

HOW DO YOU  
FEEL ABOUT  
BEING PART  
OF THE ARTEMIS  
GENERATION?

---

#BEANASTRONAUT

1

00:00:00,030 --> 00:00:04,920

It's really exciting to be part of the Artemis Generation. Excited and fortunate.

2

00:00:04,920 --> 00:00:08,880

I mean, I feel incredibly lucky to be involved. I'm very humbled and thrilled

3

00:00:08,880 --> 00:00:14,130

to be a part of this. Incredibly exciting and empowering. Very, very proud to have

4

00:00:14,130 --> 00:00:17,430

this opportunity. It's both an honor and a humbling thing to be a part of the

5

00:00:17,430 --> 00:00:22,080

Artemis Generation. We are so excited about what this agency and this nation

6

00:00:22,080 --> 00:00:26,160

is capable of doing. We acknowledge that we're really just representing an entire

7

00:00:26,160 --> 00:00:30,090

generation – the tens of thousands of people that are helping to make

8

00:00:30,090 --> 00:00:34,530

this happen. It's really exciting to see what this generation will do. I can only

9

00:00:34,530 --> 00:00:40,290

dream of the opportunities that seem to be on the horizon for us. It is amazing

10

00:00:40,290 --> 00:00:45,360

to be here and be a part of the Artemis program bringing us back to the Moon. I

11  
00:00:45,360 --> 00:00:50,520  
remember in college thinking that I had  
completely missed out on those golden

12  
00:00:50,520 --> 00:00:54,539  
years when we went to the Moon, and here  
we are, doing it and doing it in a new

13  
00:00:54,539 --> 00:00:56,789  
way.  
And to be a part of that is really

14  
00:00:56,789 --> 00:01:01,949  
special. It's gonna be a stepwise process  
and contributing in a small way to what

15  
00:01:01,949 --> 00:01:07,950  
will ultimately be pretty phenomenal  
things, is an honor. I think it's a really exciting

16  
00:01:07,950 --> 00:01:13,409  
time to be an astronaut. NASA is buzzing.  
We're working on so many vehicles and so

17  
00:01:13,409 --> 00:01:18,299  
many interesting programs and projects,  
and we're right on the cusp of doing

18  
00:01:18,299 --> 00:01:22,560  
some really amazing stuff. So, every day  
is pretty exciting. We have space station,

19  
00:01:22,560 --> 00:01:28,110  
we have new spacecraft coming online, we  
have the Artemis program looking to

20  
00:01:28,110 --> 00:01:32,460  
explore further, and it's just a really  
exciting time to be here.

21

00:01:32,460 --> 00:01:35,790

I love the training that I've taken part  
in so far and the people that I've

22

00:01:35,790 --> 00:01:39,869

trained with. I love taking on challenges  
and I love taking on those challenges

23

00:01:39,869 --> 00:01:44,579

with incredible teams. And there is no  
better team than this one. I think we're

24

00:01:44,579 --> 00:01:48,030

gonna be able to accomplish things that  
are greater than we can even imagine

25

00:01:48,030 --> 00:01:53,220

right now. To go live and work in orbit  
around the Moon. To go to the surface of

26

00:01:53,220 --> 00:01:55,979

the Moon and stay  
for a long period of time. How can you
