

1  
00:00:00,030 --> 00:00:03,870  
I love to work on and solve really complex, large problems. Things that seem

2  
00:00:03,870 --> 00:00:07,550  
impossible. The more impossible it is, the more I like it. The Space Station program

3  
00:00:07,550 --> 00:00:13,049  
was an amazing arena for getting to do that. Having hardware that was built at

4  
00:00:13,049 --> 00:00:16,830  
different locations around the world, meets for the first time on live TV. That

5  
00:00:16,830 --> 00:00:18,440  
is complex.

6  
00:00:19,500 --> 00:00:22,340  
Women are knit into everything that we do. Everything from

7  
00:00:22,350 --> 00:00:27,210  
scientific research, technology development, advancing aeronautics to

8  
00:00:27,210 --> 00:00:30,920  
human spaceflight. We have a woman managing the Commercial Crew program.

9  
00:00:30,920 --> 00:00:35,160  
People actually think that NASA is mostly scientists. It's not. It's mostly

10  
00:00:35,160 --> 00:00:39,899  
engineers. But nobody's ever flown in space without a contract, or funding, or
