

1  
00:00:00,159 --> 00:00:00,719  
[MUSIC]

2  
00:00:00,719 --> 00:00:05,970  
This is the International Space Station how

3  
00:00:05,970 --> 00:00:08,370  
do you hear me? Is that you Kate? It is

4  
00:00:08,370 --> 00:00:10,740  
I'm calling you from the U.S. Laboratory

5  
00:00:10,740 --> 00:00:12,960  
on the International Space Station.

6  
00:00:12,960 --> 00:00:15,060  
That is fantastic I have never spoken to

7  
00:00:15,060 --> 00:00:17,310  
anybody in space before. I just want to

8  
00:00:17,310 --> 00:00:20,220  
start out by saying that I got a chance to

9  
00:00:20,220 --> 00:00:23,009  
watch your movie and I think probably I

10  
00:00:23,009 --> 00:00:25,019  
had the best view because I watched it

11  
00:00:25,019 --> 00:00:27,720  
from our cupola which is our windows

12  
00:00:27,720 --> 00:00:29,310  
that are facing the Earth. That is

13  
00:00:29,310 --> 00:00:31,169

incredible! I can't think of a more

14

00:00:31,169 --> 00:00:34,140

conducive environment so watch a science

15

00:00:34,140 --> 00:00:36,330

fiction film then from space that's

16

00:00:36,330 --> 00:00:39,060

utterly amazing. Your special effects guys get

17

00:00:39,060 --> 00:00:39,600

it right

18

00:00:39,600 --> 00:00:42,060

it absolutely feels like a space station.

19

00:00:42,060 --> 00:00:43,590

Haha.

20

00:00:43,590 --> 00:00:44,880

Oh that's marvelous they'll be so happy

21

00:00:44,880 --> 00:00:47,010

I make sure I let them know when you

22

00:00:47,010 --> 00:00:50,010

watch your film, do you sit down or do

23

00:00:50,010 --> 00:00:52,620

you just sort of float? When you're kind

24

00:00:52,620 --> 00:00:54,030

of sitting there for a while and you're

25

00:00:54,030 --> 00:00:55,770

watching something you don't really want

26  
00:00:55,770 --> 00:00:57,600  
to hold onto something to you you tuck

27  
00:00:57,600 --> 00:00:59,490  
in and then what you can hook your feet

28  
00:00:59,490 --> 00:01:01,590  
under something and that actually is a very

29  
00:01:01,590 --> 00:01:02,700  
comfortable for this and that their

30  
00:01:02,700 --> 00:01:04,500  
equivalent of sitting.

31  
00:01:04,500 --> 00:01:06,150  
Various technological breakthroughs have been

32  
00:01:06,150 --> 00:01:08,970  
inspired by things in Star Trek which is

33  
00:01:08,970 --> 00:01:11,370  
a kind of nice little symbiosis anything

34  
00:01:11,370 --> 00:01:13,680  
is a all the time and we're moving

35  
00:01:13,680 --> 00:01:16,290  
economic medicine and point-of-care

36  
00:01:16,290 --> 00:01:18,390  
diagnostics I really would like a

37  
00:01:18,390 --> 00:01:20,190  
tricorder, that would be great to have on board.

38  
00:01:20,190 --> 00:01:22,350

It would also be great to

39

00:01:22,350 --> 00:01:24,000

have a tablet which makes you grow new

40

00:01:24,000 --> 00:01:25,650

kidney and all the other things they have.

41

00:01:25,650 --> 00:01:30,780

I love that the art and life

42

00:01:30,780 --> 00:01:32,880

imitating each other and that thank you

43

00:01:32,880 --> 00:01:34,740

very much for calling Space Station it

44

00:01:34,740 --> 00:01:35,940

was really wonderful to talk to you today.

45

00:01:35,940 --> 00:01:37,740

And if you need a chief engineer

46

00:01:37,740 --> 00:01:40,170

to come and fix your warp core you know

47

00:01:40,170 --> 00:01:41,370

where I am.

48

00:01:41,370 --> 00:01:45,370

We absolutely will give you a call.
