NASA Technology Gateway

1  
00:00:10,349 --> 00:00:11,690  
My name is Eric Vitug.

2  
00:00:11,690 --> 00:00:17,520  
I'm the senior developer for office of strategic analysis, communications and business development

3  
00:00:17,520 --> 00:00:20,650  
also known as OSACB for NASA Langley Research Center.

4  
00:00:20,650 --> 00:00:22,840  
It is a fairly new organization.

5  
00:00:22,840 --> 00:00:29,990  
It functions as one of the key roles for the center that supports most of the other missions

6  
00:00:29,990 --> 00:00:33,149  
and programs for NASA Langley Research Center.

7  
00:00:33,149 --> 00:00:42,530  
As a senior developer for OSACB I mainly support the organization and all its information systems

8  
00:00:42,530 --> 00:00:47,539  
strategy and any website support.

9  
00:00:47,539 --> 00:00:54,670  
Building websites for NASA Langley Research Center, it makes me proud to contribute not

10  
00:00:54,670 --> 00:01:03,639  
only because it is my job, but the whole big picture of what NASA Langley does.

11  
00:01:03,639 --> 00:01:11,820  
That big picture is actually what gives me that hype that what I'm doing is really important.

12

00:01:11,820 --> 00:01:13,240

I'm from the Philippines.

13

00:01:13,240 --> 00:01:19,160

I was born there and grew up about half of my life there.

14

00:01:19,160 --> 00:01:25,990

I was born in that small town over there and got here back in 95. Back then my dad said,

15

00:01:25,990 --> 00:01:29,119

"take computers, take a computer course."

16

00:01:29,119 --> 00:01:31,700

That's one of the things that I've never regretted.

17

00:01:31,700 --> 00:01:32,700

It's benefited me by much.

18

00:01:32,700 --> 00:01:40,679

Coming from a small high school in the Philippines -- I never realized that I would end up working

19

00:01:40,679 --> 00:01:45,409

for NASA.
