

1  
00:00:12,470 --> 00:00:05,590  
and getting confirmation the snares have

2  
00:00:17,189 --> 00:00:14,709  
the cygnus vehicle was released at 8 10

3  
00:00:18,710 --> 00:00:17,199  
a.m central time

4  
00:00:20,310 --> 00:00:18,720  
9 10 eastern

5  
00:00:23,990 --> 00:00:20,320  
while the international space station

6  
00:00:29,349 --> 00:00:24,000  
flew 250 miles over the south atlantic

7  
00:00:29,359 --> 00:00:44,310  
and the arm is now backing away

8  
00:00:48,310 --> 00:00:46,790  
view of the cygnus cargo vehicle from

9  
00:01:17,270 --> 00:00:48,320  
the international space station

10  
00:01:56,149 --> 00:01:19,510  
the arm is four and a half meters away a

11  
00:01:59,990 --> 00:01:58,550  
nominal departure burn of the cygnus

12  
00:02:10,229 --> 00:02:00,000  
vehicle from the international space

13  
00:02:14,309 --> 00:02:11,990

okay sigma's departure burn is in

14

00:02:16,790 --> 00:02:14,319

progress continue to monitor departure

15

00:02:19,589 --> 00:02:16,800

steps two and three and one decimal six

16

00:02:24,869 --> 00:02:22,390

copy steps two and three one decimal

17

00:03:02,070 --> 00:02:24,879

six zero two

18

00:03:02,080 --> 00:03:06,710

santiago and vigo are no longer visible

19

00:03:10,149 --> 00:03:08,630

the e-cygnus cargo craft continues to

20

00:03:12,390 --> 00:03:10,159

float away from the international space

21

00:03:14,229 --> 00:03:12,400

station a great view of the earth there

22

00:03:16,309 --> 00:03:14,239

again this is the seventh orbital atk

23

00:03:19,270 --> 00:03:16,319

resupply mission which delivered more

24

00:03:20,790 --> 00:03:19,280

than 7 600 pounds of cargo including

25

00:03:22,710 --> 00:03:20,800

dozens of science experiments

26

00:03:24,550 --> 00:03:22,720

performance is also a testament to the

27

00:03:25,430 --> 00:03:24,560

team that supported it throughout the

28

00:03:27,670 --> 00:03:25,440

mission

29

00:03:29,670 --> 00:03:27,680

every detail from the flawless system

30

00:03:32,309 --> 00:03:29,680

operations to the perfectly labeled

31

00:03:34,550 --> 00:03:32,319

straps to a well-orchestrated symphony

32

00:03:36,710 --> 00:03:34,560

of cargo and science logistics

33

00:03:38,630 --> 00:03:36,720

we can't say enough about the team we

34

00:03:41,190 --> 00:03:38,640

have the privilege to represent here on

35

00:03:43,589 --> 00:03:41,200

orbit and want to send our best wishes

36

00:03:46,630 --> 00:03:43,599

on the final phase of its mission
