

PEOPLE OF ARTEMIS

1

00:00:03,040 --> 00:00:11,559

For every generation the Moon has been a beacon,
...of tides and time. Of dreams and destiny.

2

00:00:11,559 --> 00:00:16,660

For many across NASA and around the world,
it has been calling to us.

3

00:00:16,660 --> 00:00:24,290

It has been the daily efforts of thousands,
whose quiet resolve has pressed us forward

4

00:00:24,290 --> 00:00:30,960

and prepared us for this next moment. We don't
just stand on the shoulders of giants; we

5

00:00:30,960 --> 00:00:35,480

stand shoulder to shoulder with the generations
of dreamers and doers that have navigated

6

00:00:35,480 --> 00:00:42,230

every phase of preparation. To every hand
that has added a fingerprint to what we now

7

00:00:42,230 --> 00:00:44,610

call Artemis

8

00:00:44,610 --> 00:00:46,400

Thank you.

9

00:00:46,400 --> 00:00:49,980

All of your work will soon be realized!

10

00:00:49,980 --> 00:00:55,690

Today the moment of return to the Moon has
never been closer. The path forward never

11

00:00:55,690 --> 00:01:01,600

so clear. The number of those committed to

the Artemis Accords continues to grow! The

12

00:01:01,600 --> 00:01:08,630

commercial lunar delivery missions that will
pave the way are nearing launch. And as NASA's

13

00:01:08,630 --> 00:01:14,130

Artemis I stands fully stacked, the hardware
for our future human missions to the Moon

14

00:01:14,130 --> 00:01:16,900

is well underway!

15

00:01:16,900 --> 00:01:24,510

Are there challenges ahead? Certainly. But
this is our path to Mars. We are about reaching

16

00:01:24,510 --> 00:01:29,479

further into the unknown and learning how
to live on other worlds because the farther

17

00:01:29,479 --> 00:01:36,440

we reach, the greater we grow. And as history
has taught us the greatest of these benefits

18

00:01:36,440 --> 00:01:40,641

are fully realized and utilized here.
