

1
00:00:04,789 --> 00:00:03,590
and no challenge

2
00:00:06,550 --> 00:00:04,799
no challenge

3
00:00:23,150 --> 00:00:06,560
poses a greater threat to future

4
00:00:29,750 --> 00:00:26,630
2014 was the planet's warmest year on

5
00:00:33,910 --> 00:00:32,069
now one year doesn't make a trend

6
00:00:37,270 --> 00:00:33,920
but this does

7
00:00:39,430 --> 00:00:37,280
14 of the 15 warmest years on record

8
00:00:42,389 --> 00:00:39,440
have all fallen in the first 15 years of

9
00:00:46,229 --> 00:00:44,549
i've heard some folks try to dodge the

10
00:00:47,590 --> 00:00:46,239
evidence by saying they're not

11
00:00:48,950 --> 00:00:47,600
scientists

12
00:00:50,709 --> 00:00:48,960
that we don't have enough information to

13
00:00:51,590 --> 00:00:50,719

act

14

00:00:53,350 --> 00:00:51,600

well

15

00:00:54,790 --> 00:00:53,360

i'm not a scientist either

16

00:00:56,869 --> 00:00:54,800

but you know what

17

00:00:59,750 --> 00:00:56,879

i know a lot of really good scientists

18

00:01:01,830 --> 00:00:59,760

at nasa and at noaa and at our major

19

00:01:04,070 --> 00:01:01,840

universities and the best scientists in

20

00:01:06,149 --> 00:01:04,080

the world are all telling us that our

21

00:01:08,870 --> 00:01:06,159

activities are changing the climate

22

00:01:11,830 --> 00:01:08,880

and if we don't act forcefully

23

00:01:14,630 --> 00:01:11,840

we'll continue to see rising oceans

24

00:01:17,030 --> 00:01:14,640

longer hotter heat waves

25

00:01:18,950 --> 00:01:17,040

dangerous droughts and floods

26

00:01:21,590 --> 00:01:18,960

and massive disruptions that can trigger

27

00:01:24,550 --> 00:01:21,600

greater migration and conflict and

28

00:01:26,310 --> 00:01:24,560

hunger around the globe

29

00:01:28,390 --> 00:01:26,320

the pentagon says that climate change

30

00:01:32,069 --> 00:01:28,400

poses immediate risks to our national

31

00:01:39,429 --> 00:01:32,079

security we should act like it

32

00:01:44,389 --> 00:01:42,310

that's why over the past six years

33

00:01:46,550 --> 00:01:44,399

we've done more than ever to
