

NASA
60th Anniversary

1

00:00:02,169 --> 00:00:07,050

When you think of NASA, you think engineers and rocket scientists.

2

00:00:07,050 --> 00:00:11,610

But everybody needs somebody.

3

00:00:11,610 --> 00:00:14,980

Working with the engineers they send prints, they do research.

4

00:00:14,980 --> 00:00:18,930

I take the prints and I make their ideas come to life.

5

00:00:18,930 --> 00:00:22,340

What excites me about the work that I do is the finished product.

6

00:00:22,340 --> 00:00:25,750

Finishing those and watching them actually work.

7

00:00:25,750 --> 00:00:31,019

My mother, she made me go work on the furnaces and to make sure the gas line was working

8

00:00:31,019 --> 00:00:32,019

in the stove.

9

00:00:32,019 --> 00:00:35,010

I thought, why not be an engineer?

10

00:00:35,010 --> 00:00:36,309

Don't be afraid of math.
