

1  
00:00:01,000 --> 00:00:05,540

Hi I'm Brad Paisley, and I'm personally inspired  
by NASA exploration.

2  
00:00:05,540 --> 00:00:10,139

I even wrote a song about it, called American  
Flag on the Moon.

3  
00:00:10,139 --> 00:00:14,700

But did you know that NASA is taking the Next  
Giant Leap on a Journey to Mars that will

4  
00:00:14,700 --> 00:00:17,260

send humans there in our lifetime?

5  
00:00:17,260 --> 00:00:18,400  
(Music)

6  
00:00:18,400 --> 00:00:25,220  
:: Today I dare you to dream ::

7  
00:00:25,220 --> 00:00:26,510  
:: Go on believe impossible things ::

8  
00:00:26,510 --> 00:00:27,510  
(Music)

9  
00:00:27,510 --> 00:00:30,950  
Across the country and in space, NASA is testing  
the new technologies to put astronauts on

10  
00:00:30,950 --> 00:00:35,940  
the Red Planet, like the Orion Spacecraft  
and Space Launch System rocket.

11  
00:00:35,940 --> 00:00:40,460  
And of course astronauts above us on the International  
Space Station are learning how humans can

12

00:00:40,460 --> 00:00:43,059

live in space for longer periods.

13

00:00:43,059 --> 00:00:46,820

Learn more about our Journey to Mars at [www.nasa.gov](http://www.nasa.gov).

14

00:00:46,820 --> 00:00:48,520

(Music)
