САМОУЧЕБНИК
Тема
Воспитание

1
00:00:27,760 --> 00:00:38,549
right now

2
00:00:38,559 --> 00:00:42,790
are you ready yes we are

3
00:01:08,710 --> 00:00:45,510
thank you

4
00:01:13,910 --> 00:01:11,109
um it's great we are ready to work we're

5
00:01:20,310 --> 00:01:15,749
oh we're just very excited to be here

6
00:01:24,870 --> 00:01:22,390
how was your flight here it was a good

7
00:01:29,670 --> 00:01:27,510
despite that the weather was so bad in

8
00:01:30,630 --> 00:01:29,680
moscow the flight was

9
00:01:34,789 --> 00:01:30,640
good

10
00:01:52,230 --> 00:01:34,799
well when you were flying

11
00:01:52,240 --> 00:01:58,789
and now

12
00:02:02,069 --> 00:02:00,630
try doing it

13
00:02:20,949 --> 00:02:02,079

at the same time

14

00:02:24,229 --> 00:02:22,630

another astronaut that had a similar

15

00:02:25,430 --> 00:02:24,239

background as me bill shepard who

16

00:02:27,830 --> 00:02:25,440

happened to be the commander of the

17

00:02:30,390 --> 00:02:27,840

first expedition on the space station

18

00:02:33,030 --> 00:02:30,400

was uh the person that motivated me to

19

00:02:34,470 --> 00:02:33,040

apply and become an astronaut

20

00:02:36,630 --> 00:02:34,480

well uh

21

00:02:38,550 --> 00:02:36,640

it's fantastic work we all really love

22

00:02:40,390 --> 00:02:38,560

what we do to fly in space and it's a

23

00:02:41,110 --> 00:02:40,400

really special opportunity that we get

24

00:02:43,190 --> 00:02:41,120

to

25

00:02:44,869 --> 00:02:43,200

have as individuals and we wish we could

26

00:02:47,030 --> 00:02:44,879

share the whole great experience with

27

00:02:48,790 --> 00:02:47,040

everybody that uh that love space like

28

00:02:52,390 --> 00:02:48,800

we do

29

00:02:55,750 --> 00:02:54,309

you really like

30

00:02:56,949 --> 00:02:55,760

basketball

31

00:02:59,910 --> 00:02:56,959

and

32

00:03:01,910 --> 00:02:59,920

are you planning on playing on board the

33

00:03:05,350 --> 00:03:01,920

station because we've heard that they

34

00:03:08,710 --> 00:03:05,360

actually played soccer

35

00:03:38,470 --> 00:03:11,030

we should implement it we both like

36

00:03:38,480 --> 00:03:56,390

so

37

00:04:15,830 --> 00:03:58,789

very good what a great spaceship i can't

38

00:04:15,840 --> 00:04:35,030

oh

39

00:04:35,040 --> 00:05:01,430

uh

40

00:05:01,440 --> 00:05:14,790

so

41

00:06:11,670 --> 00:05:52,710

uh

42

00:06:55,749 --> 00:06:38,150

so

43

00:06:55,759 --> 00:07:19,430

is everything all right

44

00:07:19,440 --> 00:07:42,830

all right

45

00:07:46,150 --> 00:07:44,710

what

46

00:07:49,830 --> 00:07:46,160

this one

47

00:08:07,430 --> 00:07:51,990

from the very beginning

48

00:08:37,509 --> 00:08:11,189

that's it that's it one two three four

49

00:08:43,750 --> 00:08:40,870

oh yes that's right

50

00:08:45,670 --> 00:08:43,760

well as they told us

51
00:08:47,350 --> 00:08:45,680
that's how we'll be playing planting

52
00:08:48,470 --> 00:08:47,360
them

53
00:08:51,030 --> 00:08:48,480
take each

54
00:09:19,910 --> 00:08:51,040
a tree with this shovel

55
00:09:19,920 --> 00:09:34,470
let me put some water in there hold on

56
00:09:34,480 --> 00:09:59,910
it looks good it'll grow up

57
00:09:59,920 --> 00:10:05,269
in the evening

58
00:10:09,910 --> 00:10:07,670
well come here

59
00:10:14,630 --> 00:10:09,920
when nobody's here it's quiet and finish

60
00:10:14,640 --> 00:10:18,949
right

61
00:10:21,430 --> 00:10:20,389
do we have

62
00:10:32,710 --> 00:10:21,440
a little bit

63
00:10:36,870 --> 00:10:34,710

alexander tell us

64

00:10:39,910 --> 00:10:36,880

have you been dreaming about planting a

65

00:10:53,990 --> 00:10:39,920

space tree for a while

66

00:10:54,000 --> 00:11:04,710

i don't know

67

00:11:04,720 --> 00:11:19,430

well i guess you have your experiences

68

00:11:22,069 --> 00:11:20,710

do you remember when you actually

69

00:11:39,190 --> 00:11:22,079

planted it

70

00:11:43,430 --> 00:11:41,269

so we're here at the tree planting on

71

00:11:44,550 --> 00:11:43,440

this uh famous pathway here it's really

72

00:11:46,790 --> 00:11:44,560

special to be

73

00:11:48,470 --> 00:11:46,800

here's media day absolutely

74

00:11:49,590 --> 00:11:48,480

maybe a day we're about halfway we've

75

00:11:51,829 --> 00:11:49,600

got uh

76

00:11:53,269 --> 00:11:51,839

seven days or so until launch a week

77

00:11:54,230 --> 00:11:53,279

from today we'll be waking up on launch

78

00:11:55,910 --> 00:11:54,240

day so

79

00:11:57,670 --> 00:11:55,920

it's pretty exciting and we've been

80

00:11:59,910 --> 00:11:57,680

having a good time so far yeah it's been

81

00:12:02,310 --> 00:11:59,920

great uh you know i'm here as a backup

82

00:12:03,910 --> 00:12:02,320

and uh it's been it's been fantastic to

83

00:12:09,350 --> 00:12:03,920

watch uh chris as he goes through all

84

00:12:15,030 --> 00:12:12,470

well launch it was impossible that's why

85

00:12:16,150 --> 00:12:15,040

one of those priority experiments is

86

00:12:18,389 --> 00:12:16,160

rather

87

00:12:21,269 --> 00:12:18,399

technical scientific

88

00:12:25,509 --> 00:12:21,279

but it will let us understand

89

00:12:27,910 --> 00:12:25,519

how such a big station space station

90

00:12:29,269 --> 00:12:27,920

reacts to electric

91

00:12:32,550 --> 00:12:29,279

and magnetic

92

00:12:34,470 --> 00:12:32,560

fields of the earth and atmosphere from

93

00:12:36,389 --> 00:12:34,480

the atmosphere and

94

00:12:39,590 --> 00:12:36,399

later

95

00:12:40,949 --> 00:12:39,600

we will be able to um

96

00:12:41,910 --> 00:12:40,959

create

97

00:12:43,990 --> 00:12:41,920

new

98

00:12:46,069 --> 00:12:44,000

satellites and stations better

99

00:12:48,470 --> 00:12:46,079

participate in on a daily basis they're

100

00:12:50,389 --> 00:12:48,480

ongoing and they just can continue

101
00:12:52,470 --> 00:12:50,399
themselves there are several that we

102
00:12:55,110 --> 00:12:52,480
have to participate with getting it

103
00:12:56,629 --> 00:12:55,120
activated and and then it'll the

104
00:12:57,910 --> 00:12:56,639
specialists on the ground will take care

105
00:13:00,150 --> 00:12:57,920
of those and then there are other types

106
00:13:02,310 --> 00:13:00,160
of experiments that we have an active

107
00:13:04,470 --> 00:13:02,320
part in on a particular day or a series

108
00:13:06,790 --> 00:13:04,480
of days where we're executing those

109
00:13:08,790 --> 00:13:06,800
procedures to make the science happen

110
00:13:12,629 --> 00:13:08,800
and uh there's just a

111
00:13:15,590 --> 00:13:12,639
vast array an international um

112
00:13:16,949 --> 00:13:15,600
a range array of um of experiments that

113
00:13:18,069 --> 00:13:16,959

are happening onboard the spacecraft

114

00:13:25,110 --> 00:13:18,079

can't wait to get up there and be part

115

00:13:30,470 --> 00:13:27,990

it's going to be a night launch and

116

00:13:32,470 --> 00:13:30,480

we'll have to work before and after and

117

00:13:36,150 --> 00:13:32,480

our

118

00:13:37,030 --> 00:13:36,160

medical services recommended

119

00:13:40,389 --> 00:13:37,040

that

120

00:13:41,829 --> 00:13:40,399

um well maybe one or two days is okay

121

00:13:43,350 --> 00:13:41,839

from the

122

00:13:44,230 --> 00:13:43,360

physiological

123

00:13:45,829 --> 00:13:44,240

um

124

00:13:53,269 --> 00:13:45,839

point of view but we're getting used to

125

00:13:55,509 --> 00:13:54,310

all right

126
00:14:13,750 --> 00:13:55,519
is that it

127
00:14:13,760 --> 00:14:17,670
using two now

128
00:14:17,680 --> 00:14:28,150
the speed is pretty high

129
00:14:28,160 --> 00:14:41,670
exactly

130
00:14:47,269 --> 00:14:45,590
like grandfathers right

131
00:14:50,150 --> 00:14:47,279
it's not your standard billiards table

132
00:14:51,590 --> 00:14:50,160
that we have in the united states

133
00:14:54,230 --> 00:14:51,600
the pockets are

134
00:14:55,509 --> 00:14:54,240
just barely wider than the cute ball or

135
00:15:19,990 --> 00:14:55,519
and they're all look like cue balls you

136
00:15:20,000 --> 00:15:35,509
like this

137
00:15:35,519 --> 00:15:39,990
who is this guy

138
00:15:47,910 --> 00:15:43,030

let's decide who will fly

139

00:15:47,920 --> 00:15:53,509

it's very personal natasha

140

00:15:53,519 --> 00:16:13,990

look at them playing

141

00:16:18,949 --> 00:16:16,150

so we're behind the scenes inside media

142

00:16:21,269 --> 00:16:18,959

day press day here at

143

00:16:22,790 --> 00:16:21,279

baikonur as you can see powell's doing

144

00:16:24,949 --> 00:16:22,800

his spinning chair

145

00:16:26,949 --> 00:16:24,959

and we're in the room where we'll do

146

00:16:28,470 --> 00:16:26,959

ortho stole in this spinning chair once

147

00:16:43,350 --> 00:16:28,480

a day

148

00:16:43,360 --> 00:16:55,430

we have reached this set speed
