

The image shows two spacecraft in space against a background of Earth's clouds. On the left is a white, cylindrical module with a complex structure, likely part of the International Space Station. On the right is the Orbital ATK CRS-6 Cygnus cargo spacecraft, which is cylindrical with a gold-colored thermal blanket and a large, gold-colored solar panel array. The text is overlaid on the image in white boxes.

rendezvous and Capture
the Orbital/ATK CRS-6 Cygnus
spacecraft at the ISS

Saturday March 26

Coverage Begins

5:30 a.m.
