

1  
00:00:04,150 --> 00:00:02,149  
hey i'm jaden smith

2  
00:00:06,789 --> 00:00:04,160  
our new movie after earth is about just

3  
00:00:10,150 --> 00:00:08,710  
what happens after earth evolves to a

4  
00:00:11,669 --> 00:00:10,160  
point where it's no longer fit for

5  
00:00:13,749 --> 00:00:11,679  
humans to live there

6  
00:00:15,749 --> 00:00:13,759  
at nasa right now

7  
00:00:17,510 --> 00:00:15,759  
scientists and engineers are working

8  
00:00:19,189 --> 00:00:17,520  
every day to help humans learn how to

9  
00:00:21,590 --> 00:00:19,199  
better care for our home

10  
00:00:23,590 --> 00:00:21,600  
so that we never have to leave nasa has

11  
00:00:25,269 --> 00:00:23,600  
a fleet of satellites around the planet

12  
00:00:26,790 --> 00:00:25,279  
that keeps track of climate change and

13  
00:00:29,750 --> 00:00:26,800

studies how humans are affecting the

14

00:00:31,269 --> 00:00:29,760

planet nasa has a ton of geniuses and

15

00:00:33,190 --> 00:00:31,279

all of them are working for a future

16

00:00:35,110 --> 00:00:33,200

that has a healthy earth in it like when

17

00:00:36,549 --> 00:00:35,120

nasa helped find the hole in our ozone

18

00:00:38,310 --> 00:00:36,559

layer so we could fix it before the

19

00:00:40,549 --> 00:00:38,320

problem got out of control

20

00:00:43,190 --> 00:00:40,559

nasa is doing its part we have to do

21

00:00:44,950 --> 00:00:43,200

ours this is our home to learn more
