go to 10 9-3 on page

6
00:01:43,030 --> 00:01:39,510
wait a little bit over one minute maybe

7
00:01:43,040 --> 00:01:46,950
i can repeat it

8
00:01:46,960 --> 00:01:55,670
copy

9
00:02:00,870 --> 00:01:56,950
yes everything is fine everything is

10
00:02:05,190 --> 00:02:00,880
nominal here on our end yes okay

11
00:02:05,200 --> 00:02:12,790
what's your pressure

12
00:02:16,390 --> 00:02:14,710
station houston on one for swanee we're

13
00:02:17,670 --> 00:02:16,400

going to defer the comp checks until

14

00:02:19,430 --> 00:02:17,680

after the hatch opening so you're

15

00:02:21,190 --> 00:02:19,440

welcome to go to mrm and then we'll do

16

00:02:22,470 --> 00:02:21,200

them from the sm after everyone's in and

17

00:02:25,910 --> 00:02:22,480

ready to start

18

00:02:30,309 --> 00:02:25,920

that's good all right we'll talk to you

00:02:34,150 --> 00:02:32,550

max you get off that

20

00:02:35,990 --> 00:02:34,160

right now we're getting live views now

21

00:02:37,190 --> 00:02:36,000

inside of mini research module one the

22

00:02:39,110 --> 00:02:37,200

ross fiat

23

00:02:41,030 --> 00:02:39,120

that hatchway will soon be open right on

24

00:02:43,430 --> 00:02:41,040

the other side that three new expedition

25

00:02:45,110 --> 00:02:43,440

40 crew members max tsariv reed wiseman

26
00:02:51,030 --> 00:02:45,120
and alexander gerst will be making their

27
00:02:53,990 --> 00:02:52,790
and you know timer because they said

28
00:02:57,190 --> 00:02:54,000
like wait

29
00:03:03,589 --> 00:02:57,200
like one minute 15 seconds okay

30
00:03:17,509 --> 00:03:06,149
yes the timer

31
00:03:29,750 --> 00:03:19,910
see russian cosmonaut alexander uh

32
00:03:33,750 --> 00:03:31,430
you know what

33
00:03:37,589 --> 00:03:33,760
we're gonna open this cage

34
00:03:37,599 --> 00:03:45,270
what i want

35
00:03:45,280 --> 00:04:08,869
late late

36
00:04:53,590 --> 00:04:12,470
expedition 40 commander steve swanson

37
00:04:53,600 --> 00:05:03,590
go ahead

38
00:05:07,749 --> 00:05:05,510

according to

39

00:05:19,990 --> 00:05:07,759

page 84

40

00:05:24,310 --> 00:05:22,070

need to perform one more step after that

41

00:05:26,629 --> 00:05:24,320

one

42

00:05:28,469 --> 00:05:26,639

yes i understand

43

00:05:37,990 --> 00:05:28,479

okay we can open the hatches yes you can

44

00:05:42,070 --> 00:05:40,390

after opel you need to deactivate all

45

00:05:47,350 --> 00:05:42,080

calm units

46

00:05:51,189 --> 00:05:49,350

okay i open the head i'm opening the

47

00:05:58,070 --> 00:05:51,199

hatch

48

00:06:01,430 --> 00:05:59,830

so right now alexander schwartzoff

49

00:06:02,870 --> 00:06:01,440

working on the hatch inside of brass

50

00:06:04,950 --> 00:06:02,880

fiat

51
00:06:06,550 --> 00:06:04,960
zerayev wiseman and gerst working on

52
00:06:10,469 --> 00:06:06,560
their hatch inside their soyuz on the

53
00:06:10,479 --> 00:06:14,870
perform that step after opel okay copy

54
00:06:14,880 --> 00:06:21,990
okay i'm opening the hatches

55
00:06:22,000 --> 00:06:45,749
oh

56
00:06:45,759 --> 00:06:56,790
yo

57
00:06:56,800 --> 00:07:14,469
has the hatch inside of rossviet open

58
00:07:14,479 --> 00:07:26,710
did you hear

59
00:07:26,720 --> 00:07:42,790
yes the hatch is open

60
00:07:42,800 --> 00:07:48,230
yes

61
00:07:51,110 --> 00:07:49,430
we check

62
00:07:52,790 --> 00:07:51,120
pressure according to the man of a

63
00:07:54,950 --> 00:07:52,800

committer

64

00:07:56,790 --> 00:07:54,960

and now just you can see the hatch of

65

00:08:01,589 --> 00:07:56,800

the soyuz still closed waiting for that

66

00:08:24,830 --> 00:08:01,599

to open uh john rasvid is open

67

00:08:24,840 --> 00:08:34,550

really you have something to eat

68

00:08:34,560 --> 00:08:42,790

of course

69

00:08:44,870 --> 00:08:43,829

okay we're still waiting for the

70

00:08:57,509 --> 00:08:44,880

pressure

71

00:09:34,790 --> 00:08:59,750

yeah just don't block the video camera

72

00:09:34,800 --> 00:09:47,430

hey

73

00:09:51,750 --> 00:09:49,430

we're still equalizing

74

00:09:54,389 --> 00:09:51,760

the pressure

75

00:09:57,350 --> 00:09:54,399

i understand

76

00:09:59,110 --> 00:09:57,360

one more recommendation for you

77

00:10:02,310 --> 00:09:59,120

oppel after report

78

00:10:06,550 --> 00:10:02,320

please perform conservation

79

00:10:12,790 --> 00:10:06,560

of the vehicle on page 85. yes we will

80

00:10:12,800 --> 00:10:27,750

try to move the camera closer

81

00:10:37,670 --> 00:10:30,470

according to the orbital flight book

82

00:10:37,680 --> 00:10:44,949

you need to perform

83

00:10:44,959 --> 00:10:52,790

this step is on pages 33 34.

84

00:10:52,800 --> 00:10:58,069

number 18.

85

00:11:12,829 --> 00:11:01,350

everything is ready we're ready

86

00:11:15,670 --> 00:11:14,710

uh

87

00:11:17,110 --> 00:11:15,680

i just want to make sure that i

88

00:11:20,870 --> 00:11:17,120

understood you correctly so first we

89

00:11:24,790 --> 00:11:20,880

perform pages 85 to 87

90

00:11:26,150 --> 00:11:24,800

then we perform pages 33 to 34.

91

00:11:29,750 --> 00:11:26,160

and

92

00:11:31,990 --> 00:11:29,760

then we move to blue

93

00:11:36,389 --> 00:11:32,000

and move gas masks to beau

94

00:11:36,399 --> 00:11:43,829

copy thank you

95

00:11:43,839 --> 00:11:49,269

so what's the pressure

96

00:11:53,750 --> 00:11:52,069

it it's dropping

97

00:11:55,269 --> 00:11:53,760

getting a quick wave there from oleg

98

00:11:57,990 --> 00:11:55,279

artemyev

99

00:12:00,550 --> 00:11:58,000

the three on board artemis quartz off in

100

00:12:04,310 --> 00:12:00,560

swanson continuing to stand by waiting

101
00:12:06,550 --> 00:12:04,320
for that soyuz tma-13m hatch to open

102
00:12:08,310 --> 00:12:06,560
which will allow maxiray of reid wiseman

103
00:12:10,069 --> 00:12:08,320
and alexander gerst to enter their new

104
00:12:11,750 --> 00:12:10,079
home on board the international space

105
00:12:35,910 --> 00:12:11,760
station

106
00:12:35,920 --> 00:12:43,750
800 something

107
00:12:43,760 --> 00:12:46,629
dropping

108
00:12:57,670 --> 00:12:49,750
and it must be stable during two minutes

109
00:12:57,680 --> 00:13:03,110
the current pressure is seven

110
00:13:11,750 --> 00:13:06,150
it's equalizing slowly

111
00:13:11,760 --> 00:13:23,750
i love this

112
00:13:54,150 --> 00:13:25,030
so is

113
00:13:54,160 --> 00:13:59,430

oh max

114

00:13:59,440 --> 00:14:22,870

what

115

00:14:22,880 --> 00:14:31,350

absolutely

116

00:14:56,629 --> 00:14:33,389

what's

117

00:14:56,639 --> 00:15:03,430

the pressure is 700.

118

00:15:03,440 --> 00:15:22,389

and sixty-nine

119

00:15:29,749 --> 00:15:25,430

do not forget to deactivate the purging

120

00:15:29,759 --> 00:15:41,030

yes we will deactivate them in well

121

00:15:44,470 --> 00:15:42,870

and put a huge cap

122

00:15:52,550 --> 00:15:44,480

on the

123

00:15:59,509 --> 00:15:55,269

okay

124

00:15:59,519 --> 00:16:17,350

yeah no no no no

125

00:16:17,360 --> 00:16:23,749

three

126
00:16:23,759 --> 00:16:26,949
hey lee

127
00:16:44,550 --> 00:16:28,550
what's up dude

128
00:16:44,560 --> 00:17:01,749
hey

129
00:17:01,759 --> 00:17:14,390
so we're ready

130
00:17:17,510 --> 00:17:16,390
yes we have the same pressure in the

131
00:17:19,829 --> 00:17:17,520
vehicle

132
00:17:22,309 --> 00:17:19,839
yes it's the same pressure okay let's

133
00:17:24,230 --> 00:17:22,319
double check it

134
00:17:30,830 --> 00:17:24,240
okay let's spend one more minute double

135
00:17:36,789 --> 00:17:34,549
755 working to finish stabilizing or

136
00:17:40,230 --> 00:17:36,799
equalizing the pressure between the

137
00:17:41,750 --> 00:17:40,240
station and the soyuz craft

138
00:17:44,789 --> 00:17:41,760

should be just about done now should be

139

00:17:44,799 --> 00:17:49,909

yes

140

00:17:49,919 --> 00:18:10,549

and open the cap page eighty-three

141

00:18:10,559 --> 00:18:40,310

foreign

142

00:18:40,320 --> 00:18:47,990

taste

143

00:18:48,000 --> 00:19:02,870

okay let's do it carefully

144

00:19:02,880 --> 00:19:15,350

okay just wait

145

00:19:15,360 --> 00:20:03,830

foreign

146

00:20:03,840 --> 00:20:14,549

special wrench

147

00:20:14,559 --> 00:20:27,590

180 degrees

148

00:20:27,600 --> 00:20:46,870

water

149

00:20:50,230 --> 00:20:48,630

see it's moving

150

00:20:51,190 --> 00:20:50,240

that's great

151
00:20:54,070 --> 00:20:51,200
awesome

152
00:21:14,149 --> 00:20:54,080
and there it goes the hatch opened at 10

153
00:21:27,510 --> 00:21:16,149
now able to enter into the international

154
00:21:40,149 --> 00:21:28,630
hi

155
00:21:40,159 --> 00:21:53,350
i'm ready to perform page 84. okay fine

156
00:21:56,310 --> 00:21:55,190
page 84

157
00:22:08,710 --> 00:21:56,320
is complete

158
00:22:08,720 --> 00:22:14,149
okay i've checked also back up unit

159
00:22:20,070 --> 00:22:17,350
yes mccm said to perform that yes the

160
00:22:22,789 --> 00:22:20,080
crew performs that

161
00:22:54,950 --> 00:22:22,799
okay let's set up calm

162
00:23:00,390 --> 00:22:58,710
we still have five minutes on ku band

163
00:23:04,470 --> 00:23:00,400

maybe i'll be

164

00:23:10,230 --> 00:23:08,310

we're trying to do our best now

165

00:23:15,430 --> 00:23:10,240

you mean step number one

166

00:23:20,710 --> 00:23:18,230

how long will loss be

167

00:23:33,830 --> 00:23:20,720

yeah i thought my own case

168

00:23:40,149 --> 00:23:37,830

then we'll have a huge break

169

00:23:42,870 --> 00:23:40,159

no that let me know

170

00:23:55,909 --> 00:23:42,880

but in five minutes we won't be able to

171

00:24:04,630 --> 00:23:57,350

so

172

00:24:04,640 --> 00:24:27,029

wow

173

00:24:34,549 --> 00:24:28,950

so again the hatch is open waiting to

174

00:24:38,549 --> 00:24:36,630

here you can see nasa astronaut reid

175

00:24:39,990 --> 00:24:38,559

wiseman peeking out of the soyuz craft

176
00:24:56,549 --> 00:24:40,000
entering into the international space

177
00:25:00,549 --> 00:24:58,230
again this is reid wiseman's first

178
00:25:01,590 --> 00:25:00,559
flight so probably taking a few moments

179
00:25:18,710 --> 00:25:01,600
to get

180
00:25:18,720 --> 00:25:28,549
um

181
00:25:28,559 --> 00:25:54,950
uh

182
00:25:54,960 --> 00:26:12,549
hello good to see you

183
00:26:12,559 --> 00:26:18,630
now max arrive making his way out

184
00:26:23,510 --> 00:26:21,430
and this is soraya's second flight

185
00:26:35,029 --> 00:26:23,520
having previously served aboard during

186
00:26:39,750 --> 00:26:37,350
okay we all move to the service module

187
00:27:13,830 --> 00:26:39,760
now

188
00:27:23,990 --> 00:27:17,430

okay the crew is already on the station

189

00:27:24,000 --> 00:27:55,029

it

190

00:28:01,990 --> 00:27:58,470

houston station on one

191

00:28:02,000 --> 00:28:12,549

are you ready for the sound check

192

00:28:12,559 --> 00:28:19,269

stand by this one

193

00:28:23,590 --> 00:28:22,310

and swanee we are now without ku it

194

00:28:25,350 --> 00:28:23,600

sounds like we're going to press with

195

00:28:39,990 --> 00:28:25,360

audio only in the event so we don't need

196
