

1  
00:00:08,070 --> 00:00:06,150  
and we are now under five minutes away

2  
00:00:09,910 --> 00:00:08,080  
from the opening of that release window

3  
00:00:12,870 --> 00:00:09,920  
spacex dragon

4  
00:00:14,230 --> 00:00:12,880  
crs 11 commercial resupply mission

5  
00:00:16,630 --> 00:00:14,240  
the 11th for

6  
00:00:23,830 --> 00:00:16,640  
spacex getting ready to depart the

7  
00:00:23,840 --> 00:00:28,950  
station houston on two for dragon

8  
00:00:28,960 --> 00:00:32,709  
go ahead for dragon

9  
00:00:40,549 --> 00:00:34,790  
okay peggy we are looking good down here

10  
00:00:51,830 --> 00:00:42,790  
with that 1 40 am central the release

11  
00:00:55,910 --> 00:00:54,229  
so with the window open we'll stand by

12  
00:01:00,389 --> 00:00:55,920  
for the issuance of the command to

13  
00:01:04,310 --> 00:01:02,310

and once the command's given it takes a

14

00:01:06,710 --> 00:01:04,320

little while for the snares to retract

15

00:01:10,710 --> 00:01:06,720

and dragon to be released and then it'll

16

00:01:10,720 --> 00:01:23,749

getting the confirmation the snares open

17

00:01:38,390 --> 00:01:27,590

and as you can see slowly moving away

18

00:01:41,350 --> 00:01:40,390

and so the robotic arm now being backed

19

00:01:43,510 --> 00:01:41,360

away

20

00:01:46,069 --> 00:01:43,520

by the crew on board and the release

21

00:01:47,350 --> 00:01:46,079

coming on time at 1 41 am central while

22

00:01:50,389 --> 00:01:47,360

the station was

23

00:01:52,789 --> 00:01:50,399

a little over 258 statute miles over the

24

00:01:54,710 --> 00:01:52,799

central part of australia so they're now

25

00:01:57,270 --> 00:01:54,720

gonna back the arm away and then a

26  
00:01:59,429 --> 00:01:57,280  
series of three burns will be executed

27  
00:02:01,590 --> 00:01:59,439  
using thrusters on dragon to begin

28  
00:02:04,709 --> 00:02:01,600  
taking it away from the international

29  
00:02:09,270 --> 00:02:07,109  
getting a good view right down the

30  
00:02:15,430 --> 00:02:09,280  
barrel of the robotic arm you can see it

31  
00:02:29,190 --> 00:02:17,110  
there isn't a vehicle officer confirming

32  
00:02:33,910 --> 00:02:31,910  
copy go for step one uh five and one

33  
00:02:37,190 --> 00:02:33,920  
decimal three two zero

34  
00:02:40,949 --> 00:02:37,200  
and monitoring step three in

35  
00:02:43,430 --> 00:02:40,959  
one decimal six zero two

36  
00:02:45,430 --> 00:02:43,440  
good words peggy

37  
00:02:47,270 --> 00:02:45,440  
just crossing the terminator line that

38  
00:02:49,750 --> 00:02:47,280

line between night and day on the

39

00:02:51,509 --> 00:02:49,760

earth's surface dragon continuing to

40

00:02:53,190 --> 00:02:51,519

depart the area from the international

41

00:02:54,790 --> 00:02:53,200

space station

42

00:02:57,030 --> 00:02:54,800

everything going smoothly with this

43

00:02:59,030 --> 00:02:57,040

morning's operation we'll just watch for

44

00:03:00,790 --> 00:02:59,040

a few more minutes while dragon heads

45

00:03:03,190 --> 00:03:00,800

off into the black

46

00:03:05,350 --> 00:03:03,200

everything going very well with the end
