

श्री

1
00:00:13,350 --> 00:00:11,749
okay copy that

2
00:00:14,070 --> 00:00:13,360
and so say again the hooks you wanted me

3
00:00:16,470 --> 00:00:14,080
to

4
00:00:18,710 --> 00:00:16,480
sorry wasn't it wasn't quite with you

5
00:00:20,230 --> 00:00:18,720
okay um there's a large small rhett and

6
00:00:23,109 --> 00:00:20,240
a pit pin right

7
00:00:28,830 --> 00:00:23,119
um you can pre-stage those on the crew

8
00:00:33,190 --> 00:00:31,109
yeah you're going to stow the fses in

9
00:00:35,430 --> 00:00:33,200
the bag tidy that thing up then you're

10
00:00:36,470 --> 00:00:35,440
going to get the clpa from luca

11
00:00:38,549 --> 00:00:36,480
and then we'll start going to the

12
00:00:40,630 --> 00:00:38,559
airlock taking stuff there yeah roger

13
00:00:48,549 --> 00:00:40,640

sir

14

00:00:48,559 --> 00:01:06,390

all right leaving the fsd back

15

00:01:15,270 --> 00:01:09,030

right behind you chris yep

16

00:01:20,950 --> 00:01:18,469

and operating uh very efficiently uh

17

00:01:23,190 --> 00:01:20,960

cassidy and parmitano working together

18

00:01:25,030 --> 00:01:23,200

at the three-hour 12-minute mark into

19

00:01:27,510 --> 00:01:25,040

today's spacewalk have

20

00:01:29,749 --> 00:01:27,520

released the second of the two radiator

21

00:01:32,310 --> 00:01:29,759

grapple bars this one destined for

22

00:01:34,550 --> 00:01:32,320

installation on the p1 or port 1 truss

23

00:01:37,670 --> 00:01:34,560

of the international space station

24

00:01:40,230 --> 00:01:37,680

the z1 jumper cables designed to provide

25

00:01:42,550 --> 00:01:40,240

redundancy for any uh electrical

26

00:01:44,310 --> 00:01:42,560

failures that could occur in the future

27

00:01:45,429 --> 00:01:44,320

that would take down critical station

28

00:01:47,830 --> 00:01:45,439

systems

29

00:01:50,149 --> 00:01:47,840

this is the first of two parts

30

00:01:52,870 --> 00:01:50,159

this is the fifth spacewalk of cassidy's
