

ARTEMIS DAY

1
00:00:00,180 --> 00:00:03,280
Dec. 9, 2019

2
00:00:05,560 --> 00:00:07,660
Michoud Assembly Facility, New Orleans, Louisiana

3
00:00:08,920 --> 00:00:10,020
Artemis Day

4
00:00:10,140 --> 00:00:13,580
Thank you for being here on this very
important day when we get to announce

5
00:00:13,720 --> 00:00:17,500
core stage complete for, in fact, the
SLS rocket,

6
00:00:17,620 --> 00:00:20,980
the most powerful rocket ever built in human history.

7
00:00:22,660 --> 00:00:26,760
Media got an up-close view of Artemis hardware.

8
00:00:35,400 --> 00:00:38,480
We are making significant progress.

9
00:00:38,620 --> 00:00:39,740
By the end of the year we're going to be

10
00:00:39,740 --> 00:00:42,120
moving it out of the Michoud Assembly
Facility.

11
00:00:42,580 --> 00:00:45,120
We're going to take it to the Stennis Space Center.

12
00:00:45,120 --> 00:00:46,940
We're going to do a green run test.

13

00:00:47,140 --> 00:00:48,620

We're going to prove its capability.

14

00:00:48,740 --> 00:00:50,900

We're going to get it to the
Cape and we're going to be ready to

15

00:00:50,910 --> 00:00:53,448

launch American astronauts to the Moon
again.

16

00:00:53,448 --> 00:00:58,240

And getting our first woman a next man to the South Pole of the Moon in 2024

17

00:00:58,800 --> 00:01:01,500

This time when we go to the Moon, we're going to go to stay,

18

00:01:01,620 --> 00:01:04,260

with the purpose of learning how to live and work on another world,

19

00:01:04,360 --> 00:01:07,880

so we can take that knowledge and information to Mars.
