

1  
00:00:08,629 --> 00:00:05,670  
a dot against uh the clouds

2  
00:00:11,430 --> 00:00:08,639  
now coming into view over uh the blue

3  
00:00:12,709 --> 00:00:11,440  
ocean of the south pacific

4  
00:00:16,230 --> 00:00:12,719  
[Music]

5  
00:00:20,070 --> 00:00:16,240  
we have a visual on the progress vehicle

6  
00:00:29,990 --> 00:00:23,429  
starboard crew quarter window

7  
00:00:36,069 --> 00:00:33,430  
and now a good view of the progress 52

8  
00:00:38,229 --> 00:00:36,079  
cargo ship the unpiloted craft that

9  
00:00:39,670 --> 00:00:38,239  
launched just five and a half hours ago

10  
00:00:42,229 --> 00:00:39,680  
from the baikonur cosmodrome in

11  
00:00:43,990 --> 00:00:42,239  
kazakhstan moved into the fast lane on

12  
00:00:45,990 --> 00:00:44,000  
the highway to the international space

13  
00:00:49,350 --> 00:00:46,000

station and now

14

00:00:51,350 --> 00:00:49,360

is sitting passively about 190 meters or

15

00:00:53,910 --> 00:00:51,360

so away from the piers docking

16

00:00:55,910 --> 00:00:53,920

compartment docking port with the

17

00:00:58,630 --> 00:00:55,920

resumption of final approach

18

00:01:01,349 --> 00:00:58,640

for contact and capture expected just

19

00:01:04,070 --> 00:01:01,359

minutes from now

20

00:01:05,170 --> 00:01:04,080

but the sun is shining from

21

00:01:06,310 --> 00:01:05,180

the side

22

00:01:07,670 --> 00:01:06,320

[Music]

23

00:01:09,190 --> 00:01:07,680

but i do see

24

00:01:10,870 --> 00:01:09,200

the station

25

00:01:12,310 --> 00:01:10,880

17

26

00:01:15,350 --> 00:01:12,320

range

27

00:01:19,030 --> 00:01:15,360

[Music]

28

00:01:24,789 --> 00:01:19,040

actually can you switch agc mode to

29

00:01:28,469 --> 00:01:26,630

moving in at a rate of about four tenths

30

00:01:32,430 --> 00:01:28,479

of a meter per second everything is in

31

00:01:36,230 --> 00:01:32,440

excellent shape on the unpiloted craft

32

00:01:41,030 --> 00:01:38,870

so far so good for the progress 52 on

33

00:01:42,550 --> 00:01:41,040

its automated approach for docking to

34

00:01:50,220 --> 00:01:42,560

the piers dock and compartment of the

35

00:01:50,230 --> 00:01:54,550

[Music]

36

00:01:59,510 --> 00:01:57,270

the docking occurring right at the split

37

00:02:01,510 --> 00:01:59,520

second it was planned to after a

38

00:02:03,910 --> 00:02:01,520

flawless

39

00:02:06,469 --> 00:02:03,920

five-hour 45-minute venture from the

40

00:02:07,830 --> 00:02:06,479

launch pad at the baikonur cosmodrome in

41

00:02:09,910 --> 00:02:07,840

kazakhstan

42

00:02:12,630 --> 00:02:09,920

to the international space station

43

00:02:13,589 --> 00:02:12,640

docking occurring at 9 26 p.m central

44

00:02:15,750 --> 00:02:13,599

time

45

00:02:17,830 --> 00:02:15,760

what did he say

46

00:02:19,270 --> 00:02:17,840

over the south pacific as the

47

00:02:22,229 --> 00:02:19,280

international space station and the
