

1
00:00:06,789 --> 00:00:03,030
station this is houston are you ready

2
00:00:11,030 --> 00:00:09,270
we are ready for the event

3
00:00:13,910 --> 00:00:11,040
the weather channel this is mission

4
00:00:14,910 --> 00:00:13,920
control houston please call station for

5
00:00:17,590 --> 00:00:14,920
a voice

6
00:00:19,830 --> 00:00:17,600
check 2014

7
00:00:23,990 --> 00:00:19,840
station this is the weather channel how

8
00:00:28,070 --> 00:00:25,990
hello i have you loud and clear welcome

9
00:00:28,830 --> 00:00:28,080
to the international space station

10
00:00:34,069 --> 00:00:28,840
a

11
00:00:35,350 --> 00:00:34,079
you guys this morning

12
00:00:38,389 --> 00:00:35,360
um

13
00:00:39,190 --> 00:00:38,399

we're very excited to have you and going

14

00:00:44,310 --> 00:00:39,200

we

15

00:00:45,910 --> 00:00:44,320

excited you can join us

16

00:00:47,910 --> 00:00:45,920

yes so we are right now we're in the

17

00:00:49,910 --> 00:00:47,920

middle of a commercial break and we're

18

00:00:53,910 --> 00:00:49,920

gonna come out and uh

19

00:00:56,470 --> 00:00:53,920

be with you in about uh five minutes

20

00:00:57,670 --> 00:00:56,480

and then we will be completed uh with

21

00:01:02,310 --> 00:00:57,680

our interview

22

00:01:04,710 --> 00:01:02,320

is uh 25 after which is nine minutes

23

00:01:07,750 --> 00:01:04,720

from now so we will adhere to our times

24

00:01:07,760 --> 00:01:10,950

copy all

25

00:01:14,469 --> 00:01:12,469

well i guess you're the brains of this

26

00:01:15,990 --> 00:01:14,479

operation so just to give you guys a

27

00:01:17,590 --> 00:01:16,000

review of some of the questions we have

28

00:01:19,510 --> 00:01:17,600

in store here

29

00:01:21,350 --> 00:01:19,520

first

30

00:01:23,429 --> 00:01:21,360

karen we have

31

00:01:25,830 --> 00:01:23,439

lots of photos that you've taken and

32

00:01:27,350 --> 00:01:25,840

we've strung a bunch of them together so

33

00:01:28,710 --> 00:01:27,360

we're just going to ask you

34

00:01:30,550 --> 00:01:28,720

talk about what captures your

35

00:01:33,190 --> 00:01:30,560

imagination from space as you take these

36

00:01:34,710 --> 00:01:33,200

photos and just kind of talk about those

37

00:01:36,550 --> 00:01:34,720

and then we are going to follow up since

38

00:01:38,630 --> 00:01:36,560

you are the weather channel we do have a

39

00:01:41,190 --> 00:01:38,640

couple images you snap from hurricane

40

00:01:42,950 --> 00:01:41,200

raymond a couple weeks ago over mexico

41

00:01:44,389 --> 00:01:42,960

so uh you know we're just curious as

42

00:01:47,270 --> 00:01:44,399

you're seeing

43

00:01:49,670 --> 00:01:47,280

dangerous weather un

44

00:01:51,429 --> 00:01:49,680

unraveling from space what uh you know

45

00:01:53,270 --> 00:01:51,439

what are you thinking and

46

00:01:54,710 --> 00:01:53,280

are your thoughts of people or or

47

00:01:56,389 --> 00:01:54,720

whatever so we're going to ask you guys

48

00:01:57,830 --> 00:01:56,399

that and then we're going to turn to a

49

00:02:00,149 --> 00:01:57,840

mike hopkins and mike we're going to

50

00:02:01,510 --> 00:02:00,159

talk about your special facebook page

51
00:02:02,709 --> 00:02:01,520
encouraging people to train like

52
00:02:04,950 --> 00:02:02,719
astronauts

53
00:02:06,789 --> 00:02:04,960
and we do have a couple photographs

54
00:02:08,630 --> 00:02:06,799
from the website

55
00:02:10,790 --> 00:02:08,640
that we have so you can talk about what

56
00:02:12,550 --> 00:02:10,800
that involves and then we want to wrap

57
00:02:14,309 --> 00:02:12,560
up with a question about the olympic

58
00:02:17,030 --> 00:02:14,319
torch which is going to be with you guys

59
00:02:20,550 --> 00:02:17,040
in about two days uh we do have video of

60
00:02:21,830 --> 00:02:20,560
the russian rocket we got today from

61
00:02:23,030 --> 00:02:21,840
uh which is gonna be launching into

62
00:02:24,229 --> 00:02:23,040
space so

63
00:02:25,350 --> 00:02:24,239

um that's what we're gonna be talking

64

00:02:27,830 --> 00:02:25,360

over

65

00:03:52,869 --> 00:02:27,840

i'm calling call now to request your

66

00:03:56,070 --> 00:03:54,550

we're up in about uh two minutes about

67

00:03:57,270 --> 00:03:56,080

two minutes back

68

00:04:35,510 --> 00:03:57,280

and you'll be

69

00:04:50,870 --> 00:04:37,270

that's a lot i don't think five seconds

70

00:04:53,830 --> 00:04:52,550

it is 20 minutes past the hour time now

71

00:04:55,590 --> 00:04:53,840

for a check on the winter weather in

72

00:04:57,110 --> 00:04:55,600

store for the planes that's right that

73

00:04:58,230 --> 00:04:57,120

means it's time for the man tom nizzle

74

00:04:59,909 --> 00:04:58,240

with the very latest in the weather

75

00:05:01,590 --> 00:04:59,919

weather situation in terms of winter

76
00:05:03,430 --> 00:05:01,600
what's happening big guy well we can all

77
00:05:05,270 --> 00:05:03,440
right about one minute back

78
00:05:07,270 --> 00:05:05,280
nebraska and we've picked up a couple of

79
00:05:09,029 --> 00:05:07,280
webcams here to show the snow cover

80
00:05:11,909 --> 00:05:09,039
really starting to accumulate on the

81
00:05:13,749 --> 00:05:11,919
grassy surfaces and this is i-80 and on

82
00:05:15,110 --> 00:05:13,759
i-80 you can even see on the roadways

83
00:05:17,270 --> 00:05:15,120
right now that we're beginning to get

84
00:05:18,469 --> 00:05:17,280
slush covered as that snowfall rate

85
00:05:20,230 --> 00:05:18,479
increases throughout the rest of the

86
00:05:21,990 --> 00:05:20,240
morning here even these main roads are

87
00:05:23,430 --> 00:05:22,000
going to have some problems so let's go

88
00:05:25,430 --> 00:05:23,440

back and take a look at the radar right

89

00:05:27,270 --> 00:05:25,440

now and on our radar image the webcam

90

00:05:29,110 --> 00:05:27,280

was right here right around sydney but

91

00:05:31,590 --> 00:05:29,120

you can see how this snow is continuing

92

00:05:33,909 --> 00:05:31,600

to move northeastward here as that cold

93

00:05:35,990 --> 00:05:33,919

air filters in behind the system changes

94

00:05:37,350 --> 00:05:36,000

the precipitation over the snowfall as

95

00:05:39,430 --> 00:05:37,360

we continue throughout the day here

96

00:05:41,590 --> 00:05:39,440

we're going to continue to see that snow

97

00:05:43,350 --> 00:05:41,600

move eastward this is our computer model

98

00:05:45,029 --> 00:05:43,360

showing it moving through north platte

99

00:05:47,029 --> 00:05:45,039

and then as the afternoon progresses

100

00:05:48,790 --> 00:05:47,039

here into the evening rush around

101
00:05:50,870 --> 00:05:48,800
minneapolis that snow is going to

102
00:05:52,870 --> 00:05:50,880
increase in earnest across that area if

103
00:05:54,950 --> 00:05:52,880
you have anything to do in minneapolis

104
00:05:57,590 --> 00:05:54,960
this afternoon 30 seconds earlier in the

105
00:05:59,270 --> 00:05:57,600
afternoon by that rush hour time frame

106
00:06:01,029 --> 00:05:59,280
things are going to get messy there as

107
00:06:03,110 --> 00:06:01,039
quickly as it comes in though it comes

108
00:06:05,270 --> 00:06:03,120
out of that area overnight transfers up

109
00:06:07,270 --> 00:06:05,280
to the up michigan and the snow event

110
00:06:09,590 --> 00:06:07,280
will be over for example the uh

111
00:06:11,189 --> 00:06:09,600
midwestern plains total snowfall in here

112
00:06:13,110 --> 00:06:11,199
about five to eight inches i'm looking

113
00:06:14,870 --> 00:06:13,120

more on the five inch end right now

114

00:06:17,029 --> 00:06:14,880

across nebraska we'll have more

115

00:06:19,189 --> 00:06:17,039

information on this on our later segment

116

00:06:21,270 --> 00:06:19,199

send it back to you guys okay that is

117

00:06:22,469 --> 00:06:21,280

nice and chilly forecast very cool you

118

00:06:24,550 --> 00:06:22,479

know and speaking of something else

119

00:06:26,550 --> 00:06:24,560

that's cool we got it for you right now

120

00:06:28,629 --> 00:06:26,560

it is an out of this world view of our

121

00:06:30,150 --> 00:06:28,639

planet and a conversation too joining us

122

00:06:32,550 --> 00:06:30,160

live from the international space

123

00:06:34,710 --> 00:06:32,560

station are astronauts karen nyberg and

124

00:06:36,469 --> 00:06:34,720

mike hopkins guys thanks so much for

125

00:06:37,270 --> 00:06:36,479

being here so cool to have you on the

126
00:06:38,870 --> 00:06:37,280
show

127
00:06:40,230 --> 00:06:38,880
and karen let's start with you we know

128
00:06:43,510 --> 00:06:40,240
that we've captured that you've captured

129
00:06:52,150 --> 00:06:43,520
some incredible images from out in space

130
00:06:55,430 --> 00:06:53,670
and we do have a little bit of delay as

131
00:06:57,029 --> 00:06:55,440
you can imagine going up into space

132
00:06:57,830 --> 00:06:57,039
karen if you can hear us we've got some

133
00:06:59,670 --> 00:06:57,840
of the

134
00:07:01,670 --> 00:06:59,680
the tremendous images that you're able

135
00:07:03,350 --> 00:07:01,680
to capture from the space station what

136
00:07:07,990 --> 00:07:03,360
peaks your curiosity and your

137
00:07:11,589 --> 00:07:09,990
well mostly my goal when i got here and

138
00:07:13,430 --> 00:07:11,599

when i you know the first time i saw the

139

00:07:16,070 --> 00:07:13,440

earth from outer from space was on my

140

00:07:18,469 --> 00:07:16,080

shuttle flight in 2008 and i just really

141

00:07:20,150 --> 00:07:18,479

wanted to try and share that view as

142

00:07:22,230 --> 00:07:20,160

much as i could

143

00:07:24,230 --> 00:07:22,240

and also save the memories for myself

144

00:07:26,710 --> 00:07:24,240

and what i've done is tried to use a

145

00:07:28,309 --> 00:07:26,720

lens that shows exactly what it looks

146

00:07:30,950 --> 00:07:28,319

like to us when we are looking out the

147

00:07:32,629 --> 00:07:30,960

window and really grab the colors and

148

00:07:35,029 --> 00:07:32,639

the textures and that sort of thing that

149

00:07:37,189 --> 00:07:35,039

we see from here and so like i said to

150

00:07:39,270 --> 00:07:37,199

save it for myself for the future when

151
00:07:40,629 --> 00:07:39,280
i've maybe forgotten in my mind what it

152
00:07:42,230 --> 00:07:40,639
really looks like i can look at these

153
00:07:44,070 --> 00:07:42,240
pictures and then also to share with all

154
00:07:45,749 --> 00:07:44,080
the other people in the in the world

155
00:07:48,710 --> 00:07:45,759
that don't get to the opportunity to see

156
00:07:52,629 --> 00:07:50,710
you know karen perspective is everything

157
00:07:54,230 --> 00:07:52,639
and when you are way up in orbit you're

158
00:07:56,150 --> 00:07:54,240
looking down and you see things like

159
00:07:58,070 --> 00:07:56,160
some of the images you have of hurricane

160
00:08:03,110 --> 00:07:58,080
raymond what goes from what goes through

161
00:08:06,070 --> 00:08:04,869
it's it's an interesting question

162
00:08:08,309 --> 00:08:06,080
because

163
00:08:10,230 --> 00:08:08,319

everything is so beautiful even the

164

00:08:12,550 --> 00:08:10,240

storms there's one particular image i

165

00:08:14,629 --> 00:08:12,560

took of some storms over ghana and i

166

00:08:16,950 --> 00:08:14,639

have a very good friend from ghana and

167

00:08:18,950 --> 00:08:16,960

so at the time i'm looking at it and you

168

00:08:21,110 --> 00:08:18,960

could see the height of the clouds and

169

00:08:23,189 --> 00:08:21,120

it was just so beautiful but then you

170

00:08:25,749 --> 00:08:23,199

realize and you think about it and and

171

00:08:27,830 --> 00:08:25,759

having that that contact or that you

172

00:08:29,990 --> 00:08:27,840

know knowing somebody that is from there

173

00:08:31,430 --> 00:08:30,000

just made it made it very special and

174

00:08:33,589 --> 00:08:31,440

made you think about what really is

175

00:08:35,350 --> 00:08:33,599

happening underneath there and for the

176

00:08:36,709 --> 00:08:35,360

hurricane actually at the time i hadn't

177

00:08:38,790 --> 00:08:36,719

seen the news for a while and i didn't

178

00:08:40,709 --> 00:08:38,800

know there was a hurricane in that area

179

00:08:43,110 --> 00:08:40,719

and so after i snapped those pictures of

180

00:08:44,790 --> 00:08:43,120

hurricane raymond i went and got online

181

00:08:48,710 --> 00:08:44,800

and looked and saw that sure enough

182

00:08:52,150 --> 00:08:50,550

now mike i want to ask you about your

183

00:08:53,509 --> 00:08:52,160

facebook page

184

00:08:59,110 --> 00:08:53,519

you encourage people to train like

185

00:09:02,710 --> 00:09:01,269

well i think the big thing is for us

186

00:09:05,190 --> 00:09:02,720

physical fitness is a very important

187

00:09:07,110 --> 00:09:05,200

part of our day of in our lives up here

188

00:09:08,710 --> 00:09:07,120

we end up it's so important that they

189

00:09:10,710 --> 00:09:08,720

put it on our schedule for at least a

190

00:09:12,310 --> 00:09:10,720

couple hours a day and that's because

191

00:09:14,470 --> 00:09:12,320

there's a lot of negative effects of

192

00:09:16,230 --> 00:09:14,480

life in microgravity we end up losing

193

00:09:17,829 --> 00:09:16,240

muscle mass we end up

194

00:09:19,509 --> 00:09:17,839

having our bones get weaker and so we

195

00:09:21,670 --> 00:09:19,519

need to make sure that we're exercising

196

00:09:23,430 --> 00:09:21,680

to help counteract that but that's also

197

00:09:25,430 --> 00:09:23,440

important for people on the earth and so

198

00:09:27,110 --> 00:09:25,440

my goal with uh with all of the train

199

00:09:29,910 --> 00:09:27,120

like an astronaut or being a part of

200

00:09:32,550 --> 00:09:29,920

that was to was to encourage people to

201
00:09:33,590 --> 00:09:32,560
get out and exercise and stay fit

202
00:09:37,990 --> 00:09:33,600
because

203
00:09:40,470 --> 00:09:38,000
here and life on earth i hate to cut you

204
00:09:42,389 --> 00:09:40,480
off in space but we have a hard break

205
00:09:44,230 --> 00:09:42,399
mike and karen thank you so much for

206
00:09:45,990 --> 00:09:44,240
joining us from the space station very

207
00:09:47,670 --> 00:09:46,000
cool

208
00:09:53,509 --> 00:09:47,680
that was awesome guys thank you so much

209
00:09:57,030 --> 00:09:55,430
station this is houston acr that

210
00:09:59,430 --> 00:09:57,040
concludes the weather channel portion of

211
00:10:03,990 --> 00:09:59,440
the event please stand by for a voice

212
00:10:11,829 --> 00:10:08,230
station this is ksdk tv how do you hear

213
00:10:16,630 --> 00:10:13,990

and we hear you loud and clear welcome

214

00:10:19,990 --> 00:10:16,640

to the international space station

215

00:10:22,150 --> 00:10:20,000

okay it is an honor mike since you're

216

00:10:25,030 --> 00:10:22,160

holding the microphone and you're from

217

00:10:30,230 --> 00:10:25,040

missouri i'll start with you how's your

218

00:10:35,030 --> 00:10:32,550

it's going absolutely fantastic better

219

00:10:37,430 --> 00:10:35,040

than i could have hoped for so far and

220

00:10:40,069 --> 00:10:37,440

i'm absolutely just enjoying everything

221

00:10:42,389 --> 00:10:40,079

about it and i've got great crewmates up

222

00:10:45,030 --> 00:10:42,399

here to spend the time with as well

223

00:10:49,350 --> 00:10:45,040

and in layman's terms mike what are you

224

00:10:53,030 --> 00:10:50,949

well we're actually doing quite a bit

225

00:10:55,269 --> 00:10:53,040

when i first showed up we had a visiting

226

00:10:57,750 --> 00:10:55,279

vehicle show up with supplies for us and

227

00:10:59,350 --> 00:10:57,760

so karen and luca had to capture that

228

00:11:01,110 --> 00:10:59,360

and then there was a lot of unloading

229

00:11:02,470 --> 00:11:01,120

and reloading uh some of our trash to

230

00:11:04,550 --> 00:11:02,480

put on that and then we're doing a lot

231

00:11:06,790 --> 00:11:04,560

of science there's going to be over 200

232

00:11:08,790 --> 00:11:06,800

experiments being performed over the

233

00:11:10,389 --> 00:11:08,800

course of the mission and so a lot of

234

00:11:11,990 --> 00:11:10,399

our days are spent executing that

235

00:11:14,150 --> 00:11:12,000

science and then there's normal

236

00:11:16,069 --> 00:11:14,160

maintenance the station is very much

237

00:11:17,990 --> 00:11:16,079

like a house and things break and things

238

00:11:20,310 --> 00:11:18,000

need routine maintenance and so we spend

239

00:11:22,150 --> 00:11:20,320

a lot of time doing that as well okay

240

00:11:24,710 --> 00:11:22,160

mike i have two more questions for you

241

00:11:27,269 --> 00:11:24,720

but let me ask karen a question now

242

00:11:29,829 --> 00:11:27,279

karen i read you consulted sandra

243

00:11:33,750 --> 00:11:29,839

bullock for the movie gravity tell me

244

00:11:37,509 --> 00:11:35,750

actually that was uh katie coleman who

245

00:11:39,509 --> 00:11:37,519

actually who flew uh here on space

246

00:11:40,949 --> 00:11:39,519

station a couple years ago and i believe

247

00:11:42,550 --> 00:11:40,959

she actually talked to sandra bullock

248

00:11:44,870 --> 00:11:42,560

when she was on board

249

00:11:47,190 --> 00:11:44,880

and she gave her some tips on how to

250

00:11:48,630 --> 00:11:47,200

move around in space the kind of effort

251

00:11:51,190 --> 00:11:48,640

that it takes to move and one of the

252

00:11:54,310 --> 00:11:51,200

things she had told her was how little

253

00:11:56,550 --> 00:11:54,320

effort it takes to move from one wall to

254

00:11:59,430 --> 00:11:56,560

the next and she said that you can use

255

00:12:01,350 --> 00:11:59,440

one single strand of hair to do that and

256

00:12:03,190 --> 00:12:01,360

so when katie told me that that she had

257

00:12:06,069 --> 00:12:03,200

talked to sandra bullock about that i

258

00:12:08,230 --> 00:12:06,079

decided to try it and actually made a

259

00:12:09,670 --> 00:12:08,240

video demonstrating just what little

260

00:12:12,310 --> 00:12:09,680

effort is required to move around

261

00:12:14,629 --> 00:12:12,320

without gravity oh i see forgive me i'm

262

00:12:16,710 --> 00:12:14,639

sorry about that karen karen could you

263

00:12:18,710 --> 00:12:16,720

talk about this olympic torch thing

264

00:12:25,030 --> 00:12:18,720

everyone keeps asking me how will the

265

00:12:27,829 --> 00:12:26,389

actually that's a good question i

266

00:12:29,590 --> 00:12:27,839

honestly don't know i have not

267

00:12:31,509 --> 00:12:29,600

personally seen the torch yet we'll see

268

00:12:32,949 --> 00:12:31,519

it here in a couple days i think it's

269

00:12:33,910 --> 00:12:32,959

pretty exciting though because i think

270

00:12:38,310 --> 00:12:33,920

what

271

00:12:40,310 --> 00:12:38,320

showing is tremendous international

272

00:12:43,990 --> 00:12:40,320

cooperation that is very similar to what

273

00:12:46,389 --> 00:12:44,000

we see in the olympics it's just

274

00:12:48,629 --> 00:12:46,399

people getting along competing in a very

275

00:12:50,629 --> 00:12:48,639

friendly way we built this international

276

00:12:52,230 --> 00:12:50,639

space station it's pretty remarkable

277

00:12:54,230 --> 00:12:52,240

what we were able to do on an

278

00:12:55,269 --> 00:12:54,240

international level

279

00:12:57,590 --> 00:12:55,279

and

280

00:12:59,990 --> 00:12:57,600

mike my next question's for you

281

00:13:01,829 --> 00:13:00,000

mike and karen we're all so proud of

282

00:13:04,230 --> 00:13:01,839

both of you but mike you're from

283

00:13:05,990 --> 00:13:04,240

missouri what would you say to a young

284

00:13:07,750 --> 00:13:06,000

boy or a girl who would like to be an

285

00:13:12,470 --> 00:13:07,760

astronaut what's the one thing they

286

00:13:16,870 --> 00:13:14,629

well first of all anything's possible

287

00:13:18,629 --> 00:13:16,880

certainly and the thing that anybody

288

00:13:20,629 --> 00:13:18,639

needs to do is find something that they

289

00:13:23,910 --> 00:13:20,639

love that they're passionate about

290

00:13:25,430 --> 00:13:23,920

and you follow that and if things are

291

00:13:26,949 --> 00:13:25,440

going to work out with being an

292

00:13:28,069 --> 00:13:26,959

astronaut then they'll work out but if

293

00:13:29,430 --> 00:13:28,079

they don't

294

00:13:31,110 --> 00:13:29,440

you still have something that you're

295

00:13:32,790 --> 00:13:31,120

doing that that you absolutely are

296

00:13:35,430 --> 00:13:32,800

passionate about

297

00:13:36,790 --> 00:13:35,440

and if you had to pick one thing mike i

298

00:13:39,110 --> 00:13:36,800

know your folks are still here in

299

00:13:41,269 --> 00:13:39,120

missouri what thing do you really miss

300

00:13:46,550 --> 00:13:41,279

about missouri what something people

301

00:13:49,750 --> 00:13:48,230

you know what it is the people that i

302

00:13:51,670 --> 00:13:49,760

miss the most about missouri there's

303

00:13:53,990 --> 00:13:51,680

something special about uh about

304

00:13:56,150 --> 00:13:54,000

everyone there i came from a small town

305

00:13:58,310 --> 00:13:56,160

in missouri and everyone's just so

306

00:14:00,949 --> 00:13:58,320

friendly it's such a tight community

307

00:14:02,550 --> 00:14:00,959

and uh and so you know you miss you miss

308

00:14:05,110 --> 00:14:02,560

that piece up here we're a very small

309

00:14:08,069 --> 00:14:05,120

community as well up here uh but we also

310

00:14:10,389 --> 00:14:08,079

have our ground teams but i certainly i

311

00:14:11,750 --> 00:14:10,399

certainly miss the folks in missouri

312

00:14:14,230 --> 00:14:11,760

mike you're not going to believe this

313

00:14:16,949 --> 00:14:14,240

this isn't my first time seeing you

314

00:14:19,829 --> 00:14:16,959

i was at a u of i southern illinois

315

00:14:23,750 --> 00:14:19,839

football game in 1990 when you beat the

316

00:14:25,110 --> 00:14:23,760

salukis 56 to 21. little did i know

317

00:14:27,430 --> 00:14:25,120

looking down on the field one of the

318

00:14:29,350 --> 00:14:27,440

defensive backs for the illini would be

319

00:14:32,949 --> 00:14:29,360

floating in space this is pretty heavy

320

00:14:36,710 --> 00:14:34,710

yeah that was uh those were some great

321

00:14:38,150 --> 00:14:36,720

times back at the university of illinois

322

00:14:40,230 --> 00:14:38,160

playing football in fact that was a big

323

00:14:42,230 --> 00:14:40,240

day for howard griffith as well he he

324

00:14:45,269 --> 00:14:42,240

set the ncaa record for touchdowns in a

325

00:14:47,910 --> 00:14:45,279

single game that game i remember i saw

326

00:14:49,750 --> 00:14:47,920

him at cams later that night but i'm

327

00:14:52,310 --> 00:14:49,760

sure you weren't at cams you were

328

00:14:53,910 --> 00:14:52,320

probably studying or something um

329

00:14:56,470 --> 00:14:53,920

listen you guys i know your time's

330

00:14:59,030 --> 00:14:56,480

absolutely you're we're so proud of both

331

00:15:01,030 --> 00:14:59,040

of you hey just for a special favor

332

00:15:03,269 --> 00:15:01,040

could could i ask both of you guys to

333

00:15:05,269 --> 00:15:03,279

just hold out your hand showing all five

334

00:15:07,990 --> 00:15:05,279

fingers and then holding up your index

335

00:15:18,150 --> 00:15:08,000

finger it's like our station thing five

336

00:15:22,949 --> 00:15:20,629

that is great that is great well god

337

00:15:25,189 --> 00:15:22,959

bless you guys i know mike you come back

338

00:15:26,949 --> 00:15:25,199

in march i believe and karen i i'm not

339

00:15:28,710 --> 00:15:26,959

sure about when your mission ends but

340

00:15:33,030 --> 00:15:28,720

god bless you this has been a real honor

341

00:15:36,790 --> 00:15:34,550

well thank you very much certainly

342

00:15:40,790 --> 00:15:36,800

enjoyed talking to you and also it's

343

00:15:40,800 --> 00:15:44,389

all right great
