

1
00:00:00,700 --> 00:00:11,000

[Music]

2
00:00:11,000 --> 00:00:17,130

We're on a journey, a journey that started
with the dreams and determination of men and

3
00:00:17,130 --> 00:00:19,470

women around this nation.

4
00:00:19,470 --> 00:00:25,290

A journey that set course from Florida's
Spacecoast. A journey of real innovators from

5
00:00:25,290 --> 00:00:30,680

California's Silicon Valley. A voyage of
experimentation soaring above the Tidewater

6
00:00:30,680 --> 00:00:35,630

Region and the high southern desert of California.

7
00:00:35,630 --> 00:00:41,140

One of humankind's greatest adventures,
a magnificent journey that took vision from

8
00:00:41,140 --> 00:00:47,750

Texas to Ohio, from Louisiana to Alabama,
and from all around this great nation.

9
00:00:47,750 --> 00:00:56,829

The start of anything substantial begins with
a dream, from dreamers come documents and

10
00:00:56,829 --> 00:01:03,640

plans...onward to projects, and field test.

11
00:01:03,640 --> 00:01:10,040

That moment of execution comes as the dream
lights up and literally burst into reality.

12

00:01:10,040 --> 00:01:11,720

[rocket blast]

13

00:01:11,720 --> 00:01:13,399

And ignition...

14

00:01:13,399 --> 00:01:14,430

Welcome to NASA.

15

00:01:14,430 --> 00:01:20,720

Where everyday, at every NASA center these dreams come true; in offices, cubicles, hallways,

16

00:01:20,720 --> 00:01:22,190

hangers and clean rooms.

17

00:01:22,190 --> 00:01:28,780

On launch pads, in cockpits, at desktop observatories and continually for more than 15 years aboard

18

00:01:28,780 --> 00:01:34,120

the international space station.

19

00:01:34,120 --> 00:01:42,400

Investments in NASA are creating jobs across America, innovative jobs that are critical

20

00:01:42,400 --> 00:01:50,250

to our Journey to Mars.

21

00:01:50,250 --> 00:01:53,850

Jobs that make air travel safer, and increase knowledge of our ever-changing home planet's

22

00:01:53,850 --> 00:01:54,180

climate.

23

00:01:54,180 --> 00:01:57,979

Our journey of exploration continues, not
as a dream but as a reality.

24

00:01:57,979 --> 00:02:03,710

We are reaching new heights, and revealing
the unknown for the benefit of all humankind.

25

00:02:03,710 --> 00:02:05,700

Everyday and on every project.

26

00:02:12,269 --> 00:02:09,349

We are your National Aeronautics and Space
Administration.
