

1
00:00:48,960 --> 00:01:02,709
oh

2
00:01:02,719 --> 00:01:06,789
everything is good

3
00:01:06,799 --> 00:01:12,469
take him by the arms

4
00:01:28,469 --> 00:01:13,830
be careful

5
00:01:45,990 --> 00:01:30,789
welcome

6
00:01:46,000 --> 00:01:54,630
very good

7
00:02:02,310 --> 00:01:57,429
it's an honor to be participating in

8
00:02:05,510 --> 00:02:03,670
and first of all

9
00:02:06,830 --> 00:02:05,520
we would like to present

10
00:02:10,469 --> 00:02:06,840
bread and

11
00:02:13,110 --> 00:02:10,479
salt this is our custom

12
00:02:14,869 --> 00:02:13,120
i would like to congratulate you

13
00:02:16,550 --> 00:02:14,879

on such an enormous

14

00:02:29,830 --> 00:02:16,560

achievement

15

00:02:36,949 --> 00:02:32,150

i would like to welcome you to

16

00:02:38,710 --> 00:02:36,959

kazakhstan to our land

17

00:02:42,150 --> 00:02:38,720

and

18

00:02:44,229 --> 00:02:42,160

it is very dear now not only to the

19

00:02:45,110 --> 00:02:44,239

people who were born here but to all of

20

00:02:49,270 --> 00:02:45,120

you

21

00:02:51,430 --> 00:02:49,280

motherland now

22

00:02:53,350 --> 00:02:51,440

for me of course it's the first

23

00:02:57,030 --> 00:02:53,360

motherland

24

00:02:58,949 --> 00:02:57,040

and i'm happy and honored to welcome you

25

00:03:00,149 --> 00:02:58,959

all especially

26

00:03:02,229 --> 00:03:00,159

sergey

27

00:03:04,869 --> 00:03:02,239

who used to be my student

28

00:03:07,270 --> 00:03:04,879

and mikhail korniyanka with whom i

29

00:03:09,350 --> 00:03:07,280

worked a lot and of course mr scott

30

00:03:12,470 --> 00:03:09,360

kelly

31

00:03:15,670 --> 00:03:12,480

congratulations on your record

32

00:03:20,550 --> 00:03:15,680

of course it was already done 28 years

33

00:03:29,910 --> 00:03:24,550

did it in 1978 they achieved

34

00:03:35,350 --> 00:03:33,430

so this is a big achievement and we

35

00:03:36,550 --> 00:03:35,360

congratulate

36

00:03:40,309 --> 00:03:36,560

the

37

00:03:46,229 --> 00:03:42,789

and we're happy to see you in good mood

38

00:03:51,110 --> 00:03:48,390

and i'm honored

39

00:03:53,030 --> 00:03:51,120

to be empowered by the president

40

00:04:01,990 --> 00:03:53,040

of my country

41

00:04:08,390 --> 00:04:05,270

presented to commander

42

00:04:09,830 --> 00:04:08,400

volkov sergey alexandrovich for his

43

00:04:14,869 --> 00:04:09,840

courage

44

00:04:16,949 --> 00:04:14,879

and his willingness to work with others

45

00:04:19,909 --> 00:04:16,959

especially for his achievements in

46

00:04:24,310 --> 00:04:19,919

september of last year

47

00:04:24,320 --> 00:04:37,430

forever

48

00:04:37,440 --> 00:04:43,030

um

49

00:04:54,310 --> 00:04:45,590

again i'm proud to present the

50

00:04:59,350 --> 00:04:57,830

and also the supporting documentation

51
00:05:06,230 --> 00:04:59,360
thank you

52
00:05:11,510 --> 00:05:07,830
of course

53
00:05:17,830 --> 00:05:11,520
we are happy to be here in kazakhstan

54
00:05:17,840 --> 00:05:22,230
it's not our first landing here

55
00:05:27,749 --> 00:05:24,310
and we're happy that everything went

56
00:05:32,070 --> 00:05:29,590
and so happy to

57
00:05:35,590 --> 00:05:32,080
see all you here again

58
00:05:39,110 --> 00:05:37,830
and we are so glad to have such a good

59
00:05:44,629 --> 00:05:39,120
landing

60
00:05:49,590 --> 00:05:47,430
dear colleagues sergey mikhail scott

61
00:05:51,670 --> 00:05:49,600
i want to congratulate you

62
00:05:54,070 --> 00:05:51,680
on successful accomplishment of your

63
00:05:56,150 --> 00:05:54,080

flight program

64

00:06:08,950 --> 00:05:56,160

all the best to you

65

00:06:08,960 --> 00:06:14,309

what a face

66

00:06:14,319 --> 00:06:20,230

you look just like it

67

00:06:31,029 --> 00:06:22,550

thank you

68

00:06:31,039 --> 00:06:53,510

after a year stop would you consider

69

00:06:58,469 --> 00:06:56,230

okay guys go on

70

00:07:01,270 --> 00:06:58,479

astronaut scott kelly back from an

71

00:07:03,430 --> 00:07:01,280

amazing year in space an amazing landing

72

00:07:05,589 --> 00:07:03,440

scott welcome home

73

00:07:07,749 --> 00:07:05,599

describe the first impressions you had

74

00:07:10,309 --> 00:07:07,759

when the hatch was open

75

00:07:11,830 --> 00:07:10,319

you smelled that cold crisp air and your

76

00:07:13,670 --> 00:07:11,840

first thoughts back on earth after a

77

00:07:16,550 --> 00:07:13,680

year

78

00:07:17,990 --> 00:07:16,560

the cold air was amazing for you know

79

00:07:19,749 --> 00:07:18,000

fresh air is

80

00:07:21,589 --> 00:07:19,759

you know the air

81

00:07:23,670 --> 00:07:21,599

i don't mean to say it's not fresh on

82

00:07:26,230 --> 00:07:23,680

the space station but it's uh there's

83

00:07:29,110 --> 00:07:26,240

nothing like you know new cold air

84

00:07:31,430 --> 00:07:29,120

coming into the uh the capsule and

85

00:07:33,670 --> 00:07:31,440

um the actual burning smell of the

86

00:07:35,670 --> 00:07:33,680

capsule takes a little dart smells a

87

00:07:37,830 --> 00:07:35,680

little bit like some kind of uh you know

88

00:07:40,150 --> 00:07:37,840

fragrance it's kind of an odd smell and

89

00:07:41,990 --> 00:07:40,160

i actually thought it was the vegetation

90

00:07:44,950 --> 00:07:42,000

initially so that was

91

00:07:46,869 --> 00:07:44,960

you know different i guess

92

00:07:48,710 --> 00:07:46,879

before you launched a year ago to avoid

93

00:07:51,110 --> 00:07:48,720

the calendar to stop looking at the

94

00:07:52,629 --> 00:07:51,120

clock to mark the passage of time

95

00:07:55,110 --> 00:07:52,639

but it must have been an overwhelming

96

00:07:57,830 --> 00:07:55,120

feeling of relief when you got outside

97

00:07:59,350 --> 00:07:57,840

your mission was at an end yeah i you

98

00:08:00,790 --> 00:07:59,360

know i think i did a pretty good job of

99

00:08:04,150 --> 00:08:00,800

that um

100

00:08:05,830 --> 00:08:04,160

i wouldn't say it was a relief um

101
00:08:08,309 --> 00:08:05,840
it was uh you know leaving the space

102
00:08:10,070 --> 00:08:08,319
station was was a bittersweet you know

103
00:08:11,270 --> 00:08:10,080
i've been there a long time so i look

104
00:08:13,189 --> 00:08:11,280
forward to

105
00:08:15,110 --> 00:08:13,199
to leaving but at the same time you know

106
00:08:17,749 --> 00:08:15,120
it's a magnificent place and i'm gonna

107
00:08:18,869 --> 00:08:17,759
miss it so uh you know mixed emotions i

108
00:08:20,309 --> 00:08:18,879
guess

109
00:08:23,670 --> 00:08:20,319
you talked a lot during the mission

110
00:08:25,350 --> 00:08:23,680
about uh missing people back on earth

111
00:08:26,550 --> 00:08:25,360
so when the crowd was around you outside

112
00:08:27,749 --> 00:08:26,560
the capsule

113
00:08:30,070 --> 00:08:27,759

what did you think with all that

114

00:08:32,550 --> 00:08:30,080

adoration being heaped upon you and your

115

00:08:33,670 --> 00:08:32,560

crew i i thought it was great to see all

116

00:08:35,589 --> 00:08:33,680

you know all those people there

117

00:08:37,029 --> 00:08:35,599

especially you recognize a lot of the

118

00:08:39,589 --> 00:08:37,039

people friends

119

00:08:41,430 --> 00:08:39,599

you know people that you've worked with

120

00:08:43,509 --> 00:08:41,440

you know in the us and

121

00:08:45,990 --> 00:08:43,519

and in in russia

122

00:08:47,670 --> 00:08:46,000

for some cases decades so it's great to

123

00:08:48,870 --> 00:08:47,680

see everybody

124

00:08:50,710 --> 00:08:48,880

you said in the change of command

125

00:08:54,070 --> 00:08:50,720

ceremony the other day

126

00:08:55,990 --> 00:08:54,080

you looked at misha and said we did it

127

00:08:58,150 --> 00:08:56,000

did the enormity of what you really have

128

00:08:59,750 --> 00:08:58,160

accomplished here a year in space has it

129

00:09:01,590 --> 00:08:59,760

washed over you at all have you had two

130

00:09:02,870 --> 00:09:01,600

seconds to think about it well you know

131

00:09:04,949 --> 00:09:02,880

when i said that i was trying to make

132

00:09:07,509 --> 00:09:04,959

the point of make a point and i said you

133

00:09:09,430 --> 00:09:07,519

know we have been saying to each other

134

00:09:11,750 --> 00:09:09,440

you know we we did it but it's really

135

00:09:13,269 --> 00:09:11,760

not about us i mean there's a lot of

136

00:09:15,670 --> 00:09:13,279

you know thousands of people that go

137

00:09:17,590 --> 00:09:15,680

into this and you know their jobs are

138

00:09:19,750 --> 00:09:17,600

just as important because

139

00:09:21,110 --> 00:09:19,760

it's kind of like a lincoln in a chain

140

00:09:22,710 --> 00:09:21,120

if if you

141

00:09:25,430 --> 00:09:22,720

you know break one of them the chain

142

00:09:27,030 --> 00:09:25,440

breaks so everyone's important in doing

143

00:09:31,350 --> 00:09:27,040

something

144

00:09:34,470 --> 00:09:32,949

it's great doing it with him though he's

145

00:09:36,710 --> 00:09:34,480

a great guy

146

00:09:39,430 --> 00:09:36,720

the mission's over the science begins

147

00:09:42,070 --> 00:09:39,440

now and it was all really about all the

148

00:09:43,829 --> 00:09:42,080

biomedical work to try to

149

00:09:45,509 --> 00:09:43,839

begin the journey to mars learn more

150

00:09:48,310 --> 00:09:45,519

about the ability to

151
00:09:51,110 --> 00:09:48,320
stay in space for a year or more

152
00:09:53,269 --> 00:09:51,120
how do you feel and and looking back on

153
00:09:55,350 --> 00:09:53,279
it how difficult was this year aboard

154
00:09:59,829 --> 00:09:55,360
the station

155
00:10:01,990 --> 00:09:59,839
a year is a long time you know i uh

156
00:10:03,269 --> 00:10:02,000
you know i felt like i'd been up there

157
00:10:05,110 --> 00:10:03,279
my whole life

158
00:10:05,990 --> 00:10:05,120
you know after about the first six

159
00:10:07,590 --> 00:10:06,000
months

160
00:10:09,190 --> 00:10:07,600
which is like the normal increment

161
00:10:11,269 --> 00:10:09,200
normal increment is about six months and

162
00:10:12,630 --> 00:10:11,279
that's a long time so years really

163
00:10:14,949 --> 00:10:12,640

really long

164

00:10:17,269 --> 00:10:14,959

but uh i'm definitely encouraged on our

165

00:10:19,910 --> 00:10:17,279

ability to go even longer i mean i kind

166

00:10:21,990 --> 00:10:19,920

of you know even though i look forward

167

00:10:24,630 --> 00:10:22,000

to coming home and there's things that i

168

00:10:27,350 --> 00:10:24,640

miss i felt like if it was for the

169

00:10:30,710 --> 00:10:27,360

right reason i clearly could have stayed

170

00:10:33,350 --> 00:10:30,720

you know however long it took

171

00:10:35,110 --> 00:10:33,360

okay

172

00:10:37,350 --> 00:10:35,120

and finally scott uh

173

00:10:39,110 --> 00:10:37,360

looking back uh if you had to sit down

174

00:10:40,790 --> 00:10:39,120

right now and write an account of the

175

00:10:43,350 --> 00:10:40,800

most significant significant

176

00:10:45,430 --> 00:10:43,360

accomplishment of your year in space

177

00:10:46,630 --> 00:10:45,440

that you spent with mikhail korniyenko

178

00:10:48,150 --> 00:10:46,640

what do you think it would be and what

179

00:10:50,069 --> 00:10:48,160

do you think the most lasting impact

180

00:10:52,710 --> 00:10:50,079

will be of this odyssey

181

00:10:54,870 --> 00:10:52,720

you know i i think

182

00:10:57,110 --> 00:10:54,880

you know expanding our

183

00:10:58,790 --> 00:10:57,120

envelope and our ability to operate in

184

00:11:01,670 --> 00:10:58,800

space is something that's going to take

185

00:11:05,430 --> 00:11:01,680

us further from this planet

186

00:11:08,230 --> 00:11:05,440

i believe that that is uh doing that

187

00:11:11,509 --> 00:11:08,240

exploring and you know developing

188

00:11:12,470 --> 00:11:11,519

technology to to do so is very important

189

00:11:18,870 --> 00:11:12,480

to

190

00:11:21,750 --> 00:11:18,880

uh way of life so

191

00:11:25,190 --> 00:11:21,760

i think you know misha and i were were a

192

00:11:26,949 --> 00:11:25,200

small part in in doing that and uh

193

00:11:29,509 --> 00:11:26,959

and i hope we continue to do it and i

194

00:11:31,350 --> 00:11:29,519

think we will and you know by going to

195

00:11:33,990 --> 00:11:31,360

mars one day it'll make

196

00:11:37,750 --> 00:11:34,000

make things better here on earth so i'm

197

00:11:42,710 --> 00:11:40,710

miguel kornyenko back home on earth

198

00:11:45,030 --> 00:11:42,720

after a year in space uh misha

199

00:11:47,269 --> 00:11:45,040

congratulations on your mission

200

00:11:50,069 --> 00:11:47,279

what were your first impressions when uh

201
00:11:52,310 --> 00:11:50,079
you left the soyuz capsule and saw all

202
00:12:23,430 --> 00:11:52,320
of the people around you and smelled

203
00:12:27,670 --> 00:12:25,190
first feeling of course and first

204
00:12:29,670 --> 00:12:27,680
impression is the air back on earth

205
00:12:31,350 --> 00:12:29,680
during the entire flight just like scott

206
00:12:33,350 --> 00:12:31,360
i wanted to see earth and i wanted to

207
00:13:00,470 --> 00:12:33,360
smell that fresh air this is an

208
00:13:04,150 --> 00:13:02,710
and i was very happy to see so many

209
00:13:06,550 --> 00:13:04,160
friends around

210
00:13:08,230 --> 00:13:06,560
russian friends u.s friends kazakh

211
00:13:10,389 --> 00:13:08,240
friends and it was very impressive for

212
00:13:12,629 --> 00:13:10,399
me they did everything for our mission

213
00:13:14,550 --> 00:13:12,639

to be successful and i hope that we did

214

00:13:16,550 --> 00:13:14,560

it successfully

215

00:13:18,710 --> 00:13:16,560

and finally misha

216

00:13:21,990 --> 00:13:18,720

this a year in space as scott has

217

00:13:24,310 --> 00:13:22,000

mentioned a very very long time but

218

00:13:26,150 --> 00:13:24,320

you pulled off an incredible

219

00:13:27,829 --> 00:13:26,160

accomplishment here

220

00:13:29,590 --> 00:13:27,839

what would you consider to be the most

221

00:13:31,030 --> 00:13:29,600

significant accomplishment of this

222

00:13:57,750 --> 00:13:31,040

record-breaking mission aboard the

223

00:13:57,760 --> 00:14:14,870

um

224

00:14:17,750 --> 00:14:16,470

we conducted a lot of scientific

225

00:14:20,069 --> 00:14:17,760

experiments

226

00:14:22,310 --> 00:14:20,079

successfully we did not fail any as far

227

00:14:23,990 --> 00:14:22,320

as i'm aware and we're so glad about

228

00:14:25,910 --> 00:14:24,000

that and the results of those scientific

229

00:14:28,230 --> 00:14:25,920

experiments they will continue to be

230

00:14:30,069 --> 00:14:28,240

analyzed by scientists here and i hope
