
is being on the project that I'm on now

13
00:01:18,420 --> 00:01:25,040
– the Robotic Lunar Lander Development Project
and supporting the Mighty Eagle.

14
00:01:25,040 --> 00:01:28,170
I've worked at NASA for 27 years.\h

15
00:01:28,170 --> 00:01:34,990
It's a project where it feels good when
you can see things that happen.\h

16
00:01:34,990 --> 00:01:37,310
To see something that flies.\h

17
00:01:37,310 --> 00:01:44,740
To work with a team of people who are very
smart, very intelligent, and can actually

18
00:01:44,740 --> 00:01:47,820
develop something that flies.

19
00:01:47,820 --> 00:01:49,180
I love what I do.\h

20
00:01:49,180 --> 00:01:52,830
It's new to me, but it's an awesome experience.\h
