

1  
00:00:07,039 --> 00:00:02,270  
station this is Houston are you ready

2  
00:00:14,600 --> 00:00:12,950  
I'm ready for the event and astronauts

3  
00:00:17,150 --> 00:00:14,610  
club of Japan this is Mission Control

4  
00:00:24,890 --> 00:00:17,160  
Houston please call station for a voice

5  
00:00:35,299 --> 00:00:28,160  
shoot them this is youngest announced

6  
00:00:39,080 --> 00:00:35,309  
crowd of Japan poco how do you hear me I

7  
00:00:44,229 --> 00:00:39,090  
can hear you love ya y Scarlets you're

8  
00:00:51,170 --> 00:00:48,079  
I he I hear you loud and clear

9  
00:00:59,450 --> 00:00:51,180  
very nice to meet you mr. onishi good

10  
00:01:02,719 --> 00:00:59,460  
evening on the ground yes mr. Konishi we

11  
00:01:05,359 --> 00:01:02,729  
are I am casada and kojima of young

12  
00:01:07,940 --> 00:01:05,369  
astronaut club space brothers we are

13  
00:01:11,750 --> 00:01:07,950

here in Tokyo and also from letter

14

00:01:13,460 --> 00:01:11,760

nagano is color and also miyazaki and

15

00:01:15,050 --> 00:01:13,470

there are a lot of students i get that

16

00:01:16,670 --> 00:01:15,060

are gathering here and they are very

17

00:01:20,810 --> 00:01:16,680

much looking forward to speaking with

18

00:01:24,620 --> 00:01:20,820

you Tony she hi

19

00:01:27,980 --> 00:01:24,630

amazon baba is not a drama that looks

20

00:01:33,190 --> 00:01:27,990

like Tomas is XO to cause you know

21

00:01:36,620 --> 00:01:33,200

good evening I can hear you very well

22

00:01:40,010 --> 00:01:36,630

you're cheering up I am Korea only she

23

00:01:42,520 --> 00:01:40,020

and Jackson I am flying over 400

24

00:01:45,770 --> 00:01:42,530

kilometer about the our time at the

25

00:01:48,890 --> 00:01:45,780

International Space Station and in cable

26

00:01:52,850 --> 00:01:48,900

which is Japan's experiment module very

27

00:01:54,770 --> 00:01:52,860

happy to be with you here today so we

28

00:01:56,360 --> 00:01:54,780

would like to start from Tokyo venue

29

00:02:04,800 --> 00:01:56,370

first done

30

00:02:10,360 --> 00:02:04,810

yoshimura San please I'm second grader

31

00:02:13,870 --> 00:02:10,370

and my name is very itchy oshima again

32

00:02:22,770 --> 00:02:13,880

down now dark web sounds to you here in

33

00:02:31,300 --> 00:02:26,890

hi and to know this man took those ashes

34

00:02:35,230 --> 00:02:31,310

guys sticky muskoka was not there

35

00:02:39,090 --> 00:02:35,240

well the sound in space then let's be

36

00:02:41,590 --> 00:02:39,100

quiet and hear the sound of the space

37

00:02:44,860 --> 00:02:41,600

don't know thank you my second there and

38

00:02:47,950 --> 00:02:44,870

all tuesdays on la que con hola

39

00:02:49,060 --> 00:02:47,960

ok no customers the picture hear the

40

00:02:53,830 --> 00:02:49,070

sound

41

00:02:56,260 --> 00:02:53,840

actually in international space station

42

00:02:59,500 --> 00:02:56,270

there are quite a lot of noise and they

43

00:03:03,580 --> 00:02:59,510

mainly mechanical sound if you are on

44

00:03:06,040 --> 00:03:03,590

the ground you have the air that is

45

00:03:08,050 --> 00:03:06,050

cycling naturally but here on

46

00:03:09,280 --> 00:03:08,060

international international space

47

00:03:11,650 --> 00:03:09,290

station we have to make those

48

00:03:14,230 --> 00:03:11,660

circulation of air and officially

49

00:03:17,199 --> 00:03:14,240

therefore we have something like fun

50

00:03:19,600 --> 00:03:17,209

that is going around 24 hours a day so

51  
00:03:22,030 --> 00:03:19,610  
we hear that kind of sound and also

52  
00:03:26,080 --> 00:03:22,040  
other types of machines that are running

53  
00:03:29,520 --> 00:03:26,090  
so it is rather noisy but here in cable

54  
00:03:33,220 --> 00:03:29,530  
module this is one of the most quiet

55  
00:03:35,620 --> 00:03:33,230  
location so it is rather quiet now at

56  
00:03:39,040 --> 00:03:35,630  
this moment here probably you didn't

57  
00:03:42,070 --> 00:03:39,050  
hear much when I had the microphone on

58  
00:03:45,460 --> 00:03:42,080  
for you that so this room is very

59  
00:03:47,770 --> 00:03:45,470  
popular among gather astronauts so let

60  
00:03:49,570 --> 00:03:47,780  
us not the astronaut to use this psych

61  
00:03:53,800 --> 00:03:49,580  
eval module thank you very much with a

62  
00:03:56,170 --> 00:03:53,810  
good question thank you very much so

63  
00:04:01,060 --> 00:03:56,180

it's really very adorable but now from

64

00:04:05,170 --> 00:04:01,070

where the site mystic atleast hello I'm

65

00:04:07,580 --> 00:04:05,180

sixth-grader my name is no tsuzuki huge

66

00:04:10,940 --> 00:04:07,590

cost and got the same

67

00:04:14,720 --> 00:04:10,950

what do you think the world's

68

00:04:16,909 --> 00:04:14,730

expectations of Japan regarding space

69

00:04:19,640 --> 00:04:16,919

travel because I'm really happy that the

70

00:04:22,159 --> 00:04:19,650

japanese astronaut saw there and doing a

71

00:04:26,360 --> 00:04:22,169

lot of work and I believe that you're a

72

00:04:28,850 --> 00:04:26,370

lot of training and your space

73

00:04:31,100 --> 00:04:28,860

I work in the space there must be a lot

74

00:04:34,219 --> 00:04:31,110

of things that Japanese are expected to

75

00:04:36,650 --> 00:04:34,229

do from the walls so there may be some

76  
00:04:38,870 --> 00:04:36,660  
roles that the Japanese are expected to

77  
00:04:42,920 --> 00:04:38,880  
do that please share your opinion

78  
00:04:45,290 --> 00:04:42,930  
regarding that Mario's mas Canosa can

79  
00:04:47,750 --> 00:04:45,300  
talk even Yoda snare on your harness can

80  
00:04:49,040 --> 00:04:47,760  
I ona John unique thank you very much

81  
00:04:51,890 --> 00:04:49,050  
for that question

82  
00:04:55,280 --> 00:04:51,900  
that's the most this is cable the japan

83  
00:04:59,029 --> 00:04:55,290  
experiment module and error obvious

84  
00:05:00,710 --> 00:04:59,039  
unique function so equipment here one of

85  
00:05:03,950 --> 00:05:00,720  
the example is what you can see here

86  
00:05:07,610 --> 00:05:03,960  
behind me this is airlock and what it

87  
00:05:09,560 --> 00:05:07,620  
does is that there's a door here and

88  
00:05:13,310 --> 00:05:09,570

when I opened the door there is a small

89

00:05:15,350 --> 00:05:13,320

festival here any model and behind the

90

00:05:17,600 --> 00:05:15,360

testicle there's another door

91

00:05:20,240 --> 00:05:17,610

I'm right behind the door is the space

92

00:05:22,879 --> 00:05:20,250

so we opened the first door put

93

00:05:25,790 --> 00:05:22,889

something inside close here and then

94

00:05:27,890 --> 00:05:25,800

make the vacuum here and then open the

95

00:05:31,360 --> 00:05:27,900

next door that way you can bring

96

00:05:35,060 --> 00:05:31,370

something out of the space therefore

97

00:05:37,580 --> 00:05:35,070

this level where you can do various

98

00:05:41,629 --> 00:05:37,590

things such as putting some equipment

99

00:05:45,680 --> 00:05:41,639

into the space or satellite you can also

100

00:05:47,990 --> 00:05:45,690

put into other space like using robotic

101  
00:05:51,140 --> 00:05:48,000  
arm so this is a very unique equipment

102  
00:05:54,050 --> 00:05:51,150  
that we have in table module and there

103  
00:05:57,440 --> 00:05:54,060  
are many other interesting functions

104  
00:06:00,890 --> 00:05:57,450  
that allows us to do various experiments

105  
00:06:04,370 --> 00:06:00,900  
and also we have kornati which is the

106  
00:06:07,339 --> 00:06:04,380  
Conqueror ship and which is able to

107  
00:06:09,650 --> 00:06:07,349  
carry almost six times to international

108  
00:06:12,740 --> 00:06:09,660  
space station so that is one of the

109  
00:06:15,110 --> 00:06:12,750  
largest cargo ship that the lowest to

110  
00:06:17,279 --> 00:06:15,120  
bring things to the space so the

111  
00:06:20,010 --> 00:06:17,289  
operation of corn or three is

112  
00:06:22,769 --> 00:06:20,020  
one of the things that we are gaining a

113  
00:06:25,829 --> 00:06:22,779

lot of trust from the world therefore we

114

00:06:28,980 --> 00:06:25,839

would like to continue our work as one

115

00:06:31,859 --> 00:06:28,990

of the Japanese astronauts and the next

116

00:06:33,600 --> 00:06:31,869

coconut body is going to bring the

117

00:06:36,049 --> 00:06:33,610

battery that is to be used in the

118

00:06:38,189 --> 00:06:36,059

International Space Station the new

119

00:06:40,950 --> 00:06:38,199

replacement battery is to be brought

120

00:06:44,820 --> 00:06:40,960

here and it isn't only actually only

121

00:06:47,609 --> 00:06:44,830

coconutty that can bring many batteries

122

00:06:50,040 --> 00:06:47,619

at a time so that is also another great

123

00:06:53,369 --> 00:06:50,050

opportunity that we can show what Japan

124

00:06:56,999 --> 00:06:53,379

can contribute and no space

125

00:07:05,540 --> 00:07:00,659

that's not what I don't need to text

126  
00:07:12,059 --> 00:07:09,779  
come on guys you're like how sunday I'm

127  
00:07:15,029 --> 00:07:12,069  
third grade of junior high

128  
00:07:18,269 --> 00:07:15,039  
my name is a hockey onishi representing

129  
00:07:20,820 --> 00:07:18,279  
commander site i'm reading a space

130  
00:07:23,309 --> 00:07:20,830  
report of astronaut oneisha I really

131  
00:07:26,820 --> 00:07:23,319  
looking forward to reading to reading

132  
00:07:29,489 --> 00:07:26,830  
your article and we got our money goes

133  
00:07:32,459 --> 00:07:29,499  
with all there is an adequate report

134  
00:07:36,480 --> 00:07:32,469  
that ISS would be swayed when someone

135  
00:07:39,209 --> 00:07:36,490  
does something in is tomorrow either any

136  
00:07:41,489 --> 00:07:39,219  
cases that you restricted your behavior

137  
00:07:43,559 --> 00:07:41,499  
except for during an experiment

138  
00:07:45,959 --> 00:07:43,569

this is on this there don't want them

139

00:07:48,839 --> 00:07:45,969

are seeking God weight loss and also

140

00:07:50,820 --> 00:07:48,849

this net no internal you dance in ok so

141

00:07:53,939 --> 00:07:50,830

we have the same family name you're also

142

00:07:57,659 --> 00:07:53,949

miss Toni see I feel very close to you

143

00:08:01,679 --> 00:07:57,669

well to answer your question when we

144

00:08:06,239 --> 00:08:01,689

move you know astronaut move in ISS that

145

00:08:09,239 --> 00:08:06,249

tend to plate is a lot we have to

146

00:08:11,369 --> 00:08:09,249

exercise when we run on treadmill and

147

00:08:14,670 --> 00:08:11,379

when we bring something up the

148

00:08:16,619 --> 00:08:14,680

heavyweight then that tend to sway ISS

149

00:08:19,739 --> 00:08:16,629

and we are prohibited to do that kind of

150

00:08:22,699 --> 00:08:19,749

exercise exercise doing experiment but

151  
00:08:26,759 --> 00:08:22,709  
also when there isn't talking of another

152  
00:08:29,610 --> 00:08:26,769  
session or when we captured cannot

153  
00:08:35,430 --> 00:08:29,620  
really special using robotic on

154  
00:08:37,920 --> 00:08:35,440  
and then he must if the space station is

155  
00:08:40,399 --> 00:08:37,930  
shaking then that may damage those

156  
00:08:43,800 --> 00:08:40,409  
equipments therefore during that time we

157  
00:08:46,650 --> 00:08:43,810  
limited to do an exercise doing those

158  
00:08:49,620 --> 00:08:46,660  
are . thank you thank you very much

159  
00:08:52,530 --> 00:08:49,630  
where's mother now mr. from you thank

160  
00:08:55,890 --> 00:08:52,540  
you cite yeah that's guys or die

161  
00:08:59,220 --> 00:08:55,900  
so no representing me exactly side i'm

162  
00:09:02,400 --> 00:08:59,230  
now first-grader jr. hi my name is taco

163  
00:09:05,150 --> 00:09:02,410

miento don't know me

164

00:09:09,600 --> 00:09:05,160

gale all do you communicate well with

165

00:09:13,010 --> 00:09:09,610

other national astronauts what is the

166

00:09:16,290 --> 00:09:13,020

key for good communication for astronaut

167

00:09:18,540 --> 00:09:16,300

from other nationality decision

168

00:09:20,100 --> 00:09:18,550

regarding senior's in law and some

169

00:09:21,269 --> 00:09:20,110

goggles which is close to get some

170

00:09:24,810 --> 00:09:21,279

limits

171

00:09:27,540 --> 00:09:24,820

well here on international space station

172

00:09:30,930 --> 00:09:27,550

we have three nationalities people from

173

00:09:33,960 --> 00:09:30,940

3next countries US and Russia and myself

174

00:09:35,790 --> 00:09:33,970

from Japan and actually in total 15

175

00:09:38,460 --> 00:09:35,800

countries are participating in this

176

00:09:40,760 --> 00:09:38,470

international space station project and

177

00:09:43,320 --> 00:09:40,770

I had been to this country's for

178

00:09:45,210 --> 00:09:43,330

training and what I felt that they never

179

00:09:47,550 --> 00:09:45,220

to get a good communication with people

180

00:09:52,410 --> 00:09:47,560

from different different nationality is

181

00:09:54,650 --> 00:09:52,420

important to understand culture or body

182

00:09:59,519 --> 00:09:54,660

or value and we have to respect

183

00:10:02,310 --> 00:09:59,529

differences also magical circle just

184

00:10:04,530 --> 00:10:02,320

having communication is not good enough

185

00:10:07,050 --> 00:10:04,540

you have to do good work as well in know

186

00:10:10,170 --> 00:10:07,060

that to be trusted so working very hard

187

00:10:12,720 --> 00:10:10,180

is also very important and that way you

188

00:10:15,810 --> 00:10:12,730

can be trusted so that way you would

189

00:10:20,040 --> 00:10:15,820

have a smooth communication so that

190

00:10:22,980 --> 00:10:20,050

would be good cycle that you would have

191

00:10:25,199 --> 00:10:22,990

so communication doing good work and

192

00:10:27,600 --> 00:10:25,209

then keep promises those would be very

193

00:10:30,750 --> 00:10:27,610

important thank you very much for the

194

00:10:34,290 --> 00:10:30,760

question what if something anything more

195

00:10:37,829 --> 00:10:34,300

direct thank you very much mr. on issue

196

00:10:41,040 --> 00:10:37,839

and it's maybe we have to speed up a

197

00:10:45,660 --> 00:10:41,050

better effect snow we would like to have

198

00:10:49,680 --> 00:10:45,670

from Tokyo site I'm muddy hasegawa for

199

00:10:52,800 --> 00:10:49,690

the fourth grader there any moment for

200

00:10:54,829 --> 00:10:52,810

future success or any rules in ISS which

201  
00:10:57,360 --> 00:10:54,839  
is different from the ground see

202  
00:11:00,060 --> 00:10:57,370  
American space shuttle due to think that

203  
00:11:00,930 --> 00:11:00,070  
stephanie stop so we got an order to

204  
00:11:04,920 --> 00:11:00,940  
things

205  
00:11:09,630 --> 00:11:04,930  
yeah on international space station when

206  
00:11:13,440 --> 00:11:09,640  
a shadow arrives and when the shuttle

207  
00:11:18,269 --> 00:11:13,450  
leaves they have practice are bringing

208  
00:11:21,750 --> 00:11:18,279  
bell like this though when new cool out

209  
00:11:22,769 --> 00:11:21,760  
rise when they leave we also bring this

210  
00:11:25,199 --> 00:11:22,779  
phone

211  
00:11:27,690 --> 00:11:25,209  
the spell is actually located in u.s.

212  
00:11:30,600 --> 00:11:27,700  
module but i have brought this for this

213  
00:11:33,420 --> 00:11:30,610

event so this is the sound that was

214

00:11:37,500 --> 00:11:33,430

nothing us so like this we ring the bell

215

00:11:40,949 --> 00:11:37,510

to welcome new crew and also say goodbye

216

00:11:43,230 --> 00:11:40,959

to the coos so that is the practices are

217

00:11:44,130 --> 00:11:43,240

rules here on the International Space

218

00:11:45,750 --> 00:11:44,140

Station

219

00:11:48,269 --> 00:11:45,760

thank you very much for that question

220

00:11:52,530 --> 00:11:48,279

now we would like to have backup is she

221

00:11:57,630 --> 00:11:52,540

from whether that's what I'm said great

222

00:12:00,180 --> 00:11:57,640

up my whole workup is she does the Sun

223

00:12:03,960 --> 00:12:00,190

for the starlet the same from the space

224

00:12:09,889 --> 00:12:03,970

as a as they look as it as it does from

225

00:12:15,960 --> 00:12:12,690

hi would you got a mere to die or this

226

00:12:20,190 --> 00:12:15,970

net energy camino tocar tinnitus got

227

00:12:23,760 --> 00:12:20,200

them with Julia this net cugat well that

228

00:12:27,329 --> 00:12:23,770

sounds seen from the space is almost the

229

00:12:30,630 --> 00:12:27,339

same as that from the earth but you'll

230

00:12:34,410 --> 00:12:30,640

do that it's on the idea would have the

231

00:12:37,769 --> 00:12:34,420

air that would be preventing the night

232

00:12:39,569 --> 00:12:37,779

coming down straight so but here in

233

00:12:43,740 --> 00:12:39,579

space we don't have the air so they are

234

00:12:48,449 --> 00:12:43,750

glaring a lot very shiny but w actually

235

00:12:51,670 --> 00:12:48,459

use those are power of the Sun to make

236

00:12:53,920 --> 00:12:51,680

energy and let us

237

00:12:56,620 --> 00:12:53,930

our equipment going so the Sun is very

238

00:13:00,340 --> 00:12:56,630

important here on space as well just as

239

00:13:09,010 --> 00:13:00,350

in case of count now mister Yamamoto

240

00:13:13,600 --> 00:13:09,020

from commander sidepiece representing

241

00:13:18,010 --> 00:13:13,610

command to cite my name is Yuki Amado he

242

00:13:21,370 --> 00:13:18,020

said grade up for me he got absolutely

243

00:13:25,269 --> 00:13:21,380

did your impression of theirs before you

244

00:13:29,860 --> 00:13:25,279

went to space change after you went to

245

00:13:32,590 --> 00:13:29,870

the space i don't want it only lasts so

246

00:13:34,300 --> 00:13:32,600

is that a no Junie stitch kill me with

247

00:13:35,710 --> 00:13:34,310

the home Tony today there's a thought

248

00:13:37,650 --> 00:13:35,720

the most juicing up

249

00:13:43,180 --> 00:13:37,660

thank you very much for that question

250

00:13:45,100 --> 00:13:43,190

was when I came to the space and when I

251  
00:13:48,370 --> 00:13:45,110  
looked down to the ad that it's really

252  
00:13:51,610 --> 00:13:48,380  
beautiful and it's so big you need to

253  
00:13:55,240 --> 00:13:51,620  
get off so it is the hole that there are

254  
00:13:58,030 --> 00:13:55,250  
spread in front of us so it's a really

255  
00:14:00,400 --> 00:13:58,040  
big some when i was underground I had

256  
00:14:02,860 --> 00:14:00,410  
wanted to go to the space all the time

257  
00:14:06,880 --> 00:14:02,870  
but now that I'm in space there are

258  
00:14:10,300 --> 00:14:06,890  
things that so great about that I didn't

259  
00:14:12,970 --> 00:14:10,310  
realize like the smell of the air or the

260  
00:14:16,269 --> 00:14:12,980  
nice feeding at Brees I didn't feel it

261  
00:14:18,699 --> 00:14:16,279  
until I came up to the space i didn't

262  
00:14:20,769 --> 00:14:18,709  
feel it on the ground so the things that

263  
00:14:23,590 --> 00:14:20,779

was so natural and matter of course

264

00:14:25,329 --> 00:14:23,600

really precious i came to land

265

00:14:28,470 --> 00:14:25,339

thank you very much for the question

266

00:14:33,690 --> 00:14:28,480

yeah thank you very much for the dancers

267

00:14:37,930 --> 00:14:33,700

know from miyazaki mr. Takata please

268

00:14:41,680 --> 00:14:37,940

thank your bank representing me as IQ

269

00:14:48,090 --> 00:14:41,690

cite put that my name is

270

00:15:00,400 --> 00:14:53,740

say yes big so when an astronaut goes

271

00:15:05,280 --> 00:15:00,410

outside from ISS four evaa it does the

272

00:15:11,860 --> 00:15:08,440

I don't want ads I'm US soldiers there

273

00:15:14,380 --> 00:15:11,870

and all stony normal dog its ability to

274

00:15:16,000 --> 00:15:14,390

water thought I mucho queso

275

00:15:19,750 --> 00:15:16,010

thank you very much for the questions

276

00:15:22,510 --> 00:15:19,760

muscle there but if you just open the

277

00:15:23,980 --> 00:15:22,520

door and if you try to go out then of

278

00:15:25,200 --> 00:15:23,990

course they're all the era of the

279

00:15:27,670 --> 00:15:25,210

International Space Station

280

00:15:29,860 --> 00:15:27,680

international space station will be lost

281

00:15:32,440 --> 00:15:29,870

and they don't have different that from

282

00:15:35,740 --> 00:15:32,450

happening we have this kind of equipment

283

00:15:38,530 --> 00:15:35,750

called airlock this is only for the

284

00:15:43,840 --> 00:15:38,540

things that we had larger airlock for

285

00:15:46,090 --> 00:15:43,850

people to go out and we make the vacuum

286

00:15:47,980 --> 00:15:46,100

of space before opening the door and

287

00:15:50,860 --> 00:15:47,990

because of the airlock we would not lose

288

00:15:52,120 --> 00:15:50,870

oxygen from ISS thank you for the

289

00:15:54,340 --> 00:15:52,130

question

290

00:15:56,980 --> 00:15:54,350

thank you very much and we are running

291

00:16:02,080 --> 00:15:56,990

out of time so this would be the last

292

00:16:04,660 --> 00:16:02,090

question customer is MP is from took 2nd

293

00:16:05,740 --> 00:16:04,670

grader not oppress you want yea is my

294

00:16:09,850 --> 00:16:05,750

name

295

00:16:13,720 --> 00:16:09,860

god it's not me not to have any dreams

296

00:16:18,760 --> 00:16:13,730

and targets after you become became an

297

00:16:20,860 --> 00:16:18,770

astronaut high I'm us mother this meant

298

00:16:23,770 --> 00:16:20,870

United them outside the vehicle or

299

00:16:26,620 --> 00:16:23,780

George sighs I mean so yes thank you

300

00:16:30,040 --> 00:16:26,630

very much for that question what that's

301  
00:16:33,280 --> 00:16:30,050  
what this meant well first of all I

302  
00:16:37,720 --> 00:16:33,290  
would like to do good work in this sex

303  
00:16:41,590 --> 00:16:37,730  
addition what and then 691 I think that

304  
00:16:45,700 --> 00:16:41,600  
human being is going to suck your dog is

305  
00:16:47,680 --> 00:16:45,710  
equally I tried to go to father and

306  
00:16:49,450 --> 00:16:47,690  
challenge and that is how we had

307  
00:16:52,190 --> 00:16:49,460  
advanced therefore I would like to

308  
00:16:56,360 --> 00:16:52,200  
continue challenge to something new

309  
00:17:00,320 --> 00:16:56,370  
our challenge to go to father places and

310  
00:17:02,420 --> 00:17:00,330  
in that attitude i would like to do my

311  
00:17:05,030 --> 00:17:02,430  
work of astronaut thank you very much

312  
00:17:07,699 --> 00:17:05,040  
for your question

313  
00:17:10,550 --> 00:17:07,709

boys good well actually we can have

314

00:17:12,740 --> 00:17:10,560

another question really don't know the

315

00:17:19,870 --> 00:17:12,750

way so i think i would like to have a

316

00:17:23,000 --> 00:17:19,880

car by a sea from where I'm said greater

317

00:17:26,960 --> 00:17:23,010

sorry you talk about is my name and I

318

00:17:35,510 --> 00:17:30,920

so in the International Space Station

319

00:17:38,270 --> 00:17:35,520

what kind of food to eat in ISS this is

320

00:17:40,130 --> 00:17:38,280

nikhil d'souza and all just anymore mr.

321

00:17:42,490 --> 00:17:40,140

white and I thought their your sake ma

322

00:17:46,010 --> 00:17:42,500

stop and all

323

00:17:48,140 --> 00:17:46,020

yes actually I had brought something

324

00:17:51,710 --> 00:17:48,150

because it would be easier for you if

325

00:17:56,150 --> 00:17:51,720

you see it there's this state food

326

00:17:59,110 --> 00:17:56,160

there's no food in power office by and

327

00:18:02,900 --> 00:17:59,120

also can't food as well this is deciding

328

00:18:06,860 --> 00:18:02,910

and miss so taste and we also have curry

329

00:18:09,710 --> 00:18:06,870

they also have rice so if you put some

330

00:18:13,310 --> 00:18:09,720

water in hot water then it will be

331

00:18:16,490 --> 00:18:13,320

reconstituted to be rice and actually

332

00:18:19,610 --> 00:18:16,500

japanese space food is quite popular

333

00:18:22,760 --> 00:18:19,620

among those in other countries astronaut

334

00:18:26,300 --> 00:18:22,770

so when we gather together i bring some

335

00:18:28,670 --> 00:18:26,310

japanese food but they really like it

336

00:18:30,800 --> 00:18:28,680

sometimes they are eaten by others and

337

00:18:32,600 --> 00:18:30,810

especially Russian astronauts like

338

00:18:35,000 --> 00:18:32,610

Japanese food

339

00:18:38,510 --> 00:18:35,010

thank you very much for answering that

340

00:18:40,430 --> 00:18:38,520

question so we are running out of time

341

00:18:44,660 --> 00:18:40,440

is Tony should thank you very much for

342

00:18:47,300 --> 00:18:44,670

answering those questions so some so NEC

343

00:18:50,570 --> 00:18:47,310

please give a message to the children to

344

00:18:53,090 --> 00:18:50,580

all the sites guys or eric is also

345

00:18:55,600 --> 00:18:53,100

common skies shop has occasional manasa

346

00:19:00,169 --> 00:18:55,610

kill hon tony adore very much

347

00:19:02,299 --> 00:19:00,179

go site where the site me exactly side

348

00:19:03,649 --> 00:19:02,309

everyone gathering all those sites

349

00:19:07,070 --> 00:19:03,659

thank you very much for your great

350

00:19:10,010 --> 00:19:07,080

questions and gathering there i am on

351  
00:19:12,950 --> 00:19:10,020  
the International Space Station for four

352  
00:19:16,100 --> 00:19:12,960  
months in total i have done almost half

353  
00:19:19,130 --> 00:19:16,110  
of it and there are more experiments

354  
00:19:22,220 --> 00:19:19,140  
that are already such as a good

355  
00:19:25,010 --> 00:19:22,230  
developing are putting crystals i would

356  
00:19:27,049 --> 00:19:25,020  
like to share with you the content of

357  
00:19:29,330 --> 00:19:27,059  
those experiments and i hope that you

358  
00:19:32,750 --> 00:19:29,340  
continue to give me support thank you

359  
00:19:34,490 --> 00:19:32,760  
very much for your questions mr. own

360  
00:19:37,460 --> 00:19:34,500  
issues thank you very much let's say

361  
00:19:38,630 --> 00:19:37,470  
thank you to mr. Konishi thank you very

362  
00:19:48,639 --> 00:19:38,640  
much

363  
00:19:55,790 --> 00:19:52,130

station this is Houston ACR thank you

364

00:19:59,960 --> 00:19:57,740

thank you yet astronauts club Japan
