

*Hurricane*

# ***DORIAN***

*Views from the Space Station*

*August 29, 2019*

1  
00:00:06,470 --> 00:00:04,150  
at us before it moves over the eastern

2  
00:00:08,790 --> 00:00:06,480  
coast of florida as

3  
00:00:30,310 --> 00:00:08,800  
as early as the

4  
00:00:34,709 --> 00:00:32,229  
and right now the station just passing

5  
00:00:37,190 --> 00:00:34,719  
over the very northern part of cuba so

6  
00:01:25,990 --> 00:00:37,200  
we're continuing to fly to the west of

7  
00:01:29,670 --> 00:01:28,149  
now getting a live view of hurricane

8  
00:01:32,310 --> 00:01:29,680  
dorian from one of these outboard

9  
00:01:34,149 --> 00:01:32,320  
cameras in the station right now 261

10  
00:01:36,310 --> 00:01:34,159  
statute miles it's already crossed over

11  
00:01:50,310 --> 00:01:36,320  
the island of cuba and it's now off to

12  
00:01:55,749 --> 00:01:52,389  
again the latest measurements from a

13  
00:01:56,870 --> 00:01:55,759

national hurricane service or a noaa p3

14

00:01:59,350 --> 00:01:56,880

aircraft

15

00:02:28,150 --> 00:01:59,360

measured speeds at about 85 miles an

16

00:02:31,990 --> 00:02:29,990

and if you're just now joining us

17

00:02:33,830 --> 00:02:32,000

continuing to get live views from

18

00:02:36,070 --> 00:02:33,840

outboard cameras on the international

19

00:02:38,550 --> 00:02:36,080

space station looking down at hurricane

20

00:02:40,949 --> 00:02:38,560

dorian the station itself at this moment

21

00:02:43,190 --> 00:02:40,959

261 statute miles over the earth's
