1
00:00:06,070 --> 00:00:03,189
okay let us start our press conference

2
00:00:06,869 --> 00:00:06,080
20 minutes ago there was the meeting of

3
00:00:07,990 --> 00:00:06,879
the

4
00:00:12,390 --> 00:00:08,000
inter

5
00:00:16,070 --> 00:00:13,830
was reviewing the composition of the

6
00:00:18,950 --> 00:00:16,080
prime and the backup crew of increment

7
00:00:23,029 --> 00:00:21,029
and preliminarily the composition of

8
00:00:25,429 --> 00:00:23,039
these crews

9
00:00:28,150 --> 00:00:25,439
was approved

10
00:00:29,669 --> 00:00:28,160
and the crews are currently preparing

11
00:00:32,229 --> 00:00:29,679
for their

12
00:00:34,069 --> 00:00:32,239
flight here and in baikonur so the

13
00:00:35,110 --> 00:00:34,079

composition of the prime crew is the

14

00:00:39,430 --> 00:00:35,120

following

15

00:00:48,709 --> 00:00:39,440

maxim survive soyuz commander

16

00:00:54,310 --> 00:00:50,950

and soyuz flight engineer nasa united

17

00:00:57,430 --> 00:00:54,320

states and alexander girds

18

00:01:00,229 --> 00:00:57,440

soyuz flight engineer 2 and iss

19

00:01:02,709 --> 00:01:00,239

flight engineer to esa

20

00:01:08,469 --> 00:01:05,750

backup crew anton shkaplerov

21

00:01:10,789 --> 00:01:08,479

soyuz commander and iss flight engineer

22

00:01:14,390 --> 00:01:10,799

samantha christopher razi isis and soyuz

23

00:01:16,550 --> 00:01:14,400

flight engineer and terry birds

24

00:01:18,870 --> 00:01:16,560

flight engineering 2 of the source

25

00:01:20,310 --> 00:01:18,880

vehicle and of the iss

26
00:01:21,990 --> 00:01:20,320
ladies and gentlemen you're welcome to

27
00:01:23,910 --> 00:01:22,000
ask your questions

28
00:01:28,630 --> 00:01:23,920
please

29
00:01:30,230 --> 00:01:28,640
avena it aired us news agency first of

30
00:01:32,069 --> 00:01:30,240
all i would like to congratulate you on

31
00:01:33,990 --> 00:01:32,079
your upcoming flight

32
00:01:36,149 --> 00:01:34,000
and soon you will your dream will come

33
00:01:38,390 --> 00:01:36,159
true and i would also

34
00:01:39,990 --> 00:01:38,400
like to congratulate you on the upcoming

35
00:01:41,830 --> 00:01:40,000
holidays

36
00:01:44,789 --> 00:01:41,840
and i have a traditional question for

37
00:01:47,590 --> 00:01:44,799
you what kind of musketeer going to have

38
00:01:49,910 --> 00:01:47,600

and besides that

39

00:01:51,590 --> 00:01:49,920

i also have another question yesterday

40

00:01:53,109 --> 00:01:51,600

you completed all your comprehensive

41

00:01:55,030 --> 00:01:53,119

examinations

42

00:01:59,510 --> 00:01:55,040

and

43

00:02:01,990 --> 00:01:59,520

got your a plus

44

00:02:04,310 --> 00:02:02,000

because of your perfect understanding of

45

00:02:05,910 --> 00:02:04,320

each other and my question is what

46

00:02:09,510 --> 00:02:05,920

language are going to speak on board the

47

00:02:12,550 --> 00:02:09,520

iss thank you

48

00:02:18,150 --> 00:02:14,470

maxim here is the microphone it's right

49

00:02:22,390 --> 00:02:21,190

well answering your traditional

50

00:02:26,229 --> 00:02:22,400

question i can

51
00:02:29,910 --> 00:02:27,750
since reid

52
00:02:31,990 --> 00:02:29,920
has two little daughters

53
00:02:32,869 --> 00:02:32,000
one of the daughters gave his dad

54
00:02:39,910 --> 00:02:32,879
this

55
00:02:43,350 --> 00:02:41,589
his daughters gave it to him to take the

56
00:02:44,949 --> 00:02:43,360
space

57
00:02:46,550 --> 00:02:44,959
will be just need to show the bite maybe

58
00:02:48,229 --> 00:02:46,560
breed will add a couple of more words

59
00:02:52,790 --> 00:02:48,239
about it i don't know

60
00:02:56,070 --> 00:02:54,470
and answering the question about the

61
00:02:58,630 --> 00:02:56,080
language we are going to speak on board

62
00:03:00,869 --> 00:02:58,640
the station uh this is also very

63
00:03:02,309 --> 00:03:00,879

traditional during our training on board

64

00:03:04,149 --> 00:03:02,319

the iss

65

00:03:06,869 --> 00:03:04,159

we use the english language which is

66

00:03:09,910 --> 00:03:06,879

documented as the official language

67

00:03:13,350 --> 00:03:09,920

and in reality we are going to speak for

68

00:03:15,190 --> 00:03:13,360

english and mixture something

69

00:03:16,949 --> 00:03:15,200

in between russian and english of course

70

00:03:18,309 --> 00:03:16,959

you all understand that we're not native

71

00:03:20,309 --> 00:03:18,319

speakers of english and they're not

72

00:03:22,149 --> 00:03:20,319

natives because of russian and if they

73

00:03:26,390 --> 00:03:22,159

speak bad russian i will always be

74

00:03:30,630 --> 00:03:28,550

when i'm trying to use my bad english

75

00:03:32,149 --> 00:03:30,640

with my colleagues they will always

76
00:03:33,430 --> 00:03:32,159
understand me because they are native

77
00:03:35,190 --> 00:03:33,440
speakers

78
00:03:38,070 --> 00:03:35,200
and if um

79
00:03:40,149 --> 00:03:38,080
alex is upset at some point maybe i

80
00:03:42,229 --> 00:03:40,159
don't know i think he will use german

81
00:03:44,070 --> 00:03:42,239
but we won't be able to understand the

82
00:03:44,830 --> 00:03:44,080
german language so he has

83
00:03:57,270 --> 00:03:44,840
an

84
00:04:02,550 --> 00:04:00,869
in the country the name is

85
00:04:08,869 --> 00:04:02,560
giraffety

86
00:04:08,879 --> 00:04:21,509
it wants to sleep yes it's sleeping

87
00:04:24,070 --> 00:04:22,870
i have a question for maximus the

88
00:04:25,990 --> 00:04:24,080

commander

89

00:04:29,909 --> 00:04:26,000

could you please tell us more about the

90

00:04:32,150 --> 00:04:29,919

scientific program and the eva

91

00:04:33,030 --> 00:04:32,160

program and plans

92

00:04:35,590 --> 00:04:33,040

so

93

00:04:39,110 --> 00:04:35,600

i think that you have two evas scheduled

94

00:04:41,030 --> 00:04:39,120

so who is going to be

95

00:04:43,189 --> 00:04:41,040

there and what are the tasks of the

96

00:04:45,510 --> 00:04:43,199

evening

97

00:04:47,749 --> 00:04:45,520

first i want to say that

98

00:04:49,510 --> 00:04:47,759

we have three evas scheduled on the

99

00:04:51,590 --> 00:04:49,520

russian segment

100

00:04:53,510 --> 00:04:51,600

the first two will be performed by

101
00:04:56,469 --> 00:04:53,520
alexander skarsov and oligarchemia and

102
00:04:58,950 --> 00:04:56,479
when they come back to earth and we will

103
00:05:05,430 --> 00:05:01,430
alexander samuko

104
00:05:07,830 --> 00:05:05,440
alex will join us during the third eva

105
00:05:12,950 --> 00:05:07,840
in august or in september

106
00:05:18,070 --> 00:05:12,960
so the task of our eva is resupply

107
00:05:21,029 --> 00:05:19,749
the installation of the scientific

108
00:05:23,590 --> 00:05:21,039
experiment that is currently being

109
00:05:27,189 --> 00:05:23,600
conducted outside the station

110
00:05:30,070 --> 00:05:27,199
so typical standard tasks of

111
00:05:32,150 --> 00:05:30,080
regular evas that

112
00:05:34,870 --> 00:05:32,160
are performed by

113
00:05:40,629 --> 00:05:37,029

talking about the scientific experiments

114

00:05:42,070 --> 00:05:40,639

i just showed you the book so

115

00:05:44,390 --> 00:05:42,080

we have a lot of experiments that we are

116

00:05:47,350 --> 00:05:44,400

going to run

117

00:05:49,270 --> 00:05:47,360

maybe we will be able to

118

00:05:52,550 --> 00:05:49,280

perform other experiments that are not

119

00:05:55,270 --> 00:05:52,560

in the main scientific program so the

120

00:05:57,270 --> 00:05:55,280

program is really big and it's very

121

00:05:59,830 --> 00:05:57,280

typical and usual for the

122

00:06:02,150 --> 00:05:59,840

russian segment for the us segment for

123

00:06:04,710 --> 00:06:02,160

european modules

124

00:06:07,350 --> 00:06:04,720

so the main goal of the iss i would like

125

00:06:09,510 --> 00:06:07,360

to remind it to you is not to send

126

00:06:13,270 --> 00:06:09,520

astronauts there is not for the

127

00:06:16,150 --> 00:06:14,230

take

128

00:06:19,749 --> 00:06:16,160

beautiful photographs that is all

129

00:06:20,629 --> 00:06:19,759

secondary the main objective of the iss

130

00:06:22,550 --> 00:06:20,639

is

131

00:06:25,430 --> 00:06:22,560

utilization

132

00:06:31,510 --> 00:06:25,440

is performing scientific experiments

133

00:06:37,510 --> 00:06:33,510

and what about the u.s segment could you

134

00:06:42,550 --> 00:06:39,830

so this question is for alexander i know

135

00:06:45,110 --> 00:06:42,560

that you're an expert and volcanoes are

136

00:06:48,790 --> 00:06:45,120

going to continue your research

137

00:06:55,270 --> 00:06:52,230

yes when we all become cosmonauts and

138

00:06:57,589 --> 00:06:55,280

astronauts of the iss

139

00:07:00,150 --> 00:06:57,599

i can say it's not our primary

140

00:07:02,309 --> 00:07:00,160

occupation so we all have different

141

00:07:06,870 --> 00:07:02,319

professions we all had them before for

142

00:07:13,270 --> 00:07:10,390

but of course we astronauts do research

143

00:07:14,309 --> 00:07:13,280

in all areas of science

144

00:07:19,670 --> 00:07:14,319

no

145

00:07:22,070 --> 00:07:19,680

be some geophysical

146

00:07:23,110 --> 00:07:22,080

research for me

147

00:07:25,589 --> 00:07:23,120

i think

148

00:07:27,589 --> 00:07:25,599

i will be also performing biological

149

00:07:30,230 --> 00:07:27,599

physical experiment

150

00:07:31,990 --> 00:07:30,240

and i would like to see the end results

151

00:07:34,550 --> 00:07:32,000

and i hope that these results will be

152

00:07:36,550 --> 00:07:34,560

very beneficial for

153

00:07:37,990 --> 00:07:36,560

scientists on earth and for the people

154

00:07:39,270 --> 00:07:38,000

on earth

155

00:07:41,189 --> 00:07:39,280

but of course when i'm going to look

156

00:07:44,390 --> 00:07:41,199

through the window

157

00:07:46,629 --> 00:07:44,400

from the iss i will be definitely

158

00:07:48,629 --> 00:07:46,639

looking at the volcanoes and

159

00:07:51,670 --> 00:07:48,639

watching them that will be absolutely

160

00:07:51,680 --> 00:07:55,110

next question

161

00:08:08,469 --> 00:07:56,869

magazine

162

00:08:12,150 --> 00:08:10,550

to send the presence of those countries

163

00:08:14,550 --> 00:08:12,160

where astronauts are from to center

164

00:08:18,950 --> 00:08:17,029

for some time and then return them back

165

00:08:20,790 --> 00:08:18,960

to earth

166

00:08:22,150 --> 00:08:20,800

and maybe they will be able to reach

167

00:08:24,230 --> 00:08:22,160

agreement

168

00:08:28,629 --> 00:08:24,240

after that so this is a question for all

169

00:08:33,829 --> 00:08:31,350

i think anton shkaplerov will be able to

170

00:08:36,790 --> 00:08:33,839

answer this question

171

00:08:39,990 --> 00:08:36,800

yes thank you that is a great question

172

00:08:41,430 --> 00:08:40,000

thank you for this question

173

00:08:44,310 --> 00:08:41,440

and we all know about the current

174

00:08:46,870 --> 00:08:44,320

political situation in the world

175

00:08:49,190 --> 00:08:46,880

but you're absolutely right the idea is

176

00:08:51,750 --> 00:08:49,200

great to gather all the presidents

177

00:08:53,190 --> 00:08:51,760

together in one place send them to the

178

00:08:55,590 --> 00:08:53,200

isis

179

00:08:57,750 --> 00:08:55,600

not only because of the difficulties

180

00:09:00,150 --> 00:08:57,760

that they will have to face during the

181

00:09:03,670 --> 00:09:00,160

space flight but first of all to see the

182

00:09:07,110 --> 00:09:03,680

wonderful earth that we have but

183

00:09:08,470 --> 00:09:07,120

we would also be able to remind them

184

00:09:10,230 --> 00:09:08,480

we can reach an agreement and we should

185

00:09:14,949 --> 00:09:10,240

be proud of what we have in the world

186

00:09:19,509 --> 00:09:17,509

i would like to hear the us astronauts

187

00:09:21,430 --> 00:09:19,519

answering that question no i think that

188

00:09:23,990 --> 00:09:21,440

anton answered everything perfectly

189

00:09:29,110 --> 00:09:26,630

okay next question

190

00:09:30,630 --> 00:09:29,120

good morning jose from the european

191

00:09:33,269 --> 00:09:30,640

space agency

192

00:09:36,070 --> 00:09:33,279

congratulations to both crews i have two

193

00:09:38,310 --> 00:09:36,080

questions to alexander in english and

194

00:09:40,470 --> 00:09:38,320

first one is how do you feel now

195

00:09:42,949 --> 00:09:40,480

actually that the proper training is

196

00:09:45,430 --> 00:09:42,959

over and it's going to launch and the

197

00:09:46,870 --> 00:09:45,440

second one is what was the biggest

198

00:09:49,670 --> 00:09:46,880

challenge for you personally in

199

00:09:52,630 --> 00:09:49,680

yesterday's simulation

200

00:09:53,509 --> 00:09:52,640

um thank you uh mr gronster

201

00:09:55,990 --> 00:09:53,519

uh

202

00:09:59,030 --> 00:09:56,000

i think it's easy to describe how i feel

203

00:10:01,750 --> 00:09:59,040

if you just look at uh how we came here

204

00:10:03,910 --> 00:10:01,760

like what did what it well

205

00:10:05,670 --> 00:10:03,920

meant for us to to train that long i

206

00:10:07,670 --> 00:10:05,680

mean uh four and a half years ago i was

207

00:10:09,269 --> 00:10:07,680

selected into the core of the european

208

00:10:12,069 --> 00:10:09,279

astronaut

209

00:10:14,310 --> 00:10:12,079

team of isa and uh that's when i

210

00:10:16,630 --> 00:10:14,320

basically started training so for four

211

00:10:18,870 --> 00:10:16,640

and a half years basically every day

212

00:10:20,470 --> 00:10:18,880

there was some something new that i've

213

00:10:22,150 --> 00:10:20,480

learned it's something new that i tried

214

00:10:23,829 --> 00:10:22,160

to get into my brain

215

00:10:25,829 --> 00:10:23,839

i was assigned two and a half years

216

00:10:29,110 --> 00:10:25,839

together with reid and max and we

217

00:10:30,949 --> 00:10:29,120

trained since then as a team as a crew

218

00:10:33,350 --> 00:10:30,959

over here in houston

219

00:10:35,829 --> 00:10:33,360

in canada and japan and i mean we

220

00:10:37,829 --> 00:10:35,839

traveled a lot and and every day we we

221

00:10:39,829 --> 00:10:37,839

learned something new so yesterday was

222

00:10:42,150 --> 00:10:39,839

the last day of my training yesterday

223

00:10:54,470 --> 00:10:42,160

was the finish line of four and a half

224

00:10:56,949 --> 00:10:55,590

so

225

00:10:58,550 --> 00:10:56,959

yeah i think

226

00:11:01,430 --> 00:10:58,560

it's just one word that describes it

227

00:11:03,670 --> 00:11:01,440

it's fantastic

228

00:11:06,630 --> 00:11:03,680

the the second question uh on on

229

00:11:09,190 --> 00:11:06,640

yesterday's exam uh i think it's it's

230

00:11:11,350 --> 00:11:09,200

it's a general thing of those exams that

231

00:11:14,470 --> 00:11:11,360

they're they're very complex like you

232

00:11:16,790 --> 00:11:14,480

sit there the whole day uh you you do a

233

00:11:18,710 --> 00:11:16,800

nominal launch with the with the on the

234

00:11:20,069 --> 00:11:18,720

on the launcher on the rocket and you do

235

00:11:22,550 --> 00:11:20,079

a docking to the space station

236

00:11:25,269 --> 00:11:22,560

afterwards you do a landing so you you

237

00:11:27,750 --> 00:11:25,279

go through all the phases of the of the

238

00:11:28,949 --> 00:11:27,760

of the flight that you do and the the

239

00:11:31,030 --> 00:11:28,959

simulator

240

00:11:32,630 --> 00:11:31,040

uh persons try to inject all the

241

00:11:34,150 --> 00:11:32,640

failures that you that they possibly can

242

00:11:36,150 --> 00:11:34,160

throw at you so it's a very complex

243

00:11:38,470 --> 00:11:36,160

thing you have to take many decisions

244

00:11:41,350 --> 00:11:38,480

the whole day and our commander and reid

245

00:11:43,269 --> 00:11:41,360

did well i supported them as as good as

246

00:11:45,269 --> 00:11:43,279

i could so in the end

247

00:11:47,509 --> 00:11:45,279

even though we had a lot of malfunctions

248

00:11:49,509 --> 00:11:47,519

um we landed safely we had nine and a

249

00:11:51,910 --> 00:11:49,519

half g's that we had to go through so it

250

00:11:54,470 --> 00:11:51,920

wasn't an easy landing

251
00:11:56,150 --> 00:11:54,480
if it was a real one but we succeeded

252
00:12:01,670 --> 00:11:56,160
and we survived and that's a great

253
00:12:07,590 --> 00:12:04,150
9.5 units is a lot

254
00:12:10,629 --> 00:12:07,600
and specialists know that

255
00:12:14,470 --> 00:12:11,389
is

256
00:12:16,629 --> 00:12:14,480
950 kilograms can you imagine that for

257
00:12:17,509 --> 00:12:16,639
example you weigh 50 kilograms

258
00:12:18,790 --> 00:12:17,519
and

259
00:12:20,629 --> 00:12:18,800
can you add

260
00:12:23,110 --> 00:12:20,639
900

261
00:12:26,629 --> 00:12:25,350
no it's it's a lot i just wanted to say

262
00:12:34,470 --> 00:12:26,639
that it's a lot

263
00:12:38,949 --> 00:12:36,629

for nasa tv for reed wiseman what are

264

00:12:45,110 --> 00:12:38,959

you looking forward to the most on your

265

00:12:48,949 --> 00:12:46,550

i don't think we have enough time for

266

00:12:50,790 --> 00:12:48,959

for a complete answer on that but i

267

00:12:51,990 --> 00:12:50,800

think

268

00:12:54,470 --> 00:12:52,000

really the first thing i'm looking

269

00:12:56,150 --> 00:12:54,480

forward to is uh

270

00:12:57,829 --> 00:12:56,160

is watching the first sunrise on orbit

271

00:12:59,829 --> 00:12:57,839

and we just got some ballistics data

272

00:13:01,750 --> 00:12:59,839

yesterday and there was the the time of

273

00:13:03,030 --> 00:13:01,760

the first sunrise and we're in the soyuz

274

00:13:04,310 --> 00:13:03,040

so i got it written down on my knee

275

00:13:06,389 --> 00:13:04,320

board so i can remember to look out the

276

00:13:07,829 --> 00:13:06,399

window because we'll be hard at work on

277

00:13:08,870 --> 00:13:07,839

our first couple of burns to do our

278

00:13:09,910 --> 00:13:08,880

docking

279

00:13:11,269 --> 00:13:09,920

so that's the first thing i'm really

280

00:13:13,590 --> 00:13:11,279

looking forward to in the soyuz once we

281

00:13:15,269 --> 00:13:13,600

get up there and then obviously once we

282

00:13:16,629 --> 00:13:15,279

get to the space station there's three

283

00:13:18,550 --> 00:13:16,639

of our really good friends up there two

284

00:13:20,069 --> 00:13:18,560

russians in america and

285

00:13:21,829 --> 00:13:20,079

i think it'll be really amazing to come

286

00:13:23,910 --> 00:13:21,839

through that hatch uh i'll probably be a

287

00:13:26,150 --> 00:13:23,920

little out of sorts uh floating for the

288

00:13:27,430 --> 00:13:26,160

first time but uh i know swanny will

289

00:13:29,030 --> 00:13:27,440

help us help us get through there and

290

00:13:31,509 --> 00:13:29,040

get on the press conference and uh just

291

00:13:34,230 --> 00:13:31,519

seeing those three up there uh when we

292

00:13:44,790 --> 00:13:34,240

last saw him a couple months ago here

293

00:13:49,750 --> 00:13:48,310

thank you next question

294

00:13:52,150 --> 00:13:49,760

channel

295

00:13:55,430 --> 00:13:52,160

literally i have questions forum for all

296

00:13:57,829 --> 00:13:55,440

of you guys how to combine your private

297

00:14:00,150 --> 00:13:57,839

life and your job as and

298

00:14:02,710 --> 00:14:00,160

as astronauts i think it's it's it's

299

00:14:04,629 --> 00:14:02,720

pretty difficult and how your wives or

300

00:14:10,150 --> 00:14:04,639

your girlfriend

301
00:14:14,069 --> 00:14:11,269
you begin

302
00:14:15,189 --> 00:14:14,079
so to me in principle when you when you

303
00:14:17,189 --> 00:14:15,199
train that

304
00:14:18,870 --> 00:14:17,199
that much in that heart for a mission in

305
00:14:21,110 --> 00:14:18,880
the end actually there's no difference

306
00:14:22,389 --> 00:14:21,120
anymore between private life and work

307
00:14:23,590 --> 00:14:22,399
life

308
00:14:25,910 --> 00:14:23,600
i think that's one of the biggest

309
00:14:28,069 --> 00:14:25,920
challenges to

310
00:14:29,750 --> 00:14:28,079
get apart after the mission again

311
00:14:31,829 --> 00:14:29,760
because i mean we train together we grew

312
00:14:34,310 --> 00:14:31,839
friends i mean we we spent like days in

313
00:14:36,230 --> 00:14:34,320

the forest at minus 20 celsius

314

00:14:38,389 --> 00:14:36,240

without a tent without a sleeping bag we

315

00:14:41,269 --> 00:14:38,399

had to survive and that i mean you grow

316

00:14:43,509 --> 00:14:41,279

together as a crew to be friends and so

317

00:14:45,430 --> 00:14:43,519

in the end you're you're

318

00:14:47,990 --> 00:14:45,440

yeah it's the same the private life and

319

00:14:50,069 --> 00:14:48,000

work life is in the way the same

320

00:14:53,430 --> 00:14:50,079

by private life i mean like your

321

00:14:56,150 --> 00:14:53,440

relationship with your partner or why

322

00:14:59,030 --> 00:14:56,160

well i i'm in the lucky situation that

323

00:15:01,430 --> 00:14:59,040

my my partner she was able to follow me

324

00:15:03,269 --> 00:15:01,440

to different training locations a lot so

325

00:15:07,350 --> 00:15:03,279

i saw her actually uh quite a bit and

326

00:15:09,829 --> 00:15:07,360

that made the things very easy for me so

327

00:15:11,990 --> 00:15:09,839

that is something that made my life much

328

00:15:13,269 --> 00:15:12,000

easier but i think i'll let these guys

329

00:15:15,269 --> 00:15:13,279

talk about it

330

00:15:17,350 --> 00:15:15,279

just real quick of course it's difficult

331

00:15:19,269 --> 00:15:17,360

we spend two and a half years training

332

00:15:21,269 --> 00:15:19,279

together and uh in that two and a half

333

00:15:22,870 --> 00:15:21,279

years i've been away from my family for

334

00:15:25,829 --> 00:15:22,880

nearly one year of it

335

00:15:27,670 --> 00:15:25,839

and but it's not all at one time it's a

336

00:15:29,189 --> 00:15:27,680

month in russia and then a week or two

337

00:15:30,870 --> 00:15:29,199

in germany or japan and then back to the

338

00:15:32,790 --> 00:15:30,880

us to see my family

339

00:15:34,389 --> 00:15:32,800

but it's hard on on me and it's hard on

340

00:15:35,910 --> 00:15:34,399

them i have two little kids and every

341

00:15:37,990 --> 00:15:35,920

time i come home you have to kind of

342

00:15:39,990 --> 00:15:38,000

reintegrate yourself into the family so

343

00:15:42,389 --> 00:15:40,000

from that perspective i'm missing out on

344

00:15:44,310 --> 00:15:42,399

uh on these two great little

345

00:15:46,629 --> 00:15:44,320

little people and uh and they're growing

346

00:15:49,030 --> 00:15:46,639

up and i get i miss part of that but at

347

00:15:50,870 --> 00:15:49,040

the same time uh i try to

348

00:15:51,990 --> 00:15:50,880

let them see what i'm doing and bring

349

00:15:53,269 --> 00:15:52,000

them into

350

00:15:55,030 --> 00:15:53,279

uh the mission a little bit and they

351

00:15:57,030 --> 00:15:55,040

enjoyed that so once they kind of

352

00:15:58,949 --> 00:15:57,040

understand what i'm doing

353

00:16:00,550 --> 00:15:58,959

then they they actually really really

354

00:16:02,230 --> 00:16:00,560

enjoy it and uh it's it's kind of been a

355

00:16:03,590 --> 00:16:02,240

fun adventure for them they've gotten to

356

00:16:05,350 --> 00:16:03,600

see some parts of the world that they

357

00:16:07,350 --> 00:16:05,360

otherwise wouldn't have and uh they're

358

00:16:08,870 --> 00:16:07,360

coming here tomorrow so i'm very excited

359

00:16:10,470 --> 00:16:08,880

to see

360

00:16:12,310 --> 00:16:10,480

how you do

361

00:16:14,470 --> 00:16:12,320

what was your daughter's reaction when

362

00:16:15,430 --> 00:16:14,480

they found out that you're going to the

363

00:16:17,269 --> 00:16:15,440

space

364

00:16:18,550 --> 00:16:17,279

they thought that i would leave

365

00:16:20,870 --> 00:16:18,560

they thought i would leave tomorrow and

366

00:16:23,110 --> 00:16:20,880

this was two and a half years ago so

367

00:16:25,430 --> 00:16:23,120

the full comprehension is not quite uh

368

00:16:27,269 --> 00:16:25,440

it's not quite there but now uh my older

369

00:16:28,790 --> 00:16:27,279

one is is eight and a half and she

370

00:16:31,430 --> 00:16:28,800

understands she's really excited about

371

00:16:34,870 --> 00:16:32,710

thank you

372

00:16:36,949 --> 00:16:34,880

next

373

00:16:39,590 --> 00:16:36,959

first of all

374

00:16:41,749 --> 00:16:39,600

i would like to

375

00:16:45,269 --> 00:16:41,759

yeah here it is

376

00:16:50,230 --> 00:16:46,230

i use

377

00:16:51,910 --> 00:16:50,240

every minute to spend it with my family

378

00:16:54,310 --> 00:16:51,920

if i have spare time i definitely spend

379

00:16:57,030 --> 00:16:54,320

it with my family we travel a lot we go

380

00:16:59,990 --> 00:16:57,040

to different countries

381

00:17:01,829 --> 00:17:00,000

on business trips and training

382

00:17:03,590 --> 00:17:01,839

and while you're away from your family

383

00:17:06,069 --> 00:17:03,600

you really start appreciating what you

384

00:17:07,669 --> 00:17:06,079

have at home you start appreciating your

385

00:17:09,270 --> 00:17:07,679

families

386

00:17:11,909 --> 00:17:09,280

and of course i try to be with them

387

00:17:13,909 --> 00:17:11,919

every spare minute i have

388

00:17:14,710 --> 00:17:13,919

but of course i cannot do it all the

389

00:17:15,909 --> 00:17:14,720
time

390

00:17:16,829 --> 00:17:15,919
because

391

00:17:19,590 --> 00:17:16,839
my

392

00:17:22,069 --> 00:17:19,600
job sends me

393

00:17:24,069 --> 00:17:22,079
somewhere far away but

394

00:17:25,909 --> 00:17:24,079
in general i have my second family here

395

00:17:29,669 --> 00:17:25,919
look at them look at these guys on the

396

00:17:34,230 --> 00:17:32,150
and for the next six months i'm going to

397

00:17:37,270 --> 00:17:34,240
be with my friends with my

398

00:17:40,230 --> 00:17:37,280
second family on board the iss so i can

399

00:17:41,990 --> 00:17:40,240
say we're all one big family

400

00:17:43,909 --> 00:17:42,000
because the tasks that we're going to

401
00:17:44,830 --> 00:17:43,919
perform and the objectives that we're

402
00:17:48,390 --> 00:17:44,840
going to

403
00:17:50,470 --> 00:17:48,400
achieve are very hard and you really

404
00:17:52,470 --> 00:17:50,480
have to feel that you have someone you

405
00:17:54,710 --> 00:17:52,480
can rely on when you're performing these

406
00:17:55,990 --> 00:17:54,720
tasks and objectives and you have to

407
00:17:57,909 --> 00:17:56,000
feel that

408
00:18:00,950 --> 00:17:57,919
these people are with you these people

409
00:18:05,510 --> 00:18:00,960
will be with me 24 hours a day so i

410
00:18:10,710 --> 00:18:07,190
so this is how it is

411
00:18:14,789 --> 00:18:12,390
next question

412
00:18:17,110 --> 00:18:14,799
i found out that anton

413
00:18:20,070 --> 00:18:17,120

got his phd degree

414

00:18:22,710 --> 00:18:20,080

and i want to ask you

415

00:18:25,110 --> 00:18:22,720

how did you manage to

416

00:18:39,590 --> 00:18:25,120

do that while you have such a tight

417

00:18:46,070 --> 00:18:41,750

maxim just mentioned it that

418

00:18:52,950 --> 00:18:49,510

a profession long ago in high school

419

00:18:56,789 --> 00:18:55,190

and we are studying all the time we are

420

00:18:58,230 --> 00:18:56,799

studying during our training sessions

421

00:19:00,870 --> 00:18:58,240

we're starting in the vehicle we're

422

00:19:06,230 --> 00:19:00,880

starting onboard the iss we are studying

423

00:19:13,270 --> 00:19:10,310

getting a phd degree was my old dream

424

00:19:15,590 --> 00:19:13,280

and i always postponed this dream

425

00:19:20,470 --> 00:19:15,600

because of my previous flight because of

426

00:19:25,029 --> 00:19:23,110

i decided just to find time to squeeze

427

00:19:27,669 --> 00:19:25,039

it in my tight schedule i know that i

428

00:19:30,870 --> 00:19:27,679

had very little time for that

429

00:19:31,830 --> 00:19:30,880

it's not necessary to be a cosmonaut to

430

00:19:33,270 --> 00:19:31,840

study

431

00:19:34,070 --> 00:19:33,280

to learn

432

00:19:36,549 --> 00:19:34,080

to

433

00:19:38,789 --> 00:19:36,559

learn something new every day

434

00:19:40,710 --> 00:19:38,799

we all need to study

435

00:19:41,750 --> 00:19:40,720

all the time

436

00:19:45,990 --> 00:19:41,760

that's

437

00:19:49,990 --> 00:19:48,150

maxim you've already mentioned it but

438

00:19:51,190 --> 00:19:50,000

it's really interesting you've already

439

00:19:53,510 --> 00:19:51,200

described

440

00:19:55,270 --> 00:19:53,520

the crew members that you're going to

441

00:19:56,950 --> 00:19:55,280

fly with could you please describe each

442

00:19:59,270 --> 00:19:56,960

other

443

00:20:00,870 --> 00:19:59,280

sense of humor what you appreciate most

444

00:20:02,070 --> 00:20:00,880

in each other

445

00:20:03,350 --> 00:20:02,080

i think that's very important for

446

00:20:05,430 --> 00:20:03,360

airspace flight

447

00:20:07,270 --> 00:20:05,440

i'm really afraid to say too many good

448

00:20:08,230 --> 00:20:07,280

things about them no don't be afraid of

449

00:20:09,590 --> 00:20:08,240

that

450

00:20:11,190 --> 00:20:09,600

because they're flying for the first

451
00:20:12,950 --> 00:20:11,200
time maybe there are some things that

452
00:20:14,950 --> 00:20:12,960
they need to know

453
00:20:25,990 --> 00:20:14,960
some words of encouragement that you

454
00:20:30,470 --> 00:20:28,230
i'm not lying i'm not flattering but i

455
00:20:32,070 --> 00:20:30,480
want to say that i'm very lucky with the

456
00:20:34,230 --> 00:20:32,080
crew members i'm going to fly to the

457
00:20:35,830 --> 00:20:34,240
station they are

458
00:20:39,430 --> 00:20:35,840
very good professionals they're very

459
00:20:44,310 --> 00:20:41,590
they're very responsible

460
00:20:45,750 --> 00:20:44,320
and they study a lot they know a lot

461
00:20:46,870 --> 00:20:45,760
they have very good

462
00:20:52,630 --> 00:20:46,880
life

463
00:20:57,909 --> 00:20:55,430

they're not very old but believe me

464

00:20:59,510 --> 00:20:57,919

in their 30s they know so much that it's

465

00:21:00,710 --> 00:20:59,520

really impressive

466

00:21:02,710 --> 00:21:00,720

reed is

467

00:21:06,789 --> 00:21:02,720

a military pilot

468

00:21:10,710 --> 00:21:08,470

that's very impressive i know how

469

00:21:13,110 --> 00:21:10,720

difficult his job is

470

00:21:15,830 --> 00:21:13,120

because i'm a pilot myself

471

00:21:17,669 --> 00:21:15,840

and i was participating in different

472

00:21:19,510 --> 00:21:17,679

military actions and i absolutely

473

00:21:22,470 --> 00:21:19,520

respect his job

474

00:21:26,950 --> 00:21:22,480

and our training has shown and our

475

00:21:32,470 --> 00:21:30,390

he has all the necessary qualities that

476

00:21:34,149 --> 00:21:32,480

you need to have in space i can say this

477

00:21:38,630 --> 00:21:34,159

same about alex

478

00:21:41,270 --> 00:21:38,640

he is a great guy he is a scientist

479

00:21:43,750 --> 00:21:41,280

and he was always there working on the

480

00:21:45,430 --> 00:21:43,760

simulator i can trust

481

00:21:48,870 --> 00:21:45,440

them to perform

482

00:21:51,510 --> 00:21:48,880

something some complicated tasks

483

00:21:52,630 --> 00:21:51,520

even tasks when you need to

484

00:21:55,590 --> 00:21:52,640

make

485

00:21:58,630 --> 00:21:55,600

a quick decision and i absolutely sure

486

00:22:00,149 --> 00:21:58,640

that i can rely on them and

487

00:22:02,310 --> 00:22:00,159

they're very responsible i'm proud of my

488

00:22:05,350 --> 00:22:02,320

crew

489

00:22:07,430 --> 00:22:05,360

and let's knock on wood

490

00:22:09,110 --> 00:22:07,440

i hope that our friendship will only

491

00:22:11,510 --> 00:22:09,120

become stronger with years after the

492

00:22:11,520 --> 00:22:14,710

thank you

493

00:22:19,510 --> 00:22:18,310

no no don't ask them to describe me

494

00:22:20,630 --> 00:22:19,520

because i

495

00:22:57,590 --> 00:22:20,640

i

496

00:22:59,270 --> 00:22:57,600

26th

497

00:23:01,110 --> 00:22:59,280

of course there will be a lot of people

498

00:23:03,190 --> 00:23:01,120

around me with whom i will be able to

499

00:23:20,870 --> 00:23:03,200

celebrate my birthday the people i know

500

00:23:24,950 --> 00:23:23,510

in four days after my birthday so yes i

501
00:23:33,430 --> 00:23:24,960
think we will

502
00:23:38,710 --> 00:23:36,390
so once again our job wants us to be

503
00:23:39,750 --> 00:23:38,720
there and to be absolutely ready for the

504
00:23:42,070 --> 00:23:39,760
flight

505
00:23:43,669 --> 00:23:42,080
and my birthday is secondary in this

506
00:23:46,230 --> 00:23:43,679
regard

507
00:23:49,510 --> 00:23:46,240
it's my job it's my duty

508
00:23:53,909 --> 00:23:52,310
at the same time i think i will be

509
00:23:56,070 --> 00:23:53,919
surrounded by the people i like the

510
00:23:58,149 --> 00:23:56,080
people i trust and my

511
00:24:01,590 --> 00:23:58,159
real friends i think that's a

512
00:24:05,029 --> 00:24:03,669
ladies and gentlemen

513
00:24:07,909 --> 00:24:05,039

i think

514

00:24:10,789 --> 00:24:09,430

there are so many

515

00:24:13,110 --> 00:24:10,799

questions

516

00:24:15,350 --> 00:24:13,120

already there and

517

00:24:18,470 --> 00:24:15,360

the languages of our press conference

518

00:24:20,870 --> 00:24:18,480

are the russian and english language and

519

00:24:29,669 --> 00:24:20,880

there are some questions in the german

520

00:24:29,679 --> 00:24:41,750

is

521

00:24:41,760 --> 00:24:51,669

foreign

522

00:24:51,679 --> 00:24:56,870

the question was if you have free choice

523

00:24:56,880 --> 00:24:59,430

would you

524

00:25:04,950 --> 00:25:02,149

to pick different people i would still

525

00:25:06,710 --> 00:25:04,960

pick the people i'm flying with in a

526
00:25:10,549 --> 00:25:06,720
couple of weeks

527
00:25:16,230 --> 00:25:13,990
thank you very much dear friends

528
00:25:18,470 --> 00:25:16,240
i think there is some time left to ask

529
00:25:21,190 --> 00:25:18,480
individual questions this completes our

530
00:25:22,310 --> 00:25:21,200
press conference and the crews

531
00:25:25,990 --> 00:25:22,320
will

532
00:25:30,070 --> 00:25:26,000
leave for the star city museum

533
00:25:31,830 --> 00:25:30,080
they will also see the exhibition there

534
00:25:33,269 --> 00:25:31,840
fiori gagarin

535
00:25:35,990 --> 00:25:33,279
after that they will go to the red

536
00:25:37,909 --> 00:25:36,000
square where they will be able to lay

537
00:25:40,470 --> 00:25:37,919
flowers

538
00:25:43,029 --> 00:25:40,480

according to our tradition

539

00:25:45,990 --> 00:25:43,039

after that the crews will

540

00:25:48,710 --> 00:25:46,000

rest on may 15th they will leave for

541

00:25:50,149 --> 00:25:48,720

baikonur and on the 28th

542

00:25:51,590 --> 00:25:50,159

they will launch for the station thank

543

00:25:54,149 --> 00:25:51,600

you very much for

544

00:25:56,950 --> 00:25:54,159

your questions and i would like to ask

545

00:26:06,950 --> 00:25:56,960

the crew to pose for photographers thank

546

00:26:06,960 --> 00:26:21,190

like this yes

547

00:26:21,200 --> 00:26:28,230

and traditionally shake your hands yes

548

00:26:50,830 --> 00:26:30,310

thank you

549

00:26:50,840 --> 00:27:10,070

foreign pretty good

550

00:27:47,590 --> 00:27:25,590

okay

551
00:28:49,669 --> 00:28:14,470
i

552
00:28:49,679 --> 00:29:28,070
yep

553
00:29:28,080 --> 00:31:02,310
okay

554
00:31:02,320 --> 00:31:14,630
oh

555
00:31:14,640 --> 00:31:39,430
picture day

556
00:31:39,440 --> 00:31:57,029
just one second

557
00:32:00,470 --> 00:31:58,630
here at red square and the kremlin

558
00:32:01,909 --> 00:32:00,480
preparing for your launch in just a few

559
00:32:03,350 --> 00:32:01,919
weeks from now talk about your

560
00:32:04,950 --> 00:32:03,360
experience here today and how you're

561
00:32:06,710 --> 00:32:04,960
feeling here on this historic occasion

562
00:32:08,789 --> 00:32:06,720
just a few weeks before your flight sure

563
00:32:11,269 --> 00:32:08,799

well it is a historic day here because

564

00:32:14,070 --> 00:32:11,279

tomorrow is a huge holiday in russia

565

00:32:18,070 --> 00:32:14,080

it's uh

566

00:32:21,350 --> 00:32:19,909

it's just very surreal to be here it's

567

00:32:22,630 --> 00:32:21,360

everything's closed off except for our

568

00:32:24,549 --> 00:32:22,640

little group so we kind of have the

569

00:32:26,070 --> 00:32:24,559

whole place to ourself and

570

00:32:28,389 --> 00:32:26,080

it just gives you a little time to

571

00:32:30,870 --> 00:32:28,399

reflect and think how amazing it is to

572

00:32:32,870 --> 00:32:30,880

be here to stand in red square uh in

573

00:32:34,710 --> 00:32:32,880

russia right now preparing for launch

574

00:32:35,990 --> 00:32:34,720

it's just uh

575

00:32:37,590 --> 00:32:36,000

it's almost

576

00:32:39,430 --> 00:32:37,600

calming and relaxing it's just kind of

577

00:32:43,430 --> 00:32:39,440

nice actually how do you think you're

578

00:32:47,350 --> 00:32:44,870

that's a great question tomorrow my

579

00:32:49,750 --> 00:32:47,360

family gets here and we have got uh one

580

00:32:52,070 --> 00:32:49,760

week together just to relax be together

581

00:32:54,230 --> 00:32:52,080

as a family for the last time before

582

00:32:56,230 --> 00:32:54,240

lunch and so for me uh it's just gonna

583

00:32:58,950 --> 00:32:56,240

be family time percent

584

00:33:00,470 --> 00:32:58,960

how can your fans follow you on twitter

585

00:33:01,350 --> 00:33:00,480

or instagram and other kind of social

586

00:33:02,789 --> 00:33:01,360

media

587

00:33:05,350 --> 00:33:02,799

well follow me on twitter that's the
