

DEDICATING
THE NEIL A. ARMSTRONG TEST FACILITY
FOR AN AMERICAN HERO

1
00:00:06,806 --> 00:00:09,976
Neil's one giant leap for mankind

2
00:00:10,176 --> 00:00:15,415
was taken by a giant of a person,
and he will forever

3
00:00:15,415 --> 00:00:20,253
be enshrined in history
as the first person to step foot

4
00:00:21,488 --> 00:00:24,691
On another celestial body.

5
00:00:24,691 --> 00:00:28,161
But the legacy continues to extend.

6
00:00:28,928 --> 00:00:32,065
It's wonderful to be able to commemorate

7
00:00:32,432 --> 00:00:36,603
an exemplary person,
an incredible human being.

8
00:00:43,176 --> 00:00:45,512
We are all so inspired

9
00:00:46,112 --> 00:00:49,182
by Neil Armstrong's amazing achievements,

10
00:00:49,416 --> 00:00:52,352
his technical achievements. But to me.

11
00:00:53,453 --> 00:00:57,524
And I think to my fellow
astronauts, his grace,

12
00:00:58,525 --> 00:01:02,862

his humility and most of all
his humanity stands

13

00:01:02,862 --> 00:01:06,099
as an inspiration to all of us.

14

00:01:11,304 --> 00:01:12,372
It's our family's hope

15

00:01:12,372 --> 00:01:16,543
that the Neil Armstrong test facility
will continue to vault us forward.

16

00:01:17,444 --> 00:01:20,213
For faster and safer aerospace transport.

17

00:01:20,747 --> 00:01:26,086
And that this new name will be a beacon
for the best, the brightest,

18

00:01:27,053 --> 00:01:29,989
and perhaps most
importantly, the most determined.

19

00:01:43,503 --> 00:01:46,005
But we are proud to have his name

20

00:01:46,539 --> 00:01:51,945
now adorning the Armstrong test facility
because of what we accomplish here

21

00:01:52,345 --> 00:01:55,415
For the agency and our many
commercial partners.

22

00:02:08,561 --> 00:02:10,797
This was part of Neil's dream.

23

00:02:11,498 --> 00:02:15,902

As Bill will tell you Neil, was a big advocate of the space program and in particular

24

00:02:16,469 --> 00:02:19,472

getting Artemis off the ground and moving forward.

25

00:02:19,772 --> 00:02:21,908

And I wish he could be here to see it.

26

00:02:22,742 --> 00:02:24,844

The idea that this

27

00:02:25,111 --> 00:02:30,016

special new mission, this reinvigoration of our entire space program is

28

00:02:30,517 --> 00:02:33,753

so intimately involved with NASA, Glenn, in this test

29

00:02:34,220 --> 00:02:38,191

station. We're so proud.

30

00:02:49,836 --> 00:02:51,571

And in honoring him today,

31

00:02:51,571 --> 00:02:55,141

we renew our commitment to staying curious.

32

00:02:55,575 --> 00:02:58,978

Being pioneers and continuing
