

**We're returning to the Moon —
and partnering with these
American companies to
land science there.**

1
00:00:00,440 --> 00:00:04,640
the Artemis program is pressing forward
to the Moon

2
00:00:04,880 --> 00:00:07,380
and science is leading the way

3
00:00:07,560 --> 00:00:11,960
we go to inspire generations and to
bring home ideas and discoveries that

4
00:00:11,960 --> 00:00:16,670
will benefit all of humanity to do this
we must better understand the makeup of

5
00:00:16,670 --> 00:00:22,080
the moon we must study areas of the
lunar surface where no human or Rover has ever been before

6
00:00:22,400 --> 00:00:24,660
today we announce an initiative that

7
00:00:24,660 --> 00:00:28,940
further demonstrates how this effort is
unlike any before

8
00:00:28,940 --> 00:00:32,080
today nasa becomes a customer of commercial partners

9
00:00:32,220 --> 00:00:36,140
who will deliver our science instruments and our

10
00:00:36,140 --> 00:00:41,210
lunar technology to the surface of the
moon this is a crucial step in our

11
00:00:41,210 --> 00:00:46,280
ongoing success NASA is proud to
announce that the first commercial

12

00:00:46,280 --> 00:00:51,190

payload to the lunar surface will be
provided by Astrobotic

13

00:00:51,190 --> 00:00:55,540

Intuitive Machines
and Orbit Beyond

14

00:00:55,560 --> 00:01:01,380

these companies are prime examples of
American ingenuity vision and know how because

15

00:01:01,380 --> 00:01:05,480

of these Landers and the instruments
they deliver the science technology and

16

00:01:05,489 --> 00:01:09,180

research that will be done in the
immediate future will prepare the way
