

1
00:00:01,079 --> 00:00:05,580

On October first, we celebrate NASA's 60th birthday.

2
00:00:05,580 --> 00:00:10,420

From its inception, our great agency has changed the world for the better.

3
00:00:10,420 --> 00:00:14,760

And our story continues to be one of accomplishment and leadership.

4
00:00:14,760 --> 00:00:19,920

President Eisenhower launched our nation into the Space Age and President Kennedy gave us

5
00:00:19,920 --> 00:00:23,190

the charge to reach the Moon.

6
00:00:23,190 --> 00:00:28,710

Over six incredible decades, we've brought the world an amazing number of bold missions

7
00:00:28,710 --> 00:00:33,120

in science, aviation and human exploration.

8
00:00:33,120 --> 00:00:39,050

NASA and its workforce have never failed to raise the bar of human potential and blaze

9
00:00:39,050 --> 00:00:42,180

a trail to the future.

10
00:00:42,180 --> 00:00:44,230

And we're still doing it!

11
00:00:44,230 --> 00:00:49,680

We celebrate our legacy today with great promise and a strong direction from the President

12

00:00:49,680 --> 00:00:53,220

to return to the Moon and go on to Mars.

13

00:00:53,220 --> 00:00:56,530

Our work touches people across the globe.

14

00:00:56,530 --> 00:01:02,140

I'm looking forward to the next breathtaking achievements of our astronauts in space, scientific

15

00:01:02,140 --> 00:01:07,890

discoveries undreamed of in our solar system and beyond, and breakthroughs in air and space

16

00:01:07,890 --> 00:01:14,490

technology that will fuel our missions and improve life for everyone on the planet.

17

00:01:14,490 --> 00:01:17,120

America will continue to lead in space.

18

00:01:17,120 --> 00:01:22,470

We will reach new milestones that change the world, and we will inspire the next generation

19

00:01:22,470 --> 00:01:25,450

to build on our legacy.

20

00:01:25,450 --> 00:01:30,920

As we celebrate 60 years of NASA, I want to thank all of you once again for the vital

21

00:01:30,920 --> 00:01:36,870

work you do each day in support of the NASA mission and on behalf of the United States.
