

1
00:00:02,120 --> 00:00:04,100
In my latest film PASSENGERS I play an

2
00:00:04,110 --> 00:00:05,819
interstellar traveler, headed for a

3
00:00:05,820 --> 00:00:08,840
colony planet far from Earth.

4
00:00:09,480 --> 00:00:11,099
Scientists believe there may be at least one

5
00:00:11,099 --> 00:00:13,110
potentially habitable planet revolving

6
00:00:13,110 --> 00:00:15,030
around every star we see in the sky.

7
00:00:15,030 --> 00:00:17,340
NASA is exploring our solar system and

8
00:00:17,340 --> 00:00:19,410
far beyond to look for what one day

9
00:00:19,410 --> 00:00:21,990
could be a new home away from Earth.
