

*Season's Greetings*

1  
00:00:01,010 --> 00:00:03,050  
Oh Look, it's snowing.

2  
00:00:03,050 --> 00:00:04,060  
So pretty.

3  
00:00:04,060 --> 00:00:06,980  
Grandpa, will you read us a story?

4  
00:00:06,980 --> 00:00:10,520  
Yes, a story.

5  
00:00:10,520 --> 00:00:12,860  
Please!

6  
00:00:12,860 --> 00:00:16,939  
Tis the holiday season  
and our hearts are a glow.

7  
00:00:16,939 --> 00:00:23,040  
And at this time of year  
for some it means snow.

8  
00:00:23,040 --> 00:00:26,990  
But Earth's not alone  
and here we will list them.

9  
00:00:26,990 --> 00:00:31,970  
Of other places with snow  
out in our solar system.

10  
00:00:31,970 --> 00:00:36,390  
With the Sun so close by  
how could Mercury have snow?

11  
00:00:36,390 --> 00:00:41,559  
But up north there are craters  
where the Sun does not go.

12

00:00:41,559 --> 00:00:45,550

The dry plains of Mars  
have no snow on the ground.

13

00:00:45,550 --> 00:00:50,780

But at the poles you will find  
whole worlds to be found.

14

00:00:50,780 --> 00:00:55,739

Jupiter's moon of Europa  
has geysers that flow.

15

00:00:55,739 --> 00:01:00,100

What goes up must come down  
and it lands there as snow.

16

00:01:00,100 --> 00:01:05,900

Mimas is small  
around Saturn's rings it does race.

17

00:01:05,900 --> 00:01:11,610

The moon's not so rocky  
but a great snowball in space.

18

00:01:11,610 --> 00:01:16,720

In the skies above Neptune  
methane clouds fill with snow.

19

00:01:16,720 --> 00:01:23,210

Against an azure blue world  
they really do show.

20

00:01:23,210 --> 00:01:27,530

With its mission to Pluto  
New Horizons' probe seeks.

21

00:01:27,530 --> 00:01:33,330

The dwarf planet's kept secrets  
and guess what... snowy peaks.

22

00:01:33,330 --> 00:01:36,990

Back here on Earth

Such a beautiful sight.

23

00:01:36,990 --> 00:01:42,520

Of snow falling gently

on a cold winter's night.

24

00:01:42,520 --> 00:01:46,420

As we ring in the holidays

with all the proceedings.
