Greenway

1
00:00:00,111 --> 00:00:02,111
[Music]

2
00:00:02,216 --> 00:00:06,426
>> Professor Stephen Hawking
is arguably our greatest

3
00:00:06,426 --> 00:00:08,466
living cosmologist.

4
00:00:08,466 --> 00:00:09,736
Struck down in his 20's

5
00:00:09,816 --> 00:00:12,106
by a progressive
motor neuron disease,

6
00:00:12,106 --> 00:00:16,036
he's entirely paralyzed, and
can only communicate using a

7
00:00:16,036 --> 00:00:16,756
speech synthesizer.

8
00:00:17,006 --> 00:00:22,956
But when Professor Hawking
speaks, NASA listens.

9
00:00:22,956 --> 00:00:24,526
>> [Computer voice] I
fear for our future.

10
00:00:25,726 --> 00:00:28,426
Our planet Earth is threatened

11
00:00:28,426 --> 00:00:30,936
with an ever-expanding
population,

12

00:00:31,276 --> 00:00:33,346

and only finite resources.

13

00:00:33,346 --> 00:00:39,356

We need a plan B.

If our species is

14

00:00:39,356 --> 00:00:43,476

to survive the next 100

years, let alone 1,000,

15

00:00:43,736 --> 00:00:47,366

it is imperative we voyage out

into the blackness of space

16

00:00:47,626 --> 00:00:52,846

to colonize new worlds

across the cosmos.

17

00:00:52,846 --> 00:00:56,286

The ISS is pioneering

space exploration.

18

00:00:56,286 --> 00:01:00,656

Without this knowledge, travel

into deep space is impossible.

19

00:01:02,476 --> 00:01:07,336

Within 50 years, I have no

doubt there will be settlements

20

00:01:07,336 --> 00:01:10,216

on the moon, and by

the end of the century,

21

00:01:10,526 --> 00:01:14,246

I truly hope humans

will be living on Mars.

22

00:01:15,576 --> 00:01:19,866

I think the work on the ISS
will take a new generation

23

00:01:19,866 --> 00:01:21,886

of human space explorers
