

A timelapse photograph of a sunset as seen from the International Space Station. The sun is a bright, glowing orb at the top center, with its rays extending across the frame. The Earth's horizon is visible as a dark, curved line below the sun, with a thin layer of atmosphere glowing in shades of blue and purple. The background is a deep black space filled with numerous stars of varying brightness. The overall scene is a dramatic and awe-inspiring view of the Earth from space.
