

1

00:00:00,420 --> 00:00:07,320

If Neil Armstrong, Buzz Aldrin, and Mike Collins are not heroes, then there are no heroes.

2

00:00:07,320 --> 00:00:26,980

We honor these men today, and America will always honor our Apollo astronauts.

3

00:00:26,980 --> 00:00:31,800

Landing men on the Moon was by far the hardest thing ever accomplished in human history.

4

00:00:31,800 --> 00:00:40,019

Similar to the 1960s, we too have an opportunity to take a giant leap forward for all of humanity.

5

00:00:40,019 --> 00:00:46,040

President Trump and Vice President Pence have given us a bold direction as an agency, to

6

00:00:46,040 --> 00:00:51,139

return to the Moon within five years, and go forward to Mars.

7

00:00:51,139 --> 00:00:57,999

We honor the men of Apollo 11 by remembering their epic voyage and telling their story.

8

00:00:57,999 --> 00:01:02,969

But we also honor them by continuing the work they so nobly and courageously advanced.

9

00:01:02,969 --> 00:01:12,450

The Orion crew vehicle for the Artemis 1 mission is complete and ready to begin preparations

10

00:01:12,450 --> 00:01:17,979

for its historic first flight.

11

00:01:17,979 --> 00:01:24,229

And as we continue on this American journey,
we go with the same resolve and determination

12

00:01:24,229 --> 00:01:28,259

of those who have gone before.

13

00:01:28,260 --> 00:01:29,620

And we go with faith.

14

00:01:31,360 --> 00:01:34,340

Faith in the courage of this new generation of astronauts --

15

00:01:35,700 --> 00:01:39,620

men and women of the character and caliber of those who have gone before.

16

00:01:41,900 --> 00:01:47,220

They're remarkable pioneers who will carry American leadership into space.

17

00:01:49,060 --> 00:01:52,040

Faith in the ingenuity of
the men and women of NASA and all of those

18

00:01:52,040 --> 00:02:00,260

across the American space enterprise, whose
creativity and tireless efforts in the days ahead,
