

1

00:00:00,020 --> 00:00:07,940

Earth is my favorite planet. My favorite part about planet Earth is the ocean.

2

00:00:07,940 --> 00:00:12,100

So my favorite part about Earth is there's life here. We know that there is life here.

3

00:00:12,100 --> 00:00:15,520

There are so many aspects of it, I mean the fact, the very fact that we're here.

4

00:00:15,520 --> 00:00:21,480

My favorite part about the Earth is the Arctic. That feeling before a thunderstorm.

5

00:00:21,480 --> 00:00:23,500

I enjoy the feel of the wind.

6

00:00:23,500 --> 00:00:29,700

When you fly, when you're on an airplane and you are in between two decks of clouds.

7

00:00:29,700 --> 00:00:35,340

There are so many different environments on Earth that we are just now exploring in the

8

00:00:35,340 --> 00:00:38,640

past few decades.

It actually floors me that we have

9

00:00:38,640 --> 00:00:45,300

such a large area on this planet that is you know basically relatively unexplored.

10

00:00:45,300 --> 00:00:50,160

The depths of the ocean.

To see that life flourishing under the water.

11

00:00:50,160 --> 00:00:53,219

I think that's fantastic. I feel like  
the best thing about planet Earth is

12

00:00:53,220 --> 00:00:57,040

that it's so close to the Moon and the  
Moon is awesome.

13

00:00:57,040 --> 00:01:01,940

That the Earth has a large Moon that keeps  
its climate stable by keeping its poles stable.

14

00:01:01,940 --> 00:01:06,460

Coming back up to, where does our  
atmosphere end? The feedback between life

15

00:01:06,460 --> 00:01:09,880

and our climate.  
How far out can microbes live?

16

00:01:09,880 --> 00:01:14,980

I like how sunlight interacts with Earth.  
How that influences the sea ice.

17

00:01:14,980 --> 00:01:19,760

I just love the diversity of life on Earth and all  
of the places that it can thrive.

18

00:01:19,760 --> 00:01:21,080

It's pretty amazing.
