

1
00:00:10,140 --> 00:00:06,389
just 24 hours ago the six crew members

2
00:00:12,779 --> 00:00:10,150
had an opportunity to conduct what now

3
00:00:14,850 --> 00:00:12,789
has been the traditional change of

4
00:00:17,990 --> 00:00:14,860
command ceremony they gathered inside

5
00:00:21,540 --> 00:00:18,000
the Japanese Kibo module for that

6
00:00:23,280 --> 00:00:21,550
activity in which max suraev formally

7
00:00:25,620 --> 00:00:23,290
handed over the reins of the command of

8
00:00:27,810 --> 00:00:25,630
the International Space Station to butch

9
00:00:30,330 --> 00:00:27,820
wilmore there were opening remarks from

10
00:00:33,660 --> 00:00:30,340
reid wiseman and alexander gerst so for

11
00:00:35,520 --> 00:00:33,670
your viewing enjoyment let's take a look

12
00:00:39,720 --> 00:00:35,530
at yesterday's change of command

13
00:00:44,010 --> 00:00:39,730

ceremony okay welcome everybody to the

14

00:00:45,810 --> 00:00:44,020

expedition 41 42 change of command this

15

00:00:48,210 --> 00:00:45,820

is reid wiseman I'm joined with Alex

16

00:00:50,160 --> 00:00:48,220

Gerst and max suraev and the three of us

17

00:00:51,510 --> 00:00:50,170

are heading out tomorrow so we just

18

00:00:53,610 --> 00:00:51,520

wanted to kick it off by saying a few

19

00:00:55,740 --> 00:00:53,620

words and for me personally this is the

20

00:00:57,720 --> 00:00:55,750

most unique ship with the most amazing

21

00:00:59,040 --> 00:00:57,730

crew and the most incredible ground

22

00:01:00,360 --> 00:00:59,050

support that I've ever worked with and

23

00:01:01,799 --> 00:01:00,370

it's been an honor and a privilege to

24

00:01:03,479 --> 00:01:01,809

spend a hundred and sixty-five days up

25

00:01:04,709 --> 00:01:03,489

here and with that said I'm looking

26
00:01:07,050 --> 00:01:04,719
forward to heading home tomorrow with

27
00:01:10,230 --> 00:01:07,060
these three with these two and I'll hand

28
00:01:15,480 --> 00:01:10,240
it over to my German colleague dr. Alex

29
00:01:18,719 --> 00:01:15,490
Gerst they say this is the most complex

30
00:01:21,149 --> 00:01:18,729
machine that humanity has ever built now

31
00:01:23,490 --> 00:01:21,159
even after half a year on board it is

32
00:01:25,490 --> 00:01:23,500
impossible for me to fathom how complex

33
00:01:28,500 --> 00:01:25,500
it is to actually operate this machine

34
00:01:30,770 --> 00:01:28,510
now what I did see and what I'm sure of

35
00:01:32,969 --> 00:01:30,780
is that this is the finest example of

36
00:01:36,270 --> 00:01:32,979
teamwork that I've ever seen in my life

37
00:01:39,870 --> 00:01:36,280
and with that I would like to say thanks

38
00:01:41,940 --> 00:01:39,880

to all the ground support teams and all

39

00:01:44,460 --> 00:01:41,950

those people who dedicated all that

40

00:01:46,590 --> 00:01:44,470

those hours of work to us and with this

41

00:01:49,649 --> 00:01:46,600

I would like to hand over to my

42

00:01:54,060 --> 00:01:49,659

commander Maxime Lee courage survived

43

00:01:56,999 --> 00:01:54,070

for the change of command okay

44

00:02:00,380 --> 00:01:57,009

and like usual these two guys they just

45

00:02:03,690 --> 00:02:00,390

stolen all my words I wanted to say and

46

00:02:06,810 --> 00:02:03,700

you know what it's really difficult to

47

00:02:09,389 --> 00:02:06,820

add something but really it was honor

48

00:02:11,520 --> 00:02:09,399

for me you know working with these guys

49

00:02:14,710 --> 00:02:11,530

and great participation from the ground

50

00:02:19,190 --> 00:02:14,720

team and thank you very much for that

51
00:02:22,910 --> 00:02:19,200
let's do it the main event of this and

52
00:02:24,880 --> 00:02:22,920
let me introduce a new commander of the

53
00:02:31,310 --> 00:02:24,890
International Space Station

54
00:02:33,340 --> 00:02:31,320
captain Bill Maher butch hey I want to

55
00:02:36,320 --> 00:02:33,350
congratulate you on a great tenure as a

56
00:02:38,630 --> 00:02:36,330
commander of this engineering marvel

57
00:02:40,730 --> 00:02:38,640
nicely done max and to the whole team

58
00:02:41,780 --> 00:02:40,740
here thanks guys it's been a wonderful

59
00:02:43,580 --> 00:02:41,790
two months we're going to miss you guys

60
00:02:46,940 --> 00:02:43,590
when you leave tomorrow and for the team

61
00:02:49,190 --> 00:02:46,950
on earth it's it's an amazing as Alex

62
00:02:50,960 --> 00:02:49,200
said it's an amazing accomplishments day

63
00:02:52,550 --> 00:02:50,970

in and day out things it takes place

64

00:02:54,380 --> 00:02:52,560

here and it doesn't happen you know

65

00:02:55,910 --> 00:02:54,390

commander of International Space Station

66

00:02:57,050 --> 00:02:55,920

I'm I'm truly honored with the

67

00:02:59,690 --> 00:02:57,060

opportunity and humbled by the

68

00:03:01,690 --> 00:02:59,700

opportunity to have this title and it's

69

00:03:04,610 --> 00:03:01,700

special for me and my family obviously

70

00:03:05,900 --> 00:03:04,620

but it's a very minor thing when you

71

00:03:07,400 --> 00:03:05,910

think about all the people literally

72

00:03:10,040 --> 00:03:07,410

around the globe working together for

73

00:03:12,830 --> 00:03:10,050

the common good of mankind and I want to

74

00:03:14,690 --> 00:03:12,840

like as they said thank everyone as we

75

00:03:49,340 --> 00:03:14,700

go forward and with that we'll say

76

00:03:50,539 --> 00:03:49,350

increment 42 has begun all right all

77

00:03:51,770 --> 00:03:50,549

right butch I didn't bring I didn't

78

00:03:54,410 --> 00:03:51,780

bring much the International Space

79

00:03:56,090 --> 00:03:54,420

Station for you buddy but but I did

80

00:03:58,729 --> 00:03:56,100

bring a command planet thanks to Judy

81

00:04:22,310 --> 00:03:58,739

for getting this for us and there you go

82

00:04:26,840 --> 00:04:25,460

and there is a view from external

83

00:04:28,670 --> 00:04:26,850

cameras on the truss of the

84

00:04:32,900 --> 00:04:28,680

International Space Station looking at

85

00:04:36,430 --> 00:04:32,910

the Soyuz TMA 13 M attached to orous

86

00:04:38,810 --> 00:04:36,440

Viet that is the vehicle that

87

00:04:42,010 --> 00:04:38,820

Sariah of Wiseman and Gerst will be

88

00:04:48,220 --> 00:04:42,020

entering a short time from now

89

00:05:02,570 --> 00:04:53,750

max you're looking good Moscow station

90

00:05:33,550 --> 00:05:07,320

and there is your departing crew Wiseman

91

00:05:40,820 --> 00:05:38,180

and the final farewells as elena serova

92

00:05:45,590 --> 00:05:40,830

wishes wiseman and Gerst all the best

93

00:05:49,559 --> 00:05:45,600

for a soft landing and barry wilmore the

94

00:05:49,569 --> 00:05:53,670

you

95

00:05:59,760 --> 00:05:56,280

suraiah of and Wiseman endorsed now

96

00:06:58,230 --> 00:05:59,770

making their way inside the Soyuz TMA 13

97

00:07:05,200 --> 00:07:01,900

the shirt that max suraev is wearing

98

00:07:08,200 --> 00:07:05,210

came from his children delivered on a

99

00:07:20,710 --> 00:07:08,210

progress vehicle written on the shirt

100

00:07:27,950 --> 00:07:23,809

alexander samokutyaev also a saying

101
00:07:30,589 --> 00:07:27,960
farewell to the three crew members and

102
00:07:35,379 --> 00:07:30,599
that's butch wilmore they're saying

103
00:07:41,689 --> 00:07:38,330
friend reid wiseman and alexander gerst

104
00:08:22,530 --> 00:07:41,699
of course final farewells prior to the

105
00:08:32,589 --> 00:08:25,380
okay - booth Parappa stupid exactly TV

106
00:08:32,599 --> 00:08:46,809
yeah

107
00:08:51,860 --> 00:08:51,290
and as the crew prepares to close the

108
00:08:54,079 --> 00:08:51,870
hatch

109
00:09:01,460 --> 00:08:54,089
to the Soyuz the vehicle is now on

110
00:09:04,850 --> 00:09:01,470
autonomous power one final picture being

111
00:09:07,639 --> 00:09:04,860
taken by the crew remaining onboard the

112
00:09:09,740 --> 00:09:07,649
International Space Station some akuti I

113
00:09:12,019 --> 00:09:09,750

of the Soyuz commander of the other

114

00:09:14,629 --> 00:09:12,029

Soyuz that has docked to the station he

115

00:09:15,920 --> 00:09:14,639

was at the controls of the Soyuz for its

116

00:09:21,889 --> 00:09:15,930

launch and docking to the International

117

00:09:23,990 --> 00:09:21,899

Space Station back on September 26th

118

00:10:05,960 --> 00:09:24,000

when he launched from Baikonur along

119

00:10:10,410 --> 00:10:08,340

we're going to be losing our downlink

120

00:10:13,410 --> 00:10:10,420

television signal from the station here

121

00:10:16,739 --> 00:10:13,420

shortly again the three departing crew

122

00:10:20,400 --> 00:10:16,749

members max suraev reid wiseman and

123

00:10:24,030 --> 00:10:20,410

alexander gerst are inside the soyuz tma

124

00:10:27,090 --> 00:10:24,040

13m the spacecraft is on autonomous

125

00:10:29,549 --> 00:10:27,100

power alexander samokutyaev will be

126

00:10:31,889 --> 00:10:29,559

working with a suraíh of to close their

127

00:10:50,850 --> 00:10:31,899

respective hatches just a moment or two

128

00:10:52,859 --> 00:10:50,860

from now - personal super person is

129

00:10:56,340 --> 00:10:52,869

pretty nice as much it so Mozilla

130

00:11:00,030 --> 00:10:56,350

protein honesty toward the possibilities

131

00:11:05,579 --> 00:11:00,040

accreta restricted in career as a singer

132

00:11:08,369 --> 00:11:05,589

it does go pro this holidays principal

133

00:11:10,799 --> 00:11:08,379

show your opponent if I was in this

134

00:11:12,929 --> 00:11:10,809

experience the creature one of the

135

00:11:35,760 --> 00:11:12,939

culture it's excellent and we risk will

136

00:11:43,720 --> 00:11:40,150

one final check by Sariah with russian

137

00:11:46,390 --> 00:11:43,730

mission controllers in cardiff prior to

138

00:11:48,880 --> 00:11:46,400

hatch closure on the camera

139

00:11:52,780 --> 00:11:48,890

configurations for the Soyuz spacecraft

140

00:11:54,730 --> 00:11:52,790

both inside and for the exterior

141

00:11:58,210 --> 00:11:54,740

engineering view and there goes the

142

00:12:00,190 --> 00:11:58,220

hatch on the soyuz side suryya of
