

1
00:00:07,670 --> 00:00:05,510
in case if you're just joining us you

2
00:00:09,430 --> 00:00:07,680
can see on your screen there dragon

3
00:00:10,790 --> 00:00:09,440
re-entering your has just re-entered the

4
00:00:12,870 --> 00:00:10,800
earth's atmosphere after departing from

5
00:00:14,390 --> 00:00:12,880
the international space station we have

6
00:00:15,589 --> 00:00:14,400
a gorgeous shot of four healthy

7
00:00:17,990 --> 00:00:15,599
parachutes

8
00:00:19,510 --> 00:00:18,000
deployed and slowing the vehicle down as

9
00:00:20,870 --> 00:00:19,520
it is approaching the surface of the

10
00:00:24,230 --> 00:00:20,880
atlantic ocean

11
00:00:29,750 --> 00:00:26,150
and it's continuing to descend under

12
00:00:31,669 --> 00:00:29,760
those shoots we just passed 500 meters

13
00:00:34,630 --> 00:00:31,679

everything continuing to look good via

14

00:00:48,150 --> 00:00:34,640

reports to all the flight control teams

15

00:00:52,869 --> 00:00:50,630

and just passing 300 meters continuing

16

00:00:54,709 --> 00:00:52,879

to descend we might be right on time we

17

00:00:56,630 --> 00:00:54,719

were planning on splashing down at about

18

00:00:58,470 --> 00:00:56,640

5 45 a.m

19

00:01:15,590 --> 00:00:58,480

pacific and we're getting real close to

20

00:01:19,670 --> 00:01:17,510

and we have confirmation that dragon is

21

00:01:21,590 --> 00:01:19,680

now under 100 meters

22

00:01:23,990 --> 00:01:21,600

uh is 100 meters above the the surface

23

00:01:25,910 --> 00:01:24,000

of the ocean

24

00:01:33,620 --> 00:01:25,920

so next up spin standing by for

25

00:01:33,630 --> 00:01:43,910

[Applause]

26

00:01:47,510 --> 00:01:45,830

and there we have confirmation of

27

00:01:49,749 --> 00:01:47,520

splashdown

28

00:01:52,389 --> 00:01:49,759

dragon has returned to planet earth it

29

00:01:54,389 --> 00:01:52,399

is now back home and you can see on your

30

00:01:56,630 --> 00:01:54,399

screen our two fast boats

31

00:01:58,069 --> 00:01:56,640

racing out to the capsule now in

32

00:02:02,469 --> 00:01:58,079

recovery

33

00:02:06,870 --> 00:02:02,479

that splashdown came right on time 5 45

34

00:02:09,109 --> 00:02:06,880

a.m pacific 8 45 a.m over on the east

35

00:02:11,110 --> 00:02:09,119

coast the teams that have been ready and

36

00:02:13,350 --> 00:02:11,120

waiting they were staged just a few

37

00:02:15,350 --> 00:02:13,360

nautical miles away they're gonna start

38

00:02:17,110 --> 00:02:15,360

moving in now you can see those two fast
