23

00:00:54,500 --> 00:00:52,680

assembled together the joy the fun that

done together has just truly been

26

00:00:59,840 --> 00:00:57,360

27

00:01:00,470 --> 00:00:59,850

such a joy my Russian crewmates Sasha

28

00:01:03,280 --> 00:01:00,480

00:01:18,620 --> 00:01:15,540

and to the upcoming commander Colonel

36

00:01:23,929 --> 00:01:18,630

verts now is the time so with that as we

37

00:01:24,890 --> 00:01:23,939

say in the Navy you have the helm thanks

38

00:01:27,620 --> 00:01:24,900

butch I appreciate that

39

00:01:29,660 --> 00:01:27,630

and I'll say first of all thank you for

40

00:01:31,850 --> 00:01:29,670

the amazing job you've done as commander

41

00:01:33,620 --> 00:01:31,860

you have been a perfect example for us

42

00:01:35,870 --> 00:01:33,630

you're exactly what a space station

43

00:01:37,969 --> 00:01:35,880

commander should be and it's been a real

44

00:01:40,490 --> 00:01:37,979

blessing to have you I mean you have

45

00:01:42,950 --> 00:01:40,500

been perfect and I just I'm so thankful

46

00:01:46,219 --> 00:01:42,960

to have had you as our commander I know

47

00:01:47,480 --> 00:01:46,229

we all are I know I've been so lucky to

48

00:01:49,609 --> 00:01:47,490

have the crew that we have like you said

49

00:01:52,550 --> 00:01:49,619

I just can't think of a better group of

50

00:01:55,069 --> 00:01:52,560

folks and on 43 I'm so blessed to have

51  
00:01:57,709 --> 00:01:55,079  
Samantha and Anton and soon to be joined

52  
00:01:58,999 --> 00:01:57,719  
by Scott and Misha and Jenna we have a

53  
00:02:00,560 --> 00:01:59,009  
great crew but it's been an amazing

54  
00:02:03,499 --> 00:02:00,570  
you've been a great commander for four

55  
00:02:04,999 --> 00:02:03,509  
months and I appreciate it I do want to

56  
00:02:06,670 --> 00:02:05,009  
say thank you to my family without them

57  
00:02:09,710 --> 00:02:06,680  
this would not have been possible and

58  
00:02:11,040 --> 00:02:09,720  
without their support and so I really

59  
00:02:14,910 --> 00:02:11,050  
appreciate that from them

60  
00:02:17,040 --> 00:02:14,920  
and I also want to say how lucky I am to

61  
00:02:18,360 --> 00:02:17,050  
have Scott Stover as my lead flight

62  
00:02:20,280 --> 00:02:18,370  
director and Todd he'll nurse my

63  
00:02:22,080 --> 00:02:20,290

increment manager and the whole team if

64

00:02:24,210 --> 00:02:22,090

those that those guys lead on the ground

65

00:02:26,640 --> 00:02:24,220

you can't do something like a space

66

00:02:28,050 --> 00:02:26,650

station expedition without an amazing

67

00:02:31,200 --> 00:02:28,060

support team on the ground so we really

68

00:02:32,880 --> 00:02:31,210

appreciate that we're looking forward to

69

00:02:34,470 --> 00:02:32,890

doing world-class science like we have

70

00:02:36,000 --> 00:02:34,480

been doing we're looking forward to

71

00:02:37,680 --> 00:02:36,010

keeping the station running and getting

72

00:02:41,490 --> 00:02:37,690

it reconfigured for the future vehicles

73

00:02:42,990 --> 00:02:41,500

that we're gonna have and we're looking

74

00:02:44,400 --> 00:02:43,000

forward to getting Scott and Misha off

75

00:02:46,290 --> 00:02:44,410

on a right foot for their year-long

76

00:02:48,090 --> 00:02:46,300

mission so expedition 43 is going to be

77

00:02:50,250 --> 00:02:48,100

a short expedition but it's gonna be

78

00:02:52,320 --> 00:02:50,260

busy and it's gonna be a good one so the

79

00:02:54,720 --> 00:02:52,330

crew of expedition 43 is ready to get to

80

00:03:17,640 --> 00:02:54,730

work but first we need to get in proper

81

00:03:21,000 --> 00:03:20,070

82

00:03:23,430 --> 00:03:21,010
