CBS ALL ACCESS

STAR TREK
MISSION
NEW YORK

1
00:00:00,000 --> 00:00:12,000
[MUSIC]

2
00:00:12,480 --> 00:00:18,180
Space is awesome. I've loved space since I was a kid so having NASA here at the con is great.

3
00:00:20,660 --> 00:00:22,640
We love NASA!

4
00:00:31,640 --> 00:00:37,000
My experience and training and experience on the space station really demonstrates

5
00:00:37,000 --> 00:00:42,489
how Star Trek presented a template or
vision for how we were going to be doing

6
00:00:42,489 --> 00:00:46,649
space exploration in the future and that future is now.

7
00:00:50,240 --> 00:00:55,239
You know the international program like International Space Station
you know the working with the other

8
00:00:55,239 --> 00:01:00,319
countries foreign peoples is sometimes
difficulties

9
00:01:01,180 --> 00:01:07,020
but most of the time is adding strength to the project you know
for the Star Trek we have Hikaru Sulu

10
00:01:07,030 --> 00:01:15,399
Japanese, my proud Japanese American, and also we have Russian we have Scots and

11
00:01:15,399 --> 00:01:20,740
we have African-American so those
individuals show their strength in

12

00:01:20,740 --> 00:01:27,340
certain field, eventually kind of raised
the level of the crew and that's

13
00:01:27,340 --> 00:01:32,500
exactly the same as the International
Space programs now is driving us to we

14
00:01:32,500 --> 00:01:38,409
have American, Japanese, Europeans,
Russians and Canadians all five partners

15
00:01:38,409 --> 00:01:44,140
working together for peaceful course as
Kjell said and more than more than that we

16
00:01:44,140 --> 00:01:50,500
have flexibility and durability and
redundancy to the program that's why we

17
00:01:50,500 --> 00:01:54,040
have successful program over the last 18
years now.

18
00:01:54,580 --> 00:01:58,960
[MUSIC]

19
00:01:59,520 --> 00:02:05,039
When Leonard Nimoy passed NASA
just kind of shut down

20
00:02:05,039 --> 00:02:09,660
I mean of course we're working you're
getting done but in the office everybody

21
00:02:09,660 --> 00:02:14,550
kind of drop what they were doing and they
sort of were walking

22
00:02:14,550 --> 00:02:15,660

around the halls saying

23

00:02:15,660 --> 00:02:21,420

what should, how can we do we say something about what we're feeling, how can we make a tribute.

24

00:02:21,420 --> 00:02:26,220

You have to realize that you became our family you became the inspiration to us.

25

00:02:26,260 --> 00:02:31,689

And being a sort of out placed young woman who loved science, who science fiction
