GRAVITY

NASA

CAPT. COLEMAN

1

00:00:06,560 --> 00:00:10,810

While onboard the International Space Station,
NASA astronaut Cady Coleman provided some

2

00:00:10,810 --> 00:00:15,320

insight about life in space to actress Sandra
Bullock – who was prepping for her role

3

00:00:15,320 --> 00:00:17,490

as an astronaut in the new movie Gravity.

4

00:00:17,490 --> 00:00:22,240

“My recollection is, you asked about how
we move up there, to get from place to place

5

00:00:22,240 --> 00:00:23,240

you fly.”

6

00:00:23,240 --> 00:00:26,270

“The thing that resonated the most was you
said something about, your hair – you could

7

00:00:26,270 --> 00:00:31,400

take one strand of hair and push off the wall
with that hair and it would propel you backwards.”

8

00:00:31,400 --> 00:00:35,060

“And I had bigger hair up there than the
guys, so it worked a little bit better for

9

00:00:35,060 --> 00:00:43,110

me and I let it grow because I wanted it to
scream, zero-g – there is a woman in space

10

00:00:43,110 --> 00:00:44,190

– for these girls.”

11

00:00:44,190 --> 00:00:45,190

“It did!”

12
00:00:45,190 --> 00:00:50,220
Being inspired to reach new heights, for Bullock
at least probably won't include a trip to

13
00:00:50,220 --> 00:00:51,350
space.

14
00:00:51,350 --> 00:00:53,420
"No ... no desire."

15
00:00:53,420 --> 00:00:58,120
All these things in your movie, the space
debris, fire, they are real things that we

16
00:00:58,120 --> 00:01:01,760
think about but we're addressing all those
– we're doing this kind of research and
