1
00:00:06,150 --> 00:00:01,829
right now the hooks holding the vehicle

2
00:00:13,830 --> 00:00:07,749
should have physical separation in just

3
00:00:18,230 --> 00:00:15,589
this view again a camera on board the

4
00:00:48,790 --> 00:00:18,240
soyuz craft pointing at the poisk module

5
00:00:55,189 --> 00:00:52,229
and physical separation confirmed

6
00:00:57,029 --> 00:00:55,199
confirmed at 702 pm central time held

7
00:00:58,630 --> 00:00:57,039
the station in the crowd so use craft

8
00:01:01,110 --> 00:00:58,640
which is now no longer attached we're

9
00:01:04,789 --> 00:01:01,120
flying about 261 statute miles over

10
00:01:09,750 --> 00:01:08,070
a smooth separation

11
00:01:21,109 --> 00:01:09,760
cutting

12
00:01:21,119 --> 00:01:38,310
morning

13
00:01:42,389 --> 00:01:40,550

again separation confirmed on this

14

00:01:45,270 --> 00:01:42,399

camera view if you look in the lower

15

00:01:47,990 --> 00:01:45,280

left corner that bottom number is the uh

16

00:01:49,270 --> 00:01:48,000

rate of departure

17

00:02:00,069 --> 00:01:49,280

as you can see just a little over a

18

00:02:04,709 --> 00:02:03,510

voice module coming into view

19

00:02:06,950 --> 00:02:04,719

along with much of the rest of the

20

00:02:09,270 --> 00:02:06,960

russian segment

21

00:02:21,750 --> 00:02:09,280

physical separation confirmed just about

22

00:02:25,030 --> 00:02:23,750

now just about a minute or so away from

23

00:02:26,630 --> 00:02:25,040

the next step which will be the

24

00:02:28,550 --> 00:02:26,640

separation burn

25

00:02:30,790 --> 00:02:28,560

in which thrusters on board the soyuz

26

00:02:33,190 --> 00:02:30,800

will fire for about 15 seconds to

27

00:02:35,350 --> 00:02:33,200

increase the rate of departure from the

28

00:02:51,030 --> 00:02:35,360

station for the craft by a little over
